Urban Informality Ananya Roy, Nezar AlSayyad, 2004-01-01 The turn of the century has been a moment of rapid urbanization Much of this urban growth is taking place in the cities of the developing world and much of it in informal settlements This book presents cutting edge research from various world regions to demonstrate these trends The contributions reveal that informal housing is no longer the domain of the urban poor rather it is a significant zone of transactions for the middle class and even transnational elites Indeed the book presents a rich view of urban informality as a system of regulations and norms that governs the use of space and makes possible new forms of social and political power The book is organized as a transnational endeavor It brings together three regional domains of research the Middle East Latin America and South Asia that are rarely in conversation with one another It also unsettles the hierarchy of development and underdevelopment by looking at some First World processes of informality through a Third World research lens
