Rethinking Aids Prevention Learning From Successes In Developing Countries:

Rethinking AIDS Prevention Edward C. Green, 2003-11-30 This is not another book about how AIDS is out of control in Africa and Third World nations or one complaining about the inadequacy of secured funds to fight the pandemic The author looks objectively at countries that have succeeded in reducing HIV infection rates along with a worrisome flip side to the progress The largely medical solutions funded by major donors have had little impact in Africa the continent hardest hit by AIDS Instead relatively simple low cost behavioral change programs stressing increased monogamy and delayed sexual activity for young people have made the greatest headway in fighting or preventing the disease s spread Ugandans pioneered these simple sustainable interventions and achieved significant results As National Review journalist Rod Dreher put it Rather than pay for clinics gadgets and medical procedures especially in the important earlier years of its response to the epidemic Uganda mobilized human resources In a New York Times interview Green cited evidence that partner reduction promoted as mutual faithfulness is the single most effective way of reducing the spread of AIDS That deceptively simple solution is not merely about medical advances or condom use It is about the ABC model Abstain Be faithful and use Condoms if A and B are impossible Yet deeply rooted Western biases have obstructed the effectiveness of AIDS prevention Many Western scientists have attacked the ABC approach as impossible and moralistic Some Western activists and HIV carriers have been outraged thinking the approach passes moral judgment on their behaviors But there is also a troubling suspicion among a growing number of scientists who support the ABC model that certain opponents may simply be AIDS profiteers more interested in protecting their incomes than battling the disease This book is a bellwether in the escalating controversy offering persuasive evidence in support of the ABC approach and exposing the fallacies and motivations of its opponents

The African AIDS Epidemic John Iliffe, 2005-02-15 This history of the African AIDS epidemic is a much needed accessibly written historical account of the most serious epidemiological catastrophe of modern times The African AIDS Epidemic A History answers President Thabo Mbeki s provocative question as to why Africa has suffered this terrible epidemic While Mbeki attributed the causes to poverty and exploitation others have looked to distinctive sexual systems practiced in African cultures and communities John Iliffe stresses historical sequence He argues that Africa has had the worst epidemic because the disease was established in the general population before anyone knew the disease existed HIV evolved with extraordinary speed and complexity and because that evolution took place under the eyes of modern medical research scientists Iliffe has been able to write a history of the virus itself that is probably unique among accounts of human epidemic diseases In giving the African experience a historical shape Iliffe has written one of the most important books of our time The African experience of AIDS has taught the world much of what it knows about HIV AIDS and this fascinating book brings into focus many aspects of the epidemic in the longer context of massive demographic growth urbanization and social change in Africa during the latter half of the twentieth century The African AIDS Epidemic A History is a brilliant introduction to the

many aspects of the epidemic and the distinctive character of the virus **Doomed Interventions** Kim Yi Dionne, 2018 This book is for students and scholars studying political economy public policy and global health and all those who are interested in knowing how ordinary Africans think about the response to the AIDS epidemic It studies the divergent priorities of donors and citizens in response to AIDS intervention in Africa Kusamira Music in Uganda Peter J. Hoelsing, 2021-11-09 A

performance culture of illness and wellness In southern Uganda ritual healing traditions called kusamira and nswezi rely on music to treat sickness and maintain well being Peter J Hoelsing blends ethnomusicological fieldwork with analysis to examine how kusamira and nswezi performance socializes dynamic processes of illness wellness and health People participate in these traditions for reasons that range from preserving ideas to generating strategies that allow them to navigate changing circumstances Indeed the performance of kusamira and nswezi reproduces ideas that remain relevant for succeeding generations Hoelsing shows the potential of this social reproduction of well being to shape development in a region where over 80 percent of the population relies on traditional healers for primary health care Comprehensive and vivid with eyewitness detail Kusamira Music in Uganda offers insight into important healing traditions and the overlaps between expressive culture and healing practices the human and other than human and Uganda s past and future **SODOM HAS**

BOUNCED BACK: A Response to Contemporary Challenges Faced by Young Christians Sikhumbuzo Dube, 2014-10-24 The city of Sodom had not only become the hub of variety of activities but a rendezvous for perpetrators of all forms of vice The crime and vice must have been fuelled by economic pressures among other factors Although the economy of Sodom was thriving many young people could have been living in abject poverty Many unemployed young people killed their time by beer drinking and loitering as a result they got hooked to a number of sexual mores Beautiful young women signed up with rich businessmen who hired them out for escort services to wealthy visitors The city adult book and video stores the one night fornicatory stands and porn shops were teeming with wicked men of Sodom This book addresses current hot potatoes like homosexuality lesbianism revisionist gay theology the occult music television and its impact premarital non marital sex and materialism through looking glasses of Lot s story It focuses on a redemptive ministry approach to these issues

Biohealth Raymond Downing, 2011-09-01 The development of modern medicine is on a very steep trajectory upward a rise that began only about a hundred years ago This rise is certainly quantitative but it is accompanied by qualitative changes in the way we understand and deliver healthcare This book begins with a look at three recognized periods of medical development from 1900 until World War II from the war until about 1980 and the period since 1980 While the common response is to celebrate these developments this book suggests that perhaps we should also be wary especially of the qualitative changes Since World War II these medical developments have entered more and more areas of our lives It is precisely this process of medicalization that should be critically examined Since 1980 we have medicalized life itself Drawing from medical sociology the book examines four characteristics of contemporary Western health care health as a system risk

as a means of understanding health health as a commodity and individual responsibility for health Critical examination of these four tendencies in contemporary health care forms the core of the argument of this important book about the essence of biohealth and medical practice

Global Religious Movements Across Borders Stephen M. Cherry, Helen Rose Ebaugh, 2016-04-22 From global missionizing among proselytic faiths to mass migration through religious diasporas religion has traveled from one side of the world and back again It continues to play a prominent role in shaping world politics and has been a vital force in the continued emergence spread and creation of a transnational civil society Exploring how religious roots are shaping organizations that seek to aid people across political and geographic boundaries service movements this book focuses on how religious movements establish structures to assist people with basic human needs such as food clothing shelter education and health Examining a multitude of faith traditions with origins in different parts of the world seven contributing chapters with an introduction and conclusions by the senior author offer a unique discussion of the intersections between religious transnationalism and social movements

Poverty and Life Expectancy James C. Riley, 2005-07-18 A multidisciplinary study that reconstructs Jamaica's rise from low to high life expectancy and explains how that was achieved Jamaica is one of the small number of countries that has attained a life expectancy nearly matching that in richer countries despite having a much lower level of per capita income

Religious-Spiritual Diversity in Organisations Edwina Pio, Robert Kilpatrick, Peter Lineham, 2024-02-12 Challenges involved in the interplay between religion and business are incredibly complex and as such this book thoughtfully considers the critical issue of inclusion and how employers should view its importance Whilst exploring the intricacies of organised religion it investigates how mindful religious wisdom can be harmoniously applied within corporate and not for profit environments

Pandemic Genres Neville Wallace Hoad, 2025 As HIV AIDS emerged as a public health crisis of significant proportions across much of sub Saharan Africa it became the subject of local and international interest prurient benevolent and interventionist Meanwhile the experience of Africans living with HIV AIDS became an object of aesthetic representation in multiple genres by Africans themselves These cultural representations engaged public discourse the public policy pronouncements of officials of postcolonial states an emerging global NGO speak and journalism In *Pandemic Genres* Neville Hoad investigates how cultural production novels poems films around the pandemic supplemented public discourse From Botswana Kenya and South Africa he shows that the long historical imaginaries of race empire and sex underwrote all attempts to bring the pandemic into public representation Attention to genres that stage themselves as imaginary particularly on the terrain of feeling may forecast possibilities for new figurations
