**Rethinking architecture; design students and physically disabled people** R. Lifchez, **Rethinking Architecture** Raymond Lifchez, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 **Designing for the Disabled: The New Paradigm** Selwyn Goldsmith, 2012-09-10 Selwyn Goldsmith's *Designing for the Disabled* has since it was first published in 1963 been a bible for practising architects around the world Now as a new book with a radical new vision comes his *Designing for the Disabled: The New Paradigm* Goldsmith's new paradigm is based on the concept of architectural disability As a version of the social model of disability it is not exclusively the property of physically disabled people Others who are afflicted by it include women since men customarily get proportionately four times as many amenities in public toilets as women and women have to queue where men do not and those with infants in pushchairs because normal WC facilities are invariably too small to get a pushchair and infant into To counter architectural disability Goldsmith's line is that the axiom for legislation action has to be access for everyone it should not just be access for the disabled as it presently is with the Part M building regulation and relevant provisions of the 1995 Disability Discrimination Act In a 40 page annex to his book he sets out the terms that a new style Part M regulation and its Approved Document might take one that would cover alterations to existing buildings as well as new buildings But architects and building control officers need not he says wait for new a legislation to apply new practical procedures to meet the requirements of the current Part M regulation they can as he advises act positively now This is a book which will oblige architects to rethink the methodology of designing for the disabled It is a book that no practising architect building control officer local planning officer or access officer can afford to be without **Practice and Progress in Social Design and Sustainability** Siu, Kin Wai Michael, Wong, Yin Lin, 2018-07-06 Designers provide creative solutions for user problems and identify the needs of users in a given environment However it is often difficult to understand the social design of a product or service *Practice and Progress in Social Design and Sustainability* is a critical scholarly resource that provides groundbreaking research on social contributions to design Featuring coverage on a broad range of topics such as rural sustainability ecological farmhouse designs and community

public spaces this book is geared towards architects designers program planners entrepreneurs and engineers seeking information about design for resolving social issues      **Barrier-Free Design** James Holmes-Seidle,2012-08-21 This book for architects interior designers building managers students conference organisers looks at first principles to provide the user with the tools to make their own decisions rather than a cookbook approach It is intended that designs and product information can be taken straight from the manual and inserted into ongoing projects For the first time the book considers the needs of people with visual hearing and mental disabilities who make up the majority of disabled people in the population alongside those of people with physical mobility disabilities Practical low cost solutions to retro fitting existing buildings are discussed as well as the methods used to assess the suitability of an existing building and assembling a project to improve access for disabled people Specific products and designs are illustrated and discussed with full working technical drawings and full specification details These will reduce considerably the research time needed to produce a cost effective solution that will improve access for disabled people A perspective of the standards and legislation dealing with access issues in the UK is compared with those in other countries and the standards mentioned are compared with the realities of practical implementation carried out in 4 years of design in this area      *Space, people and technology* Amira Osman,Geci Karuri-Sebina,2023-08-25 In this book there is a call on built environment professionals to reflect on the role of narrative in shaping space influencing people and making decisions about technology It is argued that by changing the narrative and methods of representations new imaginaries can be generated and the scope of what is possible is significantly broadened Contextualized narratives vocabularies and metaphors can evoke new thinking and new practice This book looks for examples where professionals and communities have jointly worked together from the precinct to the site level The authors are especially inspired by the ideas of tinkering muddling through engaging with the mess and gnarly planning concepts that encourage experimentation and engagement with real life contexts learning through doing policy change through evolutionary processes and a hands on approach This book aims to elevate our understanding of the concepts of people centred participation and co production co creation by shifting the debate from the esoteric to the applied and contextual We believe that practice can only be transformed by transforming thinking Through the development of our own philosophies emerging from and rooted in context we may shift thinking and practice towards people community and care

**Foundations of Disability Studies** M. Wappett,K. Arndt,2013-11-11 A collection of eight essays by scholars who have published extensively within the disability studies literature and who have helped build the field to its current state Includes contributions from Robert Bogdan Doug Biklen Susan Schweik and more
