Rethinking Chinas Provinces:

Rethinking China's Provinces John Fitzgerald, 2003-09-02 This is the third volume in a series examining the political importance of China's provinces under reform. The present book provides a survey of provinces as echelons of the Peoples Republic of China. It seeks to locate the province as an administrative level in the Chinese state through an examination of history, economic, social, and political developments of these units. By situating the province history, this volume identifies new developments in the territorial administration of the Peoples Republic over the reform era. It also charts the consequent emergence of the city as an intermediate unit situated between the province and the country and providing challenges to the hierarchy of the bureaucratic state. This book includes detailed analyses of Chongqing, Henan, Guangdong, Anhui, Yunnan, and Heilongjiang. It contains extensively researched empirical data collected from these provinces and user-friendly maps of these regions.

Handbook of the Politics of China David S.G. Goodman, 2015-11-27 The Handbook of the Politics of China is a comprehensive resource introducing readers to the very latest in research on Chinese politics. David Goodman provides an introduction to the key structures and issues providing the foundations on which later learning can be built. Including a comprehensive bibliography, it is an ideal reference work for undergraduate and postgraduate students and academics. The Handbook contains four sections of new and original research dealing with leadership and institutions, public policy, political economy, and social change and international relations. Each of the 26 chapters has been written by a leading internationally established authority in the field and each reviews the literature on the topic and presents the latest findings of research. Presenting the state of the art of the field, this reader-oriented Handbook is an essential primer for the study of China's politics.

China's Provinces and Populations Eric Croddy, 2022-11-23 This manual provides an overview of China's administrative geography, history, and populations of all 31 provinces as well as Hong Kong, Macao, and Taiwan. It focuses primarily on how the provinces came to be, how they were named, as well as their people and populations throughout history. In addition to extensive use of bilingual names (Chinese/English) for specificity, this resource is unique in the datasets contained therein: 1. Up-to-date residential populations of mainland China using the latest decennial 2020 census; and 2. Political-administrative registered household hukou data based on official numbers provided by the Peoples Republic of China (PRC) Ministry of Public Security, showing trends from 2012-2020. Each internally consistent but differing in their methodologies, whereby the Census decennial data provide a snapshot of how many people live in a given location and the permanent hukou registered household data track each individual based on their hometown, household, urban/rural status, and nationality. This book addresses this chasm, which among other issues points to the phenomenon of China's floating populations, where millions of Chinese spend much, if not all, of their time living, working, and studying outside their home provinces. By showing how the Chinese have been populated and their organization throughout history, this manual is the go-to place for professionals, practitioners, and academics working and interested in China's provinces and populations.

China's Regions in an Era of Globalization Tim Summers, 2018-06-19 The rise of China has been shaped and driven by its engagement with the global economy during a period of intensified globalization yet China is a continent sized economy and society with substantial diversity across its different regions This means that its engagement with the global economy cannot just be understood at the national level but requires analysis of the differences in participation in the global economy across China's regions This book responds to this challenge by looking at the development of China's regions in this era of globalization It traces the evolution of regional policy in China and its implications in a global context Detailed chapters examine the global trajectory of what is now becoming known as the Greater Bay Area in southern China the globalization of the inland mega city of Chongqing and the role of China's regions in the globally focused belt and road initiative launched by the Chinese government in late 2013 The book will be of interest to practitioners and scholars engaging with contemporary China's political economy and international relations [China's Provinces and the Belt and Road Initiative](#) Dominik Mierzejewski, 2021-03-30 This book discusses the Belt and Road Initiative at the provincial level in China It analyses the evolution of the role of local governments in Chinese foreign policy since the opening of China's economy in 1978 showing how the provinces initially competed with each other and how the central government was forced to react developing more centralised policies Unlike other books on the Belt and Road Initiative which focus on the international aspects of the initiative this book demonstrates the importance of the Belt and Road in reinforcing China's unitary status and for managing and coordinating development at the local level as well as centre province relations and province to province relations inside China *China's Local Administration* Jae Ho Chung, Tao-chiu Lam, 2009-10-16 The remarkable changes in China over the past three decades are mostly considered at the national level whereas local government which has played and continues to play a key role in these developments is often overlooked The themes of China's local administrative hierarchy and its historical evolution have until now received scant attention this book fills that gap and presents a comprehensive survey of China's local administration from the province down to the township It examines the political and functional definitions and historical origins of the nine local administrative levels or categories in contemporary China the province the centrally administered municipality the ethnic minority autonomous region the special administrative region the deputy provincial city the prefecture the county township and urban district It investigates how each of the different levels of China's local administration has developed historically both before and after 1949 and it explores the functions political and economic that the different levels and units carry out and how their relationships with superior and subordinate units have evolved over time It also discusses how far the post Mao reforms have affected local administration and how the local administrative hierarchy is likely to develop going forward [Hainan - State, Society, and Business in a Chinese Province](#) Kjeld Erik Brødsgaard, 2008-08-27 This book examines the complex relationship between the state society and business in China focusing on the experience of the island province of Hainan This island for many years a

provincial backwater was given provincial rank in 1988 and became the testing ground for experiments of an economic political and social nature that have received great attention from Beijing in particular the small government big society project This book provides a full account of this transition showing how Hainan casts important light on a number of highly topical issues in contemporary China studies central local relations institutional reform state society relations and economic development strategies It provides detailed evidence of how relations between party cadres state bureaucrats businesses foreign investors and civil society play out in practice in China today It argues that despite the liberalization of recent years especially in the economic sphere the party state remains the most powerful actor in Chinese society and that path breaking reform experiments such as in Hainan remain highly vulnerable due to the central government's hesitation to commit the resources and unequivocal political support needed for the experiments to be successfully realized

China's Campaign to 'Open Up the West' David S. G. Goodman, 2004-11-08 The 2004 volume examines the newly adopted Chinese government policy designed to aid the development of China's western regions It considers the political and economic context of the campaign and then examines its potential impact in seven provincial level jurisdictions Xinjiang Qinghai Sichuan Shaanxi Chongqing Yunnan and Guizhou

Locating China Jing Wang, 2007-05-07 Taking a multidisciplinary approach this volume examines the relationship between space and the production of local popular culture in contemporary China The international team of contributors examine the inter relationship between the cultural imaginary of a given place and China's continuing drive towards urbanization This has led to the development of new spaces and places and new forms of spatial practices that destabilize old concepts of the local and locality Delivering ethnographic observations and theoretical speculations this work furthers our understanding of the link between spatial thinking and the production of consumer culture in China

Southwest China in a Regional and Global Perspective (c.1600-1911), 2018-01-03 The book *Southwest China in Regional and Global Perspectives c 1600 1911* is dedicated to important issues in society trade and local policy in the southwestern provinces of Yunnan Guizhou and Sichuan during the late phase of the Qing period It combines the methods of various disciplines to bring more light into the neglected history of a region that witnessed a faster population growth than any other region in China during that age The contributions to the volume analyse conflicts and arrangements in immigrant societies problems of environmental change the economic significance of copper as the most important export product topographical and legal obstacles in trade and transport specific problems in inter regional trade and the roots of modern transnational enterprise
