Rethinking Development:

Rethinking Development Ronaldo Munck, 2021-05-17 Development and underdevelopment are the main determinants of life chances worldwide arguably more so than social class Marxism as the underlying theory for social revolution needs to have a clear understanding of the dynamics of development and social progress Exploring the intersection of Marxism and development this book looks at Marx's original conception of capitalist development and his later engagement with underdeveloped Russia The author also reviews Lenin's early critique of the Russian populists rejection of capitalism compared with his later analysis of imperialism as a brake on development in the non European world The book then considers Rosa Luxemburg who arguably provides a bridge between these theorists and those that follow with her analysis of imperialism as a necessity for capitalism to incorporate non capitalist lands Turning then to the non European world the author examines the Latin American dependency theories the post development school and the recent indigenous development theories advanced by Andean Marxism Finally Munck addresses the relationship between globalization and development Does this relationship suggest that it has not been capitalism but a lack of capitalism that has led to under development Rethinking Development Peter Preston, 2012-07-26 First published in 1987 this volume stresses the importance of development studies for sociology as P W Preston argues that this field of study is emerging from the technical social scientific ghetto back into the mainstream of the classical tradition of social theorizing represented by Marx Weber and Durkheim Preston discusses the position of development studies in relation to the wider group of the social sciences in general and to sociology in particular Using examples mainly from the study of Southeast Asia he looks at the diversity of available modes of social theoretic engagement and considers the work of the colonial administrator scholar the humanist academic scholar and the scholar who theorises on behalf of the planners discusses the mode of political writing and Marxian analyses of development and considers the particular problems surrounding the elites of post colonial nation states Rethinking Development Geographies Marcus Power, 2004-08-02 Development as a concept is notoriously imprecise vague and presumptuous Struggles over the meaning of this fiercely contested term have had profound implications on the destinies of people and places across the globe *Rethinking Development Geographies* offers a stimulating and critical introduction to the study of geography and development In doing so it sets out to explore the spatiality of development thinking and practices The book highlights the geopolitical nature of development and its origins in Empire and the Cold War It also reflects critically on the historical engagement of geographers with the Tropics the Third World and the South The dominant economic and political philosophies that shape the policies and perspectives of major institutions are discussed The interconnections between globalization and development are highlighted through an examination of local national and transnational resistance to various forms of development The text provides an accessible introduction to the complex and confusing world of contemporary global development Informative diagrams cartoons and case studies are used throughout While exploring

global geographies of economic and political change Rethinking Development Geographies is also grounded in a concern with people and places the view from below the views of women and the view from the South

Rethinking Development in East Asia Pietro P. Masina, 2002 Masina reassesses the last thirty years of economic development in East Asia in light of recent dramatic events challenging scholars and policy makers to critically review development strategies

Rethinking Development in Latin America Charles H. Wood, Bryan R. Roberts, 2010-11-01

Rethinking Development Challenges for Public Policy K. Hanson, G. Kararach, T. Shaw, 2012-04-05 Covers topical issues for Africa s development economics and politics of climate change water management public service delivery and delivering aid The authors argue that these issues should be included in the post MDG paradigm and add an important voice to recent moves by academics and practitioners to engage with each other

Rethinking Development in South Asia Farid Uddin Ahamed, M. Saiful Islam, Amir Mohammad Nasrullah, 2022-03-17 This book challenges the way development has been conceptualized and practiced in South Asian context and argues for its deconstruction in a way that would allow freedom choice and greater well being for the local people Far from taking development for granted as growth and advancement this book unveils how development could also be a destructive force to local socio cultural and environmental contexts With a critical examination of such conventional development practices as hegemonic patriarchal devastating and failure it highlights how the rethinking of development could be seen as a matter of practice by incorporating people s interest priorities and participation The book theoretically challenges the conventional notion of hegemonic development and proposes alternative means and practically provides nuances of ethnographic knowledge which will be of great interest to policy planners development practitioners educationists and anyone interested in knowing more about how people think about their own development

Rethinking Development Economics Ha-Joon Chang, 2003 Impressive provides a very good compendium of what are usually classified as heterodox development economics an excellent volume Journal of International Development This important new collection tackles the failure of neoliberal reform to generate longterm growth and reduce poverty in many developing and transition economies As dramatically demonstrated in the collapse of the WTO s Seattle talks there is increasing dissatisfaction in both developing and developed countries with the emerging neoliberal global economic order The resignations of Joseph Stiglitz and Ravi Kanbur from the World Bank emphasize that this disillusionment with the orthodoxy now exists at the very heart of the establishment Yet the increasing demand for an alternative to this orthodoxy is not being met Over the last few decades the older generation of development economists have been edged out of most major universities particularly in the USA The situation in most developing countries is even worse although there is more demand for alternatives to orthodox development economics these countries have even less capability to generate such alternatives Rethinking Development Economics is intended to fill this gap It addresses key issues in development economics ranging from macroeconomics finance and governance to trade industry agriculture and poverty Bringing together some of the foremost names in the field this

comprehensive and timely collection constitutes a critical staging post in the future of development economics

Rethinking Development Politics Ilan Kapoor, Gavin Fridell, 2024-02-12 In this innovative book Ilan Kapoor and Gavin Fridell rethink development politics psychoanalytically investigating its unconscious Whereas mainstream development politics is organized around stability and rationality psychoanalysis points to disharmony and irrationality helping to explain the development subject's often self-defeating behaviour

Rethinking Development David Ernest Apter, 1987-10 Development theory is at a crossroads Such dominant theories as modernization and dependency have run their course Now one of the preeminent political and social theorists of our time offers his view of the direction of the discipline Using major themes such as the relation between development and democracy the problem of innovation and marginality and questions of violence and governability David E Apter offers an innovative comparative study of development Apter provides a new look at development its science romanticism and teleology He persuasively argues that development will generate democracy but not easily Instead of presenting a single dogmatic theory of development he gives scholars and students of political and social change an articulate and fresh view of development Apter was the recipient of the American Political Science Association's Woodrow Wilson Award for Choice and the Politics of Allocation 1971 Most appropriate for upper division honors and graduate audiences Choice A wide-ranging work useful for background thinking in approaching the doctrinal problems of Leninist systems worth the effort required to absorb it Indochina Chronology Apter offers an innovative comparative study of development These essays provide a new look at development its science romanticism and teleology Bulletin of Science Technology Society Among the more useful ideas in this book are Apter's ruminations on the diverse historical origins of terrorism in the French Revolution the characteristics of the terrorist cell organization and a typology of the various expressions of violence Studies in Comparative International Development
