The Future of Unions and Worker Representation Anthony Forsyth, 2022-01-13 This book charts the path to revitalisation for trade unions in Australia the USA the UK and Italy It examines the examples of innovation and digital campaigning that are enabling unions to build new forms of worker power and overcome decades of declining membership wrought by neoliberalism globalisation and hostility from employers and the state The study evaluates the responses of unions in each country to falling membership levels since the 1980s It considers the US organising model and its adoption in Australia and the UK comparing this with the strategies of Italian unions which have been more deliberately focused on precarious and migrant workers The increasing reliance of US unions on community alliances as seen in the Fight for 15 and similar campaigns is scrutinised along with new union prototypes like Hospo Voice in Australia the Independent Workers Union of Great Britain and SI Cobas in Italy The book includes an in depth analysis of union responses to the gig economy in the four countries and the emergence of self organised worker collectives to combat this exploitative business model The vital role played by unions in defending the interests of workers during the COVID 19 pandemic is also examined As well as highlighting the most successful union initiatives to meet the challenges of the past 30 years the book assesses the strengths and deficiencies of the legal framework for union representation in the four nations It identifies the labour law reforms needed to rebuild collectivism but argues that more is needed than favourable laws This cross national study provides a rich basis for identifying the combination of reforms strategies and linkages required to ensure that unions can remain relevant for a new generation of digitally active workers

Women, Violence and Social Change R. Emerson Dobash, Russell P. Dobash, 2003-12-16 Women Violence and Social Change demonstrates how refuges

and shelters stand as the core of the battered women's movement providing a basis for pragmatic support, political action and radical renewal. From this base, movements in Britain and the United States have challenged the police, courts and social services to provide greater assistance to women. The book provides important evidence on the way social movements can successfully challenge institutions of the State as well as salutary lessons on the nature of diverted and thwarted struggle. Throughout the book, the Dobashes years of researching violence against women is illustrated in the depth of their analysis. They maintain the tradition established in their first book *Violence Against Wives* which was widely acclaimed. Where We Live, Work and Play Patrick Novotny, 2000-08-30. Numerous studies have revealed that the poor disproportionately bear the burden of environmental problems in America today. Issues range from higher levels of poisonous wastes, carbon dioxide and ozone to greater than normal incidences of asthma and lead poisoning. The environmental justice movement which has emerged in working class and low income African American and Latino communities since the early 1990s is an effort that is reinterpreting the definition of the environment as where we live, work and play to connect new constituencies traditionally outside of the postwar environmental movement. Novotny documents this expanding constituency through case studies of four community groups ranging from South Central Los Angeles to Louisiana. Environmental racism is understood as yet another type of discrimination which results in a high incidence of environmental concerns in poorer communities due to what many activists see as discriminatory land use practices, decisions by industry that intentionally locate hazardous wastes in these communities and the uneven enforcement of environmental regulations by federal, state and local officials. Community leaders have added environmental causes to their fight against unemployment, impoverishment and substandard housing. This study explores various attempts to put a halt to illegal practices and to broaden public awareness of the issues involved. **Women's Human Rights and the Muslim Question** Rebecca Barlow, 2012-01-02. *Women's Human Rights and the Muslim Question* shows how Muslim women have made meaningful contributions to the development of the international framework on gender equality and women's rights. An investigation into the women's movement of Iran offers a practical grounding for this argument and presents unprecedented findings on how ideological divisions along secular and religious lines have been worked in favour of a rights based framework for change. The book presents a comprehensive synthesis and analysis of the campaign material of the women's movement. *Change for Equality Campaign* one of the most progressive and sophisticated movements in the Middle East. *Central Asia Islamic Studies Series Volume 11*.
