Rights Of Parents In The Education Of Their Children

Marcel A. Müller

Rights Of Parents In The Education Of Their Children:

The Rights of Parents in the Education of Their Children David Schimmel, Louis Fischer, 1977 Children's Rights and the Developing Law Jane Fortin, 2003-04 This text considers the developing law in England and Wales as it applies to the burgeoning and confusing subject of the rights of children It examines the extent to which the emerging legal principles can be harnessed to fulfil those rights **Two Concepts of Rights and the Right to Education** Yuan Zheng, 2025-09-17 Most rights theories hold that the same act of a person or group cannot be driven by both a right and a duty This book introduces the theory of initial rights and derived rights demonstrating that an act is often the result of both The key idea is that individuals and collectives have the right to fulfill their duty However general rights those people are born with do not originate from any duty meaning their choices are not dictated by duties As a result access to education is a right not a duty The theory of initial and derived rights can extend beyond education to explain broader social dynamics such as the relationship between government and citizens This book applies the theory to various contexts including children's education civic and moral education school student relationships and teacher student interactions It explores how absolute rights relate to general rights how the right to education connects to the right to establish private schools and how opportunities for choice are linked to rights While this is an abstract theoretical study it offers practical insights for schools and teachers The book will be of interest to researchers and students of rights theories and the philosophy of education as well as educators

Encyclopedia of Early Childhood Education Doris Pronin Fromberg, Leslie R. Williams, 2012-05-23 This Encyclopedia is a reference work about young children in the USA designed for use by policy makers community planners parents of young children teacher and early childhood educators programme and school administrators among others The field of early childhood education has been affected by changes taking place in the nation's economy demographics schools communities and families that influence political and professional decisions These diverse historical political economic socio cultural intellectual and educational influences on early childhood education have hindered the development of a clear definition of the field The Encyclopedia provides an opportunity to define the field against the background of these influences and relates the field of early childhood education to its diverse contexts and to the cultural and technological resources currently affecting it

Resources in Education ,2000 *NGOs and Human Rights* Charity Butcher, Maia Carter Hallward, 2021-06-15 This study examines and compares the important work on global human rights advocacy done by religious NGOs and by secular NGOs By studying the similarities in how such organizations understand their work we can better consider not only how religious and secular NGOs might complement each other but also how they might collaborate and cooperate in the advancement of human rights However little research has attempted to compare these types of NGOs and their approaches NGOs and Human Rights explores this comparison and identifies the key areas of overlap and divergence In so doing it lays the groundwork for better understanding how to capitalize on the strengths of religious groups

especially in addressing the world's many human rights challenges. This book uses a new dataset of more than three hundred organizations affiliated with the United Nations Human Rights Council to compare the extent to which religious and secular NGOs differ in their framing, discussion, and operationalization of human rights work. Using both quantitative analysis of the extensive data collected by the authors and forty-seven in-depth interviews conducted with members of human rights organizations in the sample, Charity Butcher and Maia Carter Hallward analyze these organizations' approaches to questions of culture, development, women's rights, children's rights, and issues of peace and conflict. *Children's Rights and Traditional Values* Gillian Douglas, Leslie Sebba, 2016-12-05. This book of essays by legal scholars from the United Kingdom, Ireland, Israel, and Palestine explores the extent to which the recognition of the concept of children's rights is affected by adherence to religious, cultural, and ethnic traditions. The aim is twofold: first, to illuminate the interface between internationally agreed norms of conduct regarding children and national and cultural determination to preserve traditional approaches; and secondly, to reflect upon the conflicts within societies between different cultural and religious groups in their attempts to determine whether liberal, secular, or conservative religious norms predominate in attitudes to children's upbringing. This is the first collection of papers covering and comparing the UK and Israeli/Palestinian jurisdictions. The particular blends of social, religious, and cultural diversity in both regions, mingled with the political factors operating as well, render these jurisdictions of special interest as case studies in the reception of western liberal norms and values. Moreover, Israel and Palestine, despite their manifestly different cultures as compared with Britain, have been influenced by the colonial legacy of the common law, rendering this particular east-west comparison of special interest. **Freedom from Religion and Human Rights Law** Marika McAdam, 2017-11-14. Although human rights belong to all persons on the basis of their humanity, this book demonstrates that in the practice of international human rights law, the freedom to be non-religious or atheist does not receive the same protection as the freedom to be religious. Despite the claimed universality of freedom of religion and belief contained in article 18 of the International Covenant on Civil and Political Rights, the key assertion made is that there is a hierarchy of religion and belief, with followers of major established religions enjoying high protection and low regulation at the top, and atheists and non-believers enduring high persecution and weaker protection at the bottom. The existence of this hierarchy is proven and critiqued through three case study chapters that respectively explore the extent to which non-religious and atheist rights holders enjoy freedom from proselytism, freedom from hate, and freedom from the religions of their parents. *Child Abuse, Family Rights, and the Child Protective System* Stephen M. Krason, 2013-07-05. The child protective system (CPS) shaped by federal law forty years ago and run on the state and county levels in the United States, offered in utopian fashion the hope of preventing all possible child abuse or neglect. In response, legislators enacted a spate of vague laws that poorly defined such categories as abuse and neglect and granted the CPS sweeping powers to intrude into families, often on the basis of nothing more than anonymous complaints about standard childrearing practices. This

arrangement which followed from the questionable assertion of the existence of a crisis of child abuse and neglect became the basis in theory for the universal monitoring of American families that has resulted in the sharp curtailing of parental rights and responsibilities. With overreaching by local and state governments into family affairs the current CPS has not only damaged untold numbers of families but also undercut the legitimacy of parental authority through the continuous threat to parents of child removal. In *Child Abuse Family Rights and the Child Protective System: A Critical Analysis* from Law, Ethics and Catholic Social Teaching, Stephen M. Krason gathers essays by leading scholars and practitioners to comment through the prism of Catholic social thought on the plight afflicting American families and the role of the child protective system. Here readers will find critical essays on the deleterious effect of the 1974 passage of the Child Abuse Prevention and Treatment Act, assessments of current American policies on child abuse and neglect and the role of the CPS within the context of prevailing international human rights principles and Catholic social teaching, a survey of the enforcement of CPS policies from a legal and constitutional perspective, research data disputing the CPS principle that all parents are potential abusers and illustrating the greater prevalence of abuse and neglect in broken, blended and untraditional families, and arguments for poverty and unemployment as the prime culprits in the mistreatment of children. Also included are the amicus curiae briefs that the Society of Catholic Social Scientists submitted in two U.S. Supreme Court cases on parental rights, the CPS and state control over the family. *Child Abuse Family Rights and the Child Protective System* should appeal to a variety of professionals as well as scholars from family court attorneys, social workers, family counselors and clergy to researchers in the fields of social work, law, family studies, American politics, sociology, human services, counseling and psychology and education as well as public officials.

The UN Convention on the Rights of the Child John Tobin, 2019-03-28. The United Nations Convention on the Rights of the Child is the most extensive and widely ratified international human rights treaty. This Commentary offers a comprehensive analysis of each of the substantive provisions in the Convention and its Optional Protocols on Children and Armed Conflict and the Sale of Children, Child Prostitution and Pornography. It provides a detailed insight into the drafting history of these instruments, the scope and nature of the rights accorded to children and the obligations imposed on states to secure the implementation of these rights. In doing so, it draws on the work of the Committee on the Rights of the Child, international, regional and domestic courts, academic and interdisciplinary scholarly analyses. It is of relevance to anyone working on matters affecting children, including government officials, policy makers, judicial officers, lawyers, educators, social workers, health professionals, academics, aid and humanitarian workers and members of civil society.
