Rings And Radicals:

Rings and Radicals N. J. Divinsky, 1965 *Rings and Radicals* R. Wiegandt, J. W. Gardner, Shao-Xue Liu, 1996-04-18
First published in 1996 Routledge is an imprint of Taylor Francis an informa company **Algebras, Rings and Modules**
Michiel Hazewinkel, Nadiya Gubareni, V. V. Kirichenko, 2006-01-18 Associative rings and algebras are very interesting
algebraic structures In a strict sense the theory of algebras in particular noncommutative algebras originated
from a single example namely the quaternions created by Sir William R Hamilton in 1843 This was the
first example of a noncommutative number system During
the next forty years mathematicians introduced other examples of noncommutative algebras began to bring some order into them
and to single out certain types of algebras for special attention Thus low dimensional algebras division algebras and
commutative algebras were classified and characterized The first complete results in the structure theory of associative
algebras over the real and complex fields were obtained by T Molien E Cartan and G Frobenius Modern ring theory began
when J H Wedderburn proved his celebrated classification theorem for finite dimensional semisimple algebras over arbitrary fields
Twenty years later E Artin proved a structure theorem for rings satisfying both the ascending and descending chain condition
which generalized Wedderburn structure theorem The Wedderburn Artin theorem has since become a cornerstone of
noncommutative ring theory The purpose of this book is to introduce the subject of the structure theory of associative rings
This book is addressed to a reader who wishes to learn this topic from the beginning to research level We have tried to write
a self contained book which is intended to be a modern textbook on the structure theory of associative rings and related
structures and will be accessible for independent study **Rings and Radicals** N. J. Divinsky, 1965 **Rings and**
