Ripas Iconologia Quellen Methode Ziele:

The Routledge Companion to Medieval Iconography Colum Hourihane, 2016-12-19 Sometimes enjoying considerable favor sometimes less iconography has been an essential element in medieval art historical studies since the beginning of the discipline Some of the greatest art historians including M le Warburg Panofsky Morey and Schapiro have devoted their lives to understanding and structuring what exactly the subject matter of a work of medieval art can tell Over the last thirty or so years scholarship has seen the meaning and methodologies of the term considerably broadened This companion provides a state of the art assessment of the influence of the foremost iconographers as well as the methodologies employed and themes that underpin the discipline The first section focuses on influential thinkers in the field while the second covers some of the best known methodologies the third and largest section looks at some of the major themes in medieval art Taken together the three sections include thirty eight chapters each of which deals with an individual topic An introduction historiographical evaluation and bibliography accompany the individual essays The authors are recognized experts in the field and each essay includes original analyses and or case studies which will hopefully open the field for future research *Rípa's Iconologia*

Gerlind Werner, 1977 **An Introduction to Iconography** Roelof van Straten, 2012-10-02 Available for the first time in English An Introduction to Iconography explains the ways that artists use references and allusions to create meaning The book presents the historical theoretical and practical aspects of iconography and ICONCLASS the comprehensive iconographical indexing system developed by Henri van de Waal It gives particular emphasis to the history of iconography personification allegory and symbols and the literary sources that inform iconographic readings and includes annotated bibliographies of books and journal articles from around the world that are associated with iconographic research The author of numerous articles and a four volume reference work on Italian prints Roelof van Straten is currently working on an iconographic index covering the prints of Goltzius and his school **Personification** Walter Melion, Bart

Ramakers, 2016-03-11 Personification or prosopopeia the rhetorical figure by which something not human is given a human identity or face is readily discernible in early modern texts and images but the figure's cognitive form and function its rhetorical and pictorial effects have rarely elicited sustained scholarly attention The aim of this volume is to formulate an alternative account of personification to demonstrate the ingenuity with which this multifaceted device was utilized by late medieval and early modern authors and artists in Italy France England Scotland and the Low Countries Personification is susceptible to an approach that balances semiotic analysis focusing on meaning effects and phenomenological analysis focusing on presence effects produced through bodily performance This dual approach foregrounds the full scope of prosopopoeic discourse not just the what but also the how not only the signified but also the signifier [Encyclopedia of the History of Classical Archaeology](#) Nancy Thomson de Grummond, 2015-05-11 With 1 125 entries and 170 contributors this is the first encyclopedia on the history of classical archaeology It focuses on Greek and Roman material but also covers the

prehistoric and semi historical cultures of the Bronze Age Aegean the Etruscans and manifestations of Greek and Roman culture in Europe and Asia Minor The Encyclopedia of the History of Classical Archaeology includes entries on individuals whose activities influenced the knowledge of sites and monuments in their own time articles on famous monuments and sites as seen changed and interpreted through time and entries on major works of art excavated from the Renaissance to the present day as well as works known in the Middle Ages As the definitive source on a comparatively new discipline the history of archaeology these finely illustrated volumes will be useful to students and scholars in archaeology the classics history topography and art and architectural history

Jordaens Zita Pataki, Birgit Münch, 2012-06-01 16 essays by a group of internationally acclaimed authors help contribute to a clearer perception of the complex facets of Jacob Jordaens oeuvre and moreover to distinguish it from the works of Rubens van Dyck and his contemporaries The title Genius of Grand Scale refers to the spectrum from history to genre as well as to Jordaens preference for large formats The greatness of the artist Jacob Jordaens needs to be emphasized since even though he outlived Rubens for four whole decades he was never able to escape from under his shadow By reference to iconographic and iconological studies single works are identified and presented in a broad review and the long in many aspects fragmentary reception of his artistic work also forms a large part of the interpretations presented here Furthermore technical examinations of paintings assist in defining more precisely how they were generated This overdue volume presents essential reading for anyone interested in Jacob Jordaens

Images** James Elkins,2018-08-06 In the domain of visual images those of fine art form a tiny minority This original and
brilliant book calls upon art historians to look beyond their traditional subjects painting drawing photography and
printmaking to the vast array of nonart images including those from science technology commerce medicine music and
archaeology Such images James Elkins asserts can be as rich and expressive as any canonical painting Using scores of
illustrations as examples he proposes a radically new way of thinking about visual analysis one that relies on an object's own
internal sense of organization Elkins begins by demonstrating the arbitrariness of current criteria used by art historians for
selecting images for study He urges scholars to adopt instead the far broader criteria of the young field of image studies
After analyzing the philosophic underpinnings of this interdisciplinary field he surveys the entire range of images from
calligraphy to mathematical graphs and abstract painting Throughout Elkins blends philosophic analysis with historical detail
to produce a startling new sense of such basic terms as pictures writing and notation
