Rituals and Music in Europe Daniel Burgos, 2024-06-14 This book explores modern European religious and non religious rituals and their main features by focusing on music as a key element required for the full expression of beliefs. It specifically examines the relationship between religious non religious pagan cultural celebratory and traditional rituals. In doing so this text focuses on the extent to which the rituals overlap replace or feed religious or pseudo religious beliefs to create alternative beliefs individual or collective that systematically ignore any religion. The book further analyses the relationship between daily habits holidays sports politics culture and other pagan rituals as forms that represent social feelings by identifying enjoying or impersonating emotions and transversally it explores how music facilitates and fosters those emotions. The volume also investigates how rituals coexist and mutually influence each other through a representation of religious and non religious rituals and how music plays a central role in that phenomenology. The author argues that music is a key part of various types of rituals e.g. rites of passage and that music supports and enriches the meaning of the ritual to ultimately strengthen the bond of communication with the individual and the group. This monograph appeals to students and researchers working in religious studies and in music theory.

Sonic Liturgy Guy L. Beck, 2012-12-12 *Sonic Liturgy: Ritual and Music in Hindu Tradition* builds on the foundation of Guy L. Beck's earlier work which described the theoretical role of sound in Hindu thought. *Sonic Liturgy* continues the discussion of sound into the realm of Hindu ritual and musical traditions of worship. Beginning with the chanting of the Sama Veda alongside the fire sacrifices of the ancient Indo Aryans and with the classical Gandharva music as outlined in the musicological texts of Bharata and Dattila, Beck establishes a historical foundation for an in depth understanding of the role of music in the early Puja rituals and Indian theater in the vernacular poetry of the Bhakti movements in medieval temple worship of Siva and Vishnu in southern India and later in the worship of Krishna in the northern Braj region. By surveying a multitude of worship traditions, Beck reveals a continuous template of interwoven ritual and music in Hindu tradition that he terms sonic liturgy, a structure of religious worship and experience that incorporates sound and music on many levels. In developing the concept and methods for understanding the phenomenon of sonic liturgy, Beck draws from liturgical studies and ritual studies, broadening the dimensions of each as well as from recent work in the fields of Indian religion and music. As he maps the evolution of sonic liturgy in Hindu culture, Beck shows how parallel to the development of religious ritual from ancient times to the present, there is a less understood progression of musical form beginning with Vedic chants of two to three notes to complicated genres of devotional temple music employing ragas with up to a dozen notes. *Sonic liturgy* in its maturity is

manifest as a complex interactive worship experience of the Vaishnava sects presented here in Beck's final chapters

The Routledge Handbook of Research Methods in the Study of Religion Steven Engler, Michael Stausberg, 2021-11-29 This substantially revised second edition of *The Routledge Handbook of Research Methods in the Study of Religion* remains the only comprehensive survey in English of methods and methodology in the discipline. Designed for non-specialists and upper undergraduate/graduate level students, it discusses the range of methods currently available to stimulate interest in unfamiliar methods and enable students and scholars to evaluate methodological issues in research. The Handbook comprises 39 chapters, 21 of which are new and the rest revised for this edition. A total of 56 contributors from 10 countries cover a broad range of topics divided into three clear parts: Methodology, Methods, Techniques. The first section addresses general methodological issues including comparison, research design, research ethics, intersectionality and theorizing analysis. The second addresses specific methods including advanced computational methods, autoethnography, computational text analysis, digital ethnography, discourse analysis, experiments, field research, grounded theory, interviewing, reading images, surveys and videography. The final section addresses specific techniques including coding, focus groups, photo elicitation and survey experiments. Each chapter covers practical issues and challenges, theoretical bases and their use in the study of religion, illustrated by case studies. *The Routledge Handbook of Research Methods in the Study of Religion* is essential reading for students and researchers in the study of religion, as well as for those in related disciplines.
