Ritual And Religion In The Making Of Humanity:

Ritual and Religion in the Making of Humanity Roy A. Rappaport, 1999-03-25 Roy Rappaport argues that religion is central to the continuing evolution of life although it has been displaced from its original position of intellectual authority by the rise of modern science His book which could be construed as in some degree religious as well as about religion insists that religion can and must be reconciled with science Combining adaptive and cognitive approaches to the study of humankind he mounts a comprehensive analysis of religion s evolutionary significance seeing it as co extensive with the invention of language and hence of culture as we know it At the same time he assembles the fullest study yet of religion s main component ritual which constructs the conceptions which we take to be religious and has been central in the making of humanity s adaptation The text amounts to a manual for effective ritual illustrated by examples drawn from anthropology history philosophy comparative religion and elsewhere Ritual and Religion in the Making of Humanity ,2001 Ritual and Religion in the Xunzi T. C. Kline III,Justin Tiwald,2014-06-12 Xunzi a founding figure in the Confucian tradition is one of the world s great philosophers and theorists of religion For much of the last century his work has been seen largely as critical of religion particularly the popular beliefs and invocations of supernatural forces that underpin so many religious rituals Contributors to this volume challenge this view and offer a more sophisticated picture of Xunzi He emerges not as critic but rather as an adherent of religion who seeks to give religious practices meaning even though many religious beliefs are mistaken or self serving Each essay offers a powerful illustration of Xunzi as both a religious devotee and as a philosopher of religion drawing on a wide array of disciplines and methodologies **Whenever They Prayed** Rodney A. Werline,2021-10-11 In *Whenever They Prayed* Dimensions of New Testament Prayer Rodney A Werline shifts the scholarly approach to New Testament prayer from source and genre analyses to seeing prayer as a cultural practice bringing new dimensions of the prayers to light Assisted by ritual theorists such as Catherine Bell Pierre Bourdieu Talal Assad and Roy Rappaport Werline illuminates the genius of the New Testament authors and the members of their communities Through years of embodied practice these authors and members acquired an aptitude that humans uniquely possess the ability through ritual practice to navigate and maintain their relationships with one another and together with their God Werline especially focuses on how their actions brought cultural memory to life assisted in receiving revelations protected them from demonic powers and established and fulfilled their obligations to one another and to that God The full import of these observations however is not possible without placing the prayers within their Second Temple Jewish context Jewish prayers outside the New Testament should not function as mere background but as evidence of a grand cultural enterprise taking place in which members of the early church actively participated *Religion as a Human Capacity* Timothy Light,Brian C. Wilson,2018-08-14 Prepared in honor of E Thomas Lawson the essays in *Religion as a Human Capacity* represent diverse points of view in the study of religion today Part I Theoretical Studies offers a broad range of cognitivist theoretical

explorations while Part II Studies in Religious Behavior presents cutting edge applications of cognitive and other contemporary theories to religious data This volume celebrates Lawson s critical contributions to cognitive studies of religion and the degree to which his ultimate goal of scholarship as a search for truth is matched by those who have been his colleagues and been influenced by him Religion as a Human Capacity will be of interest to all those concerned with theory and method in the academic study of religion

Magical Thinking Stuart McWilliams,2011-12-08 Examining how scholarly writing has contended or conspired with discourses of enchantment from the Middle Ages to the present

The Oxford Handbook of Early Christian Ritual Rikard Roitto,2018-10-31 Scholars of religion have long assumed that ritual and belief constitute the fundamental building blocks of religious traditions and that these two components of religion are interrelated and interdependent in significant ways Generations of New Testament and Early Christian scholars have produced detailed analyses of the belief systems of nascent Christian communities including their ideological and political dimensions but have by and large ignored ritual as an important element of early Christian religion and as a factor contributing to the rise and the organization of the movement In recent years however scholars of early Christianity have begun to use ritual as an analytical tool for describing and explaining Christian origins and the early history of the movement Such a development has created a momentum toward producing a more comprehensive volume on the ritual world of Early Christianity employing advances made in the field of ritual studies The Oxford Handbook of Early Christian Ritual gives a manifold account of the ritual world of early Christianity from the beginning of the movement up to the fifth century The volume introduces relevant theories and approaches central topics of ritual life in the cultural world of early Christianity and important Christian ritual themes and practices in emerging Christian groups and factions

Death Rituals and Politics in Northern Song China Mihwa Choi,2017 This study examines how political and legal disputes regarding the performance of death rituals contributed to shape a revival of Confucianism in eleventh century Northern Song China

An Archaeology of Religion Kit W. Wesler,2012-04-20 Archaeologists have been increasingly turning their attention to the study of religion but the field so far has lacked a cross cultural overview This text challenges archaeological conventions by refusing to respect the geographic and temporal boundaries with which archaeologists too often define their field Worldwide in range and comparative in perspective this exploration is guided by

several fundamental questions how do we recognize religion in the archaeological record When should we recognize the first activities we call religious What distinguishes a world religion How can we see the formations of modern world religions in the archaeological record An Archaeology of Religion begins with the first glimmers of what might be considered religious expression in the Paleolithic period and concludes with the complexities of world religions today This book is an ambitious attempt to survey how scholars approach the identification of religious sites and practices in the archaeological record
