field as a whole from the historical and geographical perspectives that have influenced its development and current characteristics to aspects of museology and conservation and from materials and technology as evidenced in domestic architecture and religious and funerary items to textual and iconographic approaches to Egyptian culture. Authoritative yet accessible, it serves not only as an invaluable reference work for scholars and students working within the discipline but also as a gateway into Egyptology for classicists, archaeologists, anthropologists, sociologists, and linguists.

Jewish Literacy in Roman Palestine Catherine Hezser, 2001. Since Judaism has always been seen as the quintessential religion of the book, a high literacy rate amongst ancient Jews has usually been taken for granted. Catherine Hezser presents the first critical analysis of the various aspects of ancient Jewish literacy on the basis of all of the literary, epigraphic, and papyrological material published so far. Thereby, she takes into consideration the analogies in Graeco-Roman culture and models and theories developed in the social sciences. Rather than trying to determine the exact literacy rate amongst ancient Jews, she examines the various types, social contexts, and functions of writing and the relationship between writing and oral forms of discourse. Following recent social anthropological approaches to literacy, the guiding question is: who used what type of writing for which purpose? First, Catherine Hezser examines the conditions which would enable or prevent the spread of literacy, such as education and schools, the availability and costs of writing materials, religious interest in writing and books, the existence of archives and libraries, and the question of multilingualism. Afterwards, she looks at the different types of writing, such as letters, documents, miscellaneous notes, inscriptions, and graffiti, and literary and magical texts, until she finally draws conclusions about the ways in which the various sectors of the populace were able to participate in a literate society.

The Temple of Ramesses II in Abydos Ogden Goelet, Sameh Iskander, 2022-04-12. Of all the enormous monuments throughout Egypt and Nubia, that of Ramesses II the Great (ca. 1279-1212 BCE) left behind his temple at Abydos, built early in his reign, stands as one of his most elegant, with its simple architectural layout and dramatic and graceful painted relief scenes. Though best known for its dramatic reliefs depicting the battle of Kadesh, the temple also offers a wealth of information about religious and social life in ancient Egypt. It reflects, for example, the strenuous efforts of the early Ramessides to reestablish the Osiris cult in Egypt and particularly at Abydos in the aftermath of the Amarna period. Building on the comprehensive photographic and epigraphic documentation of the temple presented in *The Temple of Ramesses II at Abydos* (volumes 1: Wall Scenes and 2: Pillars, Niches, and Miscellanea; volume 3: Architectural and Inscriptional Features), this book offers a detailed analysis of the overall architectural layout and decorative program of the temple and its symbolism. This discussion approaches the religious history of the site through its archaeology, its inscriptions (both planned and secondary graffiti), and its situation in the complex religious landscape of Abydos. Of particular interest are the temple's role as a staging point for the great Osiris Festival and its procession among the most important of all ritual events in the Egyptian religious calendar during the Ramesside period, the promotion of an active, unbound form of Osiris, and the evidence for important cult activities that took

place on the rooftop of the temple the presence of which is documented today by the staircase that accessed it from Court B
