### **Romney Marsh Survival On A Frontier:**

*Romney Marsh* Jill Eddison, 2000-08-01 With numerous illustrations this book will delight and inform anyone interested in Romney Marsh or in changing coastlines or sea levels      **Romney Marsh** Jill Eddison, 2000 It brings together the recent work of archaeologists historians and geographers and presents an up to date interpretation of the area With numerous illustrations many in full colour this book will delight and inform anyone interested in Romney Marsh or in changing coastlines or sea levels      **Maritime Kent Through the Ages** Stuart Bligh, Sheila Sweetinburgh, Elizabeth Clare

Edwards, 2021 A wide ranging history of the geography and communities of Kent from the earliest times to the present day Kent with its long coastline and its important geopolitical position close to London and continental Europe and on major trading routes between Britain and the wider world has had a very significant maritime history This book covers a wide range of topics relating to that history from the earliest times to the present day It sets Kent's varied coastline and waters in their geological and geographical context showing how erosion and sediment deposition have contributed to the changing nature of maritime activities and populations It examines Kent's strategic role in the defence of the country with the development and redevelopment of coastal defences including four naval dockyards It goes on to consider the supporting industries which grew up around the coastline those which supplied raw materials and agricultural products from the county's hinterland and its wider national and international trading links It also discusses the diverse coastal communities of Kent and how they have changed in response to the demands of defence trade and changing population and migration patterns In addition the book includes detailed case studies which explore particular subject areas as exemplars of the major themes covered by the book

**Dungeness and Romney Marsh** Antony Long, Martyn Waller, Andrew J. Plater, 2007-09-20 The Romney Marsh Dungeness Foreland depositional complex comprises an extensive tract of marshland and associated sand and gravel barrier deposits located in the eastern English Channel This monograph presents the results of a programme of palaeoenvironmental investigation aimed at improving our understanding of this internationally significant coastal landform The focus is on the evidence for landscape change during the late Holocene from c 3000 BC onwards and on identifying the local regional and global driving mechanisms responsible for the changes observed The research details the results from two related projects each funded as part of English Heritage's Aggregate Levy Sustainability Fund scheme The first project concerns the late Holocene evolution of the port of Rye located in the southeast part of the complex and the second the depositional history of the gravel foreland Topics explored include the vegetation and land use history of the study area methodological issues relating to the collection and interpretation of radiocarbon dates from coastal lowlands the role of compaction in influencing landscape and sea level change and the effects of medieval storms on coastal flooding and landscape change This monograph is intended for students and researchers interested in Holocene coastal evolution and sea level change coastal vegetation history and land use history and the development of new techniques for reconstructing past environmental change in coastal

lowlands

**Medieval Adaptation, Settlement and Economy of a Coastal Wetland** Luke Barber, Greg

Priestley-Bell, 2008-10-08 Romney Marsh is the largest coastal lowland on the south coast of England. Since 1991 excavations in advance of gravel extraction around Lydd on Romney Marsh have uncovered large areas of medieval landscape, one of the largest to be exposed in southern England. Features uncovered include 12th-13th century drainage ditches, ditched field systems and sea defences. Also of particular significance is the identification of a series of occupation sites and their enclosures. The excavation of dispersed settlements is particularly difficult because of the scale of work required to produce meaningful results. In this case it has been possible to work on sufficiently large areas to allow significant conclusions to be drawn. The excavations at Lydd Quarry have shown how dispersed settlement existed alongside the nucleated market settlements on Romney Marsh. This extensive report details the archaeological investigations of the field systems and occupation sites, finds and environmental material. There is also a section by Sheila Sweetinburgh on the documentary evidence. Two final chapters set out broader conclusions from the evidence for the field systems, settlements and economy and set the area in its wider context. The research has provided an unprecedented opportunity to study reclamation, occupation and economy of a large tract of marginal landscape through a considerable period of time. **England's**

**Medieval Navy, 1066-1509** Susan Rose, 2013-10-06 Rose looks at every aspect of English naval power in the Medieval period, an excellent study of a somewhat neglected period of English naval history. History of War: We are accustomed to think of England in terms of Shakespeare's precious stone set in a silver sea, safe behind its watery ramparts with its naval strength resisting all invaders. To the English of an earlier period, from the 8th to the 11th centuries, such a notion would have seemed ridiculous. The sea rather than being a defensive wall was a highway by which successive waves of invaders arrived, bringing destruction and fear in their wake. Deploying a wide range of sources, this new book looks at how English kings after the Norman Conquest learnt to use the Navy of England, a term which at this time included all vessels, whether Royal or private, and no matter what their ostensible purpose to increase the safety and prosperity of the kingdom. The design and building of ships and harbour facilities, the development of navigation, ship handling and the world of the seaman are all described, while comparisons with the navies of England's closest neighbours, with particular focus on France and Scotland, are made and notable battles including the Battle of Damme, the Battle of Dover Sluys and the Battle of La Rochelle are included to explain the development of battle tactics and the use of arms during the period. The author shows in this lucid and enlightening narrative how the unspoken aim of successive monarchs was to begin to build the wall of England, its naval defences, with a success which was to become so apparent in later centuries.

**Farming in the First Millennium AD** P. J. Fowler, 2002-11-14 Peter Fowler has written an authoritative

account of farming in Britain in the first millennium AD. This is the first synthesis of our knowledge on this topic for a generation. Successive chapters assemble and analyse the latest evidence on farms, fields, technology, food, diet and society. New interpretations are offered on subjects ranging from implements to illuminated manuscripts and evidence drawn from

Northern England Scotland and Wales contributes significantly to the story The book concludes with a magisterial review of the ways in which agriculture shaped early Britain s societies and landscapes It also proposes a chronological model of British agriculture for the whole millennium

**Making Sense of an Historic Landscape** Stephen Rippon,2012-07-12 This volume explores how the archaeologist or historian can understand variations in landscapes Making use of a wide range of sources and techniques including archaeological material documentary sources and maps Rippon illustrates how local and regional variations in the historic landscape can be understood

**The Oxford Handbook of Wetland Archaeology** Francesco Menotti,Aidan O'Sullivan,2013 This Handbook sets out the key issues and debates in the theory and practice of wetland archaeology which has played a crucial role in studies of our past Due to the high quantity of preserved organic materials found in humid environments the study of wetlands has allowed archaeologists to reconstruct people s everyday lives in great detail

**Medieval Pirates** Jill Eddison,2013-09-02 In the Medieval Period the English Channel was a particularly perilous stretch of water It had two distinct and often conflicting functions as a rich commercial seaway on which the rising economy of the Western world depended and secondly as a wide lawless political frontier between two belligerent monarchies whose kings encouraged piracy as a cheap alternative to warfare and enjoyed their own cut Pirates prospered They stole ships and cargoes at sea or in port and they carried out long lasting vendettas against other groups They ransomed the richest of their captives but tipped innumerable sailors overboard While kings were ambivalent foreign relations were imperilled and although it was briefly quelled by Henry V piracy was never defeated during this turbulent epoch Breaking new ground on a subject that remains topical today Jill Eddison explores medieval piracy as it waxed and waned setting dramatic life stories against the better known landmarks of history
