

SCIENTIFIC INQUIRY

by Susan Blackaby

Scientists are like explorers,
using what they know and see
to blaze a trail that, step by step,
will lead to new discoveries:

Formulate, distill and focus,
narrow down, define the gist,
determine scope and pinpoint locus—
this is your **hypothesis**.

Gather all the stuff you need,
to put in play the machinations.
Document the happenings—
these comprise your **observations**.

What things change and what things stick?
Record the outcomes and effects.
Don't presume and don't predict—
collect the **data**: just the facts.

Combine the concrete things you see
with what you know and trials you test.
Interpretation is the key—
results are where you end the quest.

Scientific Poetry

Robert Hunt

Scientific Poetry:

The poetry of science; or, Studies of the physical phenomena of nature Robert Hunt, 1854 **Scientific Poetry are We Curious? Let Us See.** W. E. E. Olivus, 2017-05 Scientific poetry is a book series being offered as an educational tool designed to align our thoughts and desires with the truth A collection of simple definitions thought provoking questions and non traditional poetry for use as a framework to record our unique set of personal experience The author reminds us that it is this complexly unique set of experience that gives us our style our flavor our value Scientific poetry was written from the standpoint of care as it is defined within this framework While your experience will be as unique as you are the intent is to facilitate a healthful mentality through the development of understanding for both us the reader and the environment in which we live *The Poetics of Scientific Investigation in Seventeenth-Century England* Claire Preston, 2015-12-17 The writing of science in the period 1580 1700 is artfully diffidently carelessly boldly and above all self consciously literary The Poetics of Scientific Investigation in Seventeenth Century English Literature considers the literary textures of science writing its rhetorical figures neologisms its uses of parody romance and various kinds of verse The experimental and social practices of science are examined through literary representations of the laboratory of collaborative retirement of virtual epistolary conversation and of an imagined paradise of investigative fellowship and learning Claire Preston argues that the rhetorical generic and formal qualities of scientific writing are also the intellectual processes of early modern science itself How was science to be written in this period That question which piqued natural philosophers who were searching for apt conventions of scientific language and report was initially resolved by the humanist rhetorical and generic skills in which they were already highly trained At the same time non scientific writers enthralled by the developments of science were quick to deploy ideas and images from astronomy optics chemistry biology and medical practices Practising scientists and inspired laymen or quasi scientists produced new adjusted or hybrid literary forms often collapsing the distinction between the factual and the imaginative between the rhetorically ornate and the plain Early modern science and its literary vehicles are frequently indistinguishable scientific practice and scientific expression mutually involved Among the major writers discussed are Montaigne Bacon Donne Browne Lovelace Boyle Sprat Oldenburg Evelyn Cowley and Dryden **Poetry and Cosmogony** Chris Andrews, 2023-11-20 Faux Titre est une collection d'études en littérature française Depuis cinquante ans d'ailleurs elle offre une sélection d'essais de haute envergure couvrant l'ensemble du domaine de la recherche littéraire de la littérature médiévale jusqu'à l'extrême contemporain La collection offre également une plateforme pour de nouvelles pistes de recherche comme les études de traduction les littératures minoritaires les études du genre et queer l'écologie les sciences humaines médiévales études hispaniques études transatlantiques études de réseaux et sciences sociales ainsi que des réflexions sur les études en littérature française en tant que discipline Faux Titre is a longstanding book series for state of the art research in the field of French language literature Besides the more classical research in French literature covering the field of Medieval Studies to XXIth

Herder and Scientific Thought H. B. Nisbet, 1970 Shortened version of Herder and the Philosophy and History of Science Encyclopedia of Literature and Science Pamela Gossin, 2002-08-30 Science and literature have always been strange bedfellows Like puzzle pieces they fit because they are different Some of the greatest works of world literature have been inspired by the marvels of the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A-Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

Science and Other Poems Alison Hawthorne Deming, 1994-03-01 I greatly admire Alison Deming's lucid and precise language her stunning metaphors her passion her wild and generous spirit her humor her formal cunning I am taken as all readers will be by the knowledge she displays and how she puts this knowledge to a poetic use but I am equally taken I am more taken by the wisdom that lies behind the knowledge I am amazed and delighted by her authority and tenacity She is of this world she lives in it and for better or worse it is the world she settles for and she understands that even if she must rage a little and sometimes more than a little she is one of its citizens Like every original poet she appears to have sprung full blown out of Zeus' head I want to say but Aphrodite is here as well as Athena the ocean as well as the mountain I congratulate her on this fine book Gerald Stern Alison Hawthorne Deming brings to her first collection of verse the kinds of scrupulous observation and clear-eyed analysis that characterize scientific inquiry as well as a poet's eye for the telling moment *Science and Other Poems* establishes astonishing parallels between the mute inexorable processes of the physical universe and the dark mysteries of the human heart parallels so clearly wrought and convincing that we wonder why we had not recognized them before *Caffe Trieste* lays bare the unexamined terror and sorrow that underlie the proliferation of faux fifties kitsch then strips the veil of spacious grace from the decade and reveals it as it was

for those who lived it bombs spread like bacteria on culture plates when the cost of a family staying together might be Stelanize and high voltage erasures They re just American all shine and no pain In the chilling Alliance Ohio a mother and daughter suddenly find themselves stranded in a world of predators a poisonous world charged with sexual threat where every smile every gesture drips with sly menace Yet moments of dislocation can also be cause for rejoicing as when a speaker after surprising a bat in the house is moved to rapture by the sight of the night sky Every page of *Science and Other Poems* is alive with startling juxtapositions eerie parallels abrupt shifts of tone and image after image of crystalline perfection as in this dazzling evocation of soft shelled crabs their finely stippled bodies that give to the touch translucent as Japanese lanterns These poems imbue everything from the microscopic to the stellar with wonder Each instant of illumination like poetry itself brings the world alive with a faithfulness deeper than seeing

Library of Congress,2003 Mary Somerville Kathryn A. Neeley,Mary Somerville,2001-10-22 A biography of the leading woman of science in Great Britain during the nineteenth century *Transformations of Electricity in Nineteenth-Century Literature and Science* Stella Pratt-Smith,2017-05-15 Throughout the nineteenth century practitioners of science writers of fiction and journalists wrote about electricity in ways that defied epistemological and disciplinary boundaries Revealing electricity as a site for intense and imaginative Victorian speculation Stella Pratt Smith traces the synthesis of nineteenth century electricity made possible by the powerful combination of science literature and the popular imagination With electricity resisting clear description even by those such as Michael Faraday and James Clerk Maxwell who knew it best Pratt Smith argues that electricity was both metaphorically suggestive and open to imaginative speculation Her book engages with Victorian scientific texts popular and specialist periodicals and the work of leading midcentury novelists including Charles Dickens Charlotte Bronte Emily Bronte William Makepeace Thackeray and Wilkie Collins Examining the work of William Harrison Ainsworth and Edward Bulwer Lytton Pratt Smith explores how Victorian novelists attributed magical qualities to electricity imbuing it with both the romance of the past and the thrill of the future She concludes with a case study of Benjamin Lumley s *Another World* which presents an enticing fantasy of electricity s potential based on contemporary developments Ultimately her book contends that writing and reading about electricity appropriated and expanded its imaginative scope transformed its factual origins and applications and contravened the bounds of literary genres and disciplinary constraints

Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office,2004 Appletons' Popular Science Monthly ,1900 **The New Art of Old Public Science Communication** Miira B. Hill,2022-03-30 This book investigates the phenomenon of science communication events as spectacles for legitimising and communicating science to the public With attention to events such as Science Slam where scientists are asked to present their knowledge in new ways and speak to an audience of laymen the author examines the participants use of stylistic devices borrowed from other events in order to address a diverse audience in a competitive environment With attention to the

performative appearance of scientists on stage and the manner in which contemporary public performing scientists present problematise and communicate knowledge the author considers the justifications offered by participants in terms of legitimacy and expectations Illustrating the crucial role of bodies techniques visuals and objects in the communicative construction of scientific reality The New Art of Old Public Science Communication The Science Slam sheds new light on the construction of improved science communication As such it will appeal to social scientists with interests in science communication the sociology of science and technology and the sociology of knowledge Beyond Cartesian Dualism Steve Alsop,2005-11-17 There is surprisingly little known about affect in science education Despite periodic forays into monitoring students attitudes toward science the effect of affect is too often overlooked Beyond Cartesian Dualism gathers together contemporary theorizing in this axiomatic area In fourteen chapters senior scholars of international standing use their knowledge of the literature and empirical data to model the relationship between cognition and affect in science education Their revealing discussions are grounded in a broad range of educational contexts including school classrooms universities science centres travelling exhibits and refugee camps and explore an array of far reaching questions What is known about science teachers and students emotions How do emotions mediate and moderate instruction How might science education promote psychological resilience How might educators engage affect as a way of challenging existing inequalities and practices This book will be an invaluable resource for anybody interested in science education research and more generally in research on teaching learning and affect It offers educators and researchers a challenge to recognize the mutually constitutive nature of cognition and affect **Versing Science (coloured Version)** Vishal Muliya,2023-04-10 Versing

Science is an outcome of translation work by members of ELTAI Rajkot Central from the book penned by Vishal Muliya It has original poems followed by translated versions Poems are a blending of SCIENCE PHILOSOPHY SUFISM with LITERATURE Romantic Rocks, Aesthetic Geology Noah Heringman,2011-02-23 Why are rocks and landforms so prominent in British Romantic poetry Why for example does Shelley choose a mountain as the locus of a voice to repeal large codes of fraud and woe Why does a cliff in the boat stealing episode of Wordsworth s Prelude chastise the young thief Why is petrification or stonifying in Blake s coinage the ultimate figure of dehumanization Noah Heringman maintains that British literary culture was fundamentally shaped by many of the same forces that created geology as a science in the period 1770 1820 He shows that landscape aesthetics the verbal and social idiom of landscape gardening natural history the scenic tour and other forms of outdoor improvement provided a shared vernacular for geology and Romanticism in their formative stages Romantic Rocks Aesthetic Geology reexamines a wide range of eighteenth and nineteenth century poetry to discover its relationship to a broad cultural consensus on the nature and value of rocks and landforms Equally interested in the initial surge of curiosity about the earth and the ensuing process of specialization Heringman contributes to a new understanding of literature as a key forum for the modern reorganization of knowledge *Biocosmism* Jorge Quintana Navarrete,2024-04-05 Honorable

Mention Premio al Mejor Libro en Humanidades Latin American Studies Association Mexico Section 2025 Most scholars study postrevolutionary Mexico as a period in which cultural production significantly shaped national identity through murals novels essays and other artifacts that registered the changing political and social realities in the wake of the Revolution In Biocosmism Jorge Quintana Navarrete shifts the focus to examine how a group of scientists artists and philosophers conceived the manifold relations of the human species with cosmological forces and nonhuman entities animals plants inorganic matter and celestial bodies among others Drawing from recent theoretical trends in new materialisms biopolitics and posthumanism this book traces for the first time the intellectual constellation of biocosmism or biocosmic thought the study of universal life understood as the vital vibrancy that animates everything in the cosmos from inorganic matter to living organisms to outer space It combines both analysis of unexplored areas such as Alfonso L Herrera s plasmogeny and innovative readings of canonical texts like Vasconcelos s *La raza cósmica* to examine how biocosmism produced a wide array of utopian projects and theorizations that continue to challenge anthropocentric biopolitical frameworks

Romantic Border Crossings Larry Peer, 2016-04-08 Romantic Border Crossings participates in the important movement towards otherness in Romanticism by uncovering the intellectual and disciplinary anxieties that surround comparative studies of British American and European literature and culture As this diverse group of essays demonstrates we can now speak of a global Romanticism that encompasses emerging critical categories such as Romantic pedagogy transatlantic studies and transnationalism with the result that new works by writers marginalized by class gender race or geography are invited into the canon at the same time that fresh readings of traditional texts emerge Exemplifying these developments the authors and topics examined include Elizabeth Inchbald Lord Byron Gérard de Nerval English Jacobinism Goethe the Gothic Orientalism Emily Dickinson Walt Whitman Anglo American conflicts manifest destiny and teaching romanticism The collection constitutes a powerful rethinking of the divisions that continue to haunt Romantic studies
