The shark is so well adapted to its element that its existence on the planet actually predates trees. When people enter that element in increasing numbers as they have in recent years, the results can be tragic and seemingly arbitrary. [Shark Attacks](#) Alex MacCormick, 1996. More horrifying than Jaws because it's true. Since 1990 there have been 283 shark attacks worldwide, 40 of which were fatal. In the past 15 years, reports of shark attacks have substantially increased. Over half the attacks occur in water no deeper than five feet. Believe it or not, shark attacks are still a very real threat to humans. These unspeakably bloody encounters happen in shallow water in safe areas to people just like you, people who thought it could never happen to them.

HONG KONG 1995: A forty-five-year-old woman swimming in shallow water with fifty other people has one leg and one arm ripped off by the shark; she dies before reaching the hospital.

CALIFORNIA 1993: A man snorkeling with friends is swallowed headfirst halfway down his body; luckily the shark spits him back out with only bite wounds.

AUSTRALIA 1993: A professional diver and mother of five is literally torn in half in front of her horrified family by a fifteen-foot great white shark.

HAWAII 1991: Two vacationing friends out for a swim suddenly see a shark the size of a car swim by. After one of the women begins thrashing in panic, the shark attacks and kills her; her body is later recovered with several limbs missing.

Read on for more blood-chilling accounts of people who fell prey to SHARK ATTACKS. Includes horrifying photos. [The Shark Attack Files](#) Paul Mason, 2018-01-01. A dark triangular fin slicing through the water can be a terrifying sight. Read the stories of the brave and lucky people who have survived real-life shark attacks, such as spearfisher Rodney Fox who was grabbed by a great white and Mick Fanning attacked during a surfing contest. Find out which shark species are involved, what causes attacks, how dolphins have saved people, how to fight back, and much more. Fascinating facts and brilliant photography capture the drama, but don't worry: you are more likely to be struck by lightning than to be bitten by a shark.

Close to Shore Michael Capuzzo, 2002-06-25. Combining rich historical detail and a harrowing pulse-pounding narrative, *Close to Shore* brilliantly re-creates the summer of 1916 when a rogue Great White shark attacked swimmers along the New Jersey shore, triggering mass hysteria and launching the most extensive shark hunt in history. In July 1916, a lone Great White left its usual deep-ocean habitat and headed in the direction of the New Jersey shoreline. There, near the towns of Beach Haven and Spring Lake and incredibly a farming community eleven miles inland, the most ferocious and unpredictable of predators began a deadly rampage: the first shark attacks on swimmers in U.S. history. Capuzzo interweaves a vivid portrait of the era and meticulously drawn characters with chilling accounts of the shark's five attacks and the frenzied hunt that ensued. From the unnerving inevitability of the first attack on the esteemed son of a prosperous Philadelphia physician to the spine-tingling moment when a farm boy swimming in Matawan Creek feels the sandpaper-like skin of the passing shark, *Close to Shore* is an undeniably gripping saga. Heightening the drama are stories of the resulting panic in the citizenry press and politicians and of colorful personalities such as Herman Oelrichs, a flamboyant millionaire who made a bet that a shark was no match for a man and set out to prove it. Museum of Natural History ichthyologist John Treadwell Nichols faced with the challenge of

stopping a mythic sea creature about which little was known and most memorable the rogue Great White itself moving through a world that couldn't conceive of either its destructive power or its moral right to destroy. Scrupulously researched and superbly written *Close to Shore* brings to life a breathtaking pivotal moment in American history. Masterfully written and suffused with fascinating period detail and insights into the science and behavior of sharks, *Close to Shore* recounts a breathtaking pivotal moment in American history with startling immediacy. *The Shark Attack Files* Jeff

Klinkenberg, University of Florida, 2016-11-14 The University of Florida has an ambitious goal to harness the power of its faculty, staff, students and alumni to solve some of society's most pressing problems and to become a resource for the state of Florida, the nation and the world. In 1958 a panel funded by the Office of Naval Research initiated the formation of the International Shark Attack File, the first comprehensive documentation of shark attacks on a global and historical level. In 1988 the file was transferred to the Florida Museum of Natural History at the University of Florida. It is part of the Florida Program for Shark Research directed by George H. Burgess, the planet's expert on shark attacks and staffed by a world renowned team of research scientists and educators. Travel the globe with Burgess, the Sherlock Holmes of shark attacks, as he studies mauled remains and the scars of the lucky survivors. His most famous case took him to an idyllic Red Sea resort where panic had set in after five attacks occurred in a single week. The attacks were carried out by Oceanic White Tips and a Mako, deep water species that had no business being so close to the beach. Following the clues, dive boat operators feeding sharks by hand to entertain tourists, the disappearance of the yearly tuna catch and the dead sheep, New Zealand cargo companies had been tossing overboard. Burgess solves the mystery of the shark attacks for Egyptian tourism officials and offers a list of best practices. But not all cases end with an easy prescription. In St. Petersburg Beach, Florida, he visits a recent shark attack victim bitten just off her dock on Boca Ciega Bay. While the victim would prefer to forget the fateful day the sharp toothed jaws of the Bull Shark latched onto her leg just below the knee, Burgess gently coaxes the story from her. It will go in the file to educate other shark researchers and educators and help us better understand the world's most feared predator. The stories chronicled in *Gatorbytes* span all colleges and units across the UF campus. They detail the far reaching impact of UF's research technologies and innovations and the UF faculty members dedicated to them. *Gatorbytes* describe how UF is continuing to build on its strengths and extend the reach of its efforts so that it can help even more people in even more places. **Shark Attacks of the Twentieth Century** Ralph S. Collier, 2003 This is the single most historically

valuable book ever written on the subject of Pacific Coast shark attacks. Through bone chilling accounts in victims' own words, never before published photographs and detailed maps and charts of attack locations, this book accurately chronicles every known unprovoked shark attack that occurred along the Pacific Coast of North America during the entire Twentieth Century. The author's examination of wound characteristics, recurring locations and the curious phenomenon of attacks on inanimate objects afford astonishing insights into why sharks attack. These insights form the foundation for his safety recommendations.

to specific ocean user groups Based on 40 years of research this book will be of inestimable value to scientists researchers and educators as well as anyone that might venture into the waters off the Pacific Coast The understanding gained from this book will temper fears with knowledge and provide the reader with clear and specific information that may easily make the difference between life and death
