The Ultimate Moving Average Handbook Valeriy Zakamulin, Javier Giner, 2025-11-19 Moving averages of prices serve as the primary tool for tracking trends in financial markets filtering out noise and highlighting trend directions With a plethora of moving averages and trend following rules at their disposal traders often find themselves overwhelmed by the sheer variety of choices Moreover traders persistently devise new forms of exotic moving averages each purportedly offering improved responsiveness and smoothness compared to its predecessors While it is relatively straightforward to visually compare the responsiveness of two different moving averages assessing their smoothing properties proves to be more challenging Comparisons made through visual inspection are inherently subjective and prone to biases A pressing need exists for quantitative metrics to objectively assess the properties of moving averages and their associated trend following rules In this book the authors propose a quantitative assessment of the properties of trend following rules based on moving averages They argue that there are three primary properties of trend following rules responsiveness smoothness and accuracy Given the prevalent claims that each exotic moving average offers superior responsiveness and smoothness compared to prior versions the book provides a means to

verify the accuracy of these assertions It offers systematic and comprehensive coverage of various types of moving averages and the trend following rules based on moving averages and focuses on identifying the most crucial properties of trend following rules and proposing quantitative metrics for their evaluation Despite the plethora of books and academic publications contemporary trend following with moving averages remains more of an art than a science This book injects scientific principles into the practice of trend following offering invaluable distinct and objective insights tailored for traders and investment professionals involved in trend following investing alongside academics and students within economic and finance departments *Day Trading Simplified: Tools, Tactics & Psychology for Market Success* Oliver Marshall, 2025-10-13
