Unshakable Foundations Norman L. Geisler,Peter Bocchino,2000-08 A comprehensive and readable survey of the central issues of Christianity that will help Christians to stand firm in a changing world Foundation ActionScript Animation Keith Peters,2006-11-22 Sure you can animate using motion tweens in fact we ll help you do that with our Flash Cartoon Animation book but isn t there something extra special in making things move with just a few lines of code In this book Keith Peters guides you through some basic animation theory and then demystifies the math and physics behind creating realistic animation looking at trigonometry velocity and acceleration and bouncing friction This book will teach you how to use Flash ActionScript to move the objects in your movies rather than letting Flash s tween engine do it for you The benefit of this is smaller more realistic more dynamic interactive movies that seem to come alive on your screen Almost all of the code featured in this book will work fine in either Flash MX 2004 or Flash 8 and with a few minor adjustments most of it can even be applied to Flash MX Although the text covers many advanced math and physics concepts making for very realistic motion there s no need to worry even if you re a relative newcomer to programming and the last math class you took was in high school and even if you barely remember that This book first covers everything you need to know to get started the principles of animation and the basics of ActionScript trigonometry and Flash rendering methods You ll work your way through slowly from using code to move a single object across the screen to creating complex systems that really push Flash s capabilities with topics covered including collision detection particle attraction and kinematics The book concludes with looking at 3D animation techniques including building a basic 3D engine 3D lines fills and solids and matrix math Once you come to grips with the ideas presented here you ll find yourself creating all manner of exciting animations and games
