Structural Novelty and Tradition in the Early Romantic Piano Concerto Stephan D. Lindeman, 1999 Lindeman a musicologist traces and defines the historical development of the concerto form as it passed from Mozart to succeeding generations He then assesses Beethoven's contributions and examines the classical model of the form in the early 19th century by overviewing several early romantic composers works Subsequent chapters analyze and assess the responses of five precursors of Schumann whose work offers a synthesis of radical experiments and traditional tenets He concludes by suggesting that concertos of Liszt offer a road into further developments of the genre in the second half of the century Illustrated with bandw portraits of composers and excerpts from musical scores Annotation copyrighted by Book News Inc Portland OR
