Crisis Communications Kathleen Fearn-Banks, 1996 No company organization or individual whose livelihood depends on public reaction can afford to function without a crisis management communications plan Yet many large fully staffed corporations still have no such plans Management and public relations in these companies are likely to say they acknowledge the need for such a plan however they either lack the manpower or the expertise to develop a crisis plan So they think positively and hope that the inevitable will never occur until the economy improves and they can hire someone with crisis planning expertise Various public relations and crisis communication theories suggest attributes and characteristics of programs that are likely either to prevent crises or enable organizations to recover from crises more swiftly than organizations without those characteristics In fact negative thinking is the appropriate stance in crisis management This book shows that if an organization's leaders think and plan for the worst case scenario they will come out of a crisis in better condition than they would otherwise It shows individuals how to prepare themselves and their organizations to cope with crises that may occur and offers strategies and tactics to be used during a crisis It provides this information via examinations of the experiences of public relations professionals in crises what they did what they wished they had done and what hampered their progress This volume of case studies demonstrates problems that can turn into crises and crises if not handled effectively that can become catastrophes The chapters include descriptions of the skills needed to communicate effectively in a crisis a how to manual on developing and implementing a crisis communication plan some causes of crises rumor sensationalized and irresponsible news coverage and the non expert expert tips on how to work with rather than in conflict with the media and lawyers and narrated case studies of how public relations
