Public Representation In Environmental Policymaking The Case Of Water Quality Management:

Public Representation In Environmental Policymaking Sheldon Kamieniecki, 2019-06-26 Relying on the results of a large survey research project in western New York State the author compares the environmental planning beliefs of public officials and citizens His major finding is that although leaders involved in water quality planning projects and the public share similar views on environmental issues these leaders are by far the worst predictors of citizens views Professor Kamieniecki s systematic probing of the determinants that make some officials more adept than others at accurate calculation of public preference uncovers imbalanced public representation due to several factors He concludes with an evaluation of citizen participatory mechanisms and consequent recommendations designed to elicit a wide range of public opinion a prerequisite for acceptable environmental planning

Public Participation Handbook, 1985 **Economic Benefits Of Improved Water Quality** Douglas Greenley, 2020-01-16 Until recently there has been general agreement that improvement and preservation of water quality though costly provided economic and social benefits that outweighed the expense Now however some observers are beginning to question whether the costs of the 1972 Water Pollution Control Act may actually exceed those benefits This book provides answers to some of the questions that have been raised The authors give measures of several important nonmarket benefits of improved water quality in Colorado s South Platte River Basin and empirically test and confirm the Weisbrod and Krutilla proposals that the general public may be willing to pay for preservation of environmental amenities and that option value and other preservation values must be added to recreation use values to give an accurate picture of the social benefits of environmental preservation and restoration Their findings include the fact that even those who do not expect to use the river basin for recreation are willing to pay for the maintenance of a natural ecosystem and to bequest clean water to future generations The authors also arrive at average amounts households are willing to pay for improved water quality to enhance enjoyment of water based recreation activities They suggest that without such information it is highly unlikely that sufficient resources will be allocated for the preservation of unique environments and for the improvement of those being degraded

Public Involvement And Social Impact Assessment Gregory Daneke, Jerome Delli Priscoli, Margot Garcia, 2019-06-04 The participation of the public sector in assessing the social impact of a wide range of projects is the focus of this ground breaking book Leading experts from the u s and canada have contributed original articles based on their empirical research conducted in current impact situations These are supplemented by the editors analytical overviews The book concludes with projections regarding future linkages between public involvement and social impact assessment Dr Gregory A Daneke is associate professor of public affairs and business administration at Arizona State University He has coedited *Energy Policy and Public Administration* 1980 and coauthored *Performance Administration Improved Responsiveness and Effectiveness in Public Services* 1980 Dr Margot w Garcia is a program analyst with the USDA Forest Service as part of a nationwide training program for the Forest Service in

Water And Agriculture In The Western U.S. Gary Weatherford, 2020-01-23 One of the major questions facing the western U.S. is whether irrigation water can be conserved and reallocated to help meet increasing nonagricultural water demands This book based on interdisciplinary research in several states identifies and analyzes the legal political economic and social issues involved in a conserve and transfer strategy After providing an overview and policy framework for considering the role of conservation in water management the authors use case studies to illustrate for example why water conservation is not a neutral policy or principle demonstrating how other legitimate values can be adversely affected by a single purpose pursuit of conservation the various options available for conservation how reallocation occurs in market transactions and the legal restrictions on the sale of conserved surplus water Although formal market mechanisms are found to be rudimentary or lacking in most areas of the West the authors contend that more proficient markets will evolve to measure the economic value of agricultural water They conclude that a conserve and transfer strategy is selectively workable through the use of incentives but that a number of tradeoffs social concerns and institutional constraints which have not been adequately recognized to date will have to be dealt with by policymakers if the strategy is to have wider application

Using Surveys to Value Public Goods Robert Cameron Mitchell, Richard T. Carson, 2013-10-18 Economists and others have long believed that by balancing the costs of such public goods as air quality and wilderness areas against their benefits informed policy choices can be made But the problem of putting a dollar value on cleaner air or water and other goods not sold in the marketplace has been a major stumbling block Mitchell and Carson for reasons presented in this book argue that at this time the contingent valuation CV method offers the most promising approach for determining public willingness to pay for many public goods an approach likely to succeed if used carefully where other methods may fail The result of ten years of research by the authors aimed at assessing how surveys might best be used to value public goods validly and reliably this book makes a major contribution to what constitutes best practice in CV surveys Mitchell and Carson begin by introducing the contingent valuation method describing how it works and the nature of the benefits it can be used to measure comparing it to other methods for measuring benefits and examining the data gathering technique on which it is based survey research Placing contingent valuation in the larger context of welfare theory the authors examine how the CV method impels a deeper understanding of willingness to pay versus willingness to accept compensation measures the possibility of existence values for public goods the role of uncertainty in benefit valuation and the question of whether a consumer goods market or a political goods market referenda should be emulated In developing a

CV methodology the authors deal with issues of broader significance to survey research Their model of respondent error is relevant to current efforts to frame a theory of response behavior and bias typology will interest those considering the cognitive aspects of answering survey questions Mitchell and Carson conclude that the contingent valuation method can obtain valid valuation information on public goods but only if the method is applied in a way that addresses the potential sources of error and bias They end their book by providing guidelines for CV practitioners a list of questions that should be asked by any decision maker who wishes to use the findings of a CV study and suggestions for new applications of contingent valuation Additional features include a comprehensive bibliography of the CV literature and an appendix summarizing more than 100 CV studies

Accident At Three Mile Island David L. Sills, 2019-03-01 The nuclear accident at Three Mile Island in March 1979 was as much a social systems failure as it was an engineering failure It raised questions not only about the regulation and management of nuclear power plants but also about the effects of nuclear accidents on the community on society and on the total controversy surrounding nuclear energy Questions were also raised about public perceptions of the risks of high technology At the request of the President's Commission on the Accident at Three Mile Island the Kemeny Commission the Social Science Research Council commissioned social scientists to write a series of papers on the human dimensions of the event This volume includes those papers in revised and expanded form and a comprehensive bibliography of published and unpublished social science research on the accident and its aftermath **Bibliographic Index**, 1983
