External Proximity Readers

Installation Instructions

1. INTRODUCTION

The RDM-4 (motion type), RDR-4 and RDR-4B are external proximity readers, compatible with the AXS-100 access control system.

The system is designed to limit access to restricted areas, while permitting authorized people to enter.

It is recommended to install the readers on a wall outside the protected area, and the AXS-100 control unit inside the protected area.

Proximity access cards or tags are used as keys to open doors. When presented to an RDR-4, RDR-4B or RDM-4, the access card emits a coded RF signal that is read by the proximity reader. The reader then forwards this signal to the AXS-100 control unit.

The control unit verifies that the card is valid and decides whether it should energize an output relay that releases the lock. All activity involving the proximity readers is recorded and logged by the AXS-100.

For information about the AXS-100 system, refer to the AXS-100 user's guide and installation instructions.

3. MOUNTING

Mount the proximity reader outside the door on the wall or door frame. The RDR-4, RDR-4B and RDM-4 come with a 1m (3 ft) cable.

To mount the proximity readers:

- Insert a screwdriver into the recess at the bottom of the case, and separate the cover from the reader.
- Place the base on the installation surface, mark two screw holes, drill the holes, and insert plastic anchors, if necessary.
- Fasten the base to the mounting surface, using two screws.
- Replace the reader's cover, ensuring that the cover is aligned with the reader. This enables the LED to be visible, (see Figures 2 and 3).

Note: When installing more than one RDR-4, RDR-4B or RDM-4, the distance between the readers should be at least 50 cm (2 ft.), to ensure proper operation.

Figure 2. RDR-4, RDR-4B Mounting

Note: Do not install the RDR-4, RDR-4B or RDR-4 on a metal surface or a metal door frame, since this decreases the read range significantly. If you have to install the reader on a metal surface, use a spacer so that the reader will be at least 1 cm (3/8 in.) away from the metal. You may use the RDR/RDM-BACK, which is an optionally available spacer made specifically for this purpose.
