Ratification Of The Single European Act:

The Politics of Ratification of EU Treaties Carlos Closa, 2013-09-02 Since its inception the European Union EU has revised its foundational treaties several times resulting in national ratification processes involving different actors with varying success This book focuses on the politics of ratification of EU Treaties and reviews the processes of ratification of EU primary legislation Existing research and academic debate on EU constitutional politics have almost exclusively focussed on negotiation of new treaties and their institutional setting However this book explains how the result of ratification was achieved and analyses the strategy that actors pursue across Europe Ratification of the Treaty of Maastricht and the EU Constitution failed totally whilst other ratification can be considered partial failures such as the Irish Nice and Lisbon referendums As the EU Constitution has proved the ratification process may have deep effects unforeseen during the processes of negotiation In recent years ratification has produced some of the most intense debates on national membership of the EU and the EU itself The Politics of Ratification of EU Treaties will be of interest to students and researchers of European Studies European Union studies European Union Law and European Union Politics Ratification of the Single European Act Commission of the European Communities, European Communities Staff, 1993-05 Constitutional Law of Ireland Michael Forde, David Leonard, 2016-10-14 Originally written for the fiftieth anniversary of the Constitution of Ireland this book is an account of how the Constitution's requirements have been implemented by the legislature and interpreted by the courts In this way it provides an integrated and contextual account of constitutional law in Ireland It goes as far as to place it in context of some foreign constitutions especially the Constitutions of the United States France Germany and the United Kingdom as indeed the Irish courts refer frequently to other countries for guidance in interpreting the Constitution The book largely falls into four parts The first few chapters are introductory and cover the drafting and adoption of the Constitution some features of the State and its citizens and the judicial review of laws The next few chapters deal with the various institutions of government and with the activities of the State in the international arena and in relation to fiscal matters Then following on from this there are a number of chapters which consider what may be termed the various civil liberties and rights There is a final brief section towards the end of the book which deals with the various legal breaches of the Constitution This new edition has been extensively rewritten to account for the enormous to take into account the tumultuous changes in Irish Constitutional Law in the intervening years Challenges to articles referenda new legislation and cases are all judicially considered Michael Forde and David Leonard offer the reader everything they need to know on this complex subject **The Transformation of EU Treaty Making** Dermot Hodson, Imelda Maher, 2018-08-09 Investigates the struggle between governments parliaments the people and courts over who participates in EU treaty making **The Europeanization of Domestic Legislatures** Sylvain Brouard, Olivier Costa, Thomas König, 2011-12-09 In ten years 80 per cent of the legislation related to economics maybe also to taxes and social affairs will be of Community origin This

declaration has been largely quoted paraphrased and deformed by different authors creating a persistent myth according to which 80% of the legislative activity of the national legislatures would soon be reduced to the simple transposition of European norms This book addresses the topic of the scope and impact of Europeanization on national legislation as a part of the Europeanization debate which raises normative concerns linked to the democratic deficit debate The state of the art shows that there are many assumptions and claims on how European integration may affect national legislation and more generally domestic governance but that there is a lack of solid and comparative data to test them The aim of the book is to give a solid and comparative insight into Europeanization focusing on effective outcomes in a systematic way This book analyzes the period 1986-2008 and includes an introduction a global overview of European legislative activities which set the background for Europeanization of national legislatures 9 country contributions 8 EU member states Switzerland including systematic comparative and standardized data tables and figures and a conclusion with a comparative analysis of the European and domestic reasons for Europeanization All national contributions conclude that Europeanization of national legislation is much more limited than assumed in the literature and public debate It is limited to 10 to 30% of laws depending on the country far less than the 80% predicted by Jacques Delors and mentioned daily by medias and public opinion leaders to demonstrate EU domination on member states Beside that general statement the various chapters propose a deep insight on EU constraint over national legislation providing much information on the kind of laws and policies that are Europeanized the evolution of this process through time the impact of Europeanization on the balance of powers and the relations between majority and opposition at national level the strategies developed by national institutions in that context and many other issues making the book of interest to academics and policy makers concerned with Europeanization and national legislation
