time of Karl Marx and John Stuart Mill philosophers generally held economics to be an integral element of moral philosophy. These days the language of values, moral, aesthetic, and cognitive dominates philosophic discourse even though contemporary philosophers rarely hold economics to be integral to moral philosophy. Examining the thought of Friedrich Nietzsche and the art of Marcel Proust, Edward Andrew provides the first sustained critical analysis of values discourse, an analysis that deconstructs its content and its form.

The Nature of Human Values Milton Rokeach, 1973. Milton Rokeach's book *The Nature of Human Values* (1973) and the Rokeach Value Survey, which the book served as the test manual for, occupied the final years of his career. In it he posited that a relatively few terminal human values are the internal reference points that all people use to formulate attitudes and opinions and that by measuring the relative ranking of these values one could predict a wide variety of behavior, including political affiliation and religious belief. This theory led to a series of experiments in which changes in values led to measurable changes in opinion for an entire small city in the state of Washington.

Phenomenology of Values and Valuing J.G. Hart, Lester Embree, 2013-04-17. Although a key aspect of the phenomenological movement is its contribution to value theory, axiology, and value perception, almost all the major figures devoted a great part of their labors to these topics; there has been relatively little attention paid to these themes. This volume in part makes up for this lacuna by being the first anthology on value theory in the phenomenological movement. It indicates the scope of the issues by discussing, e.g., the distinctive acts of valuing, openness to value, the objectivity of values, the summation and combination of values, the deconstruction of values, the value of absence, and the value of nature. It also contains discussions of most of the major representative figures, not only in their own right but also in relationship to one another: Von Ehrenfels, Brentano, Scheler, Hartmann, Husserl, Heidegger, Schutz, and Derrida.

Encyclopedia of Ethics: P-W Lawrence C. Becker, Charlotte B. Becker, 2001. A revised, expanded, and updated edition with contributions by 325 renowned authorities in the field of ethics. All of the original articles have been newly peer reviewed, and revised bibliographies have been updated throughout, and the overall design of the work has been enhanced for easier access to cross references and other reference features.

The Moral Quest Stanley J. Grenz, 2016-09-27. Stanley J. Grenz masterfully leads readers into a theological engagement with moral inquiry that is a first-rate introduction to Christian ethics.

Value Theory Deshun Li, 2013-07-12. Humankind's progress has always been driven by two momentums: the pursuit of truth and the creation of value. But our understanding of value and our ability to reflect on its complexity has long lagged behind our constant search for truth. This has in turn limited our grasp of the essence of truth. This book takes philosophical contemplations on value to a new level while also explicating some contemporary Chinese styles of philosophical thought. Over the past 25 years, this book has been having an increasing impact on Chinese readers and researchers, and it also provides a good platform for international dialogue on several key issues of philosophical studies.

The Language of War James Dawes, 2009-07. Focusing on American literature from the Civil War, World War I, and World War II, Dawes develops two primary questions:

How does the strategic violence of war affect literary legal and philosophical representations And in turn how do such representations affect the reception and initiation of violence itself
