Reason in Action Martin Hollis,1996 This 1995 book collects together essays from twenty five years of Hollis s work on rationality and social action *Reason in Action ...* Hollis,1996 **Reason in Action** Martin Hollis,1996 This 1995 book

collects together essays from twenty five years of Hollis s work on rationality and social action **The Philosophy of Social Science** Martin Hollis,1994-09 An introduction to the philosophy of social science from a well known author

Realism in Action Matti Sintonen,Petri Ylikoski,Kaarlo Miller,2012-12-06 Realism in Action is a selection of essays written by leading representatives in the fields of action theory and philosophy of mind philosophy of the social sciences and especially the nature of social action and of epistemology and philosophy of science Practical reason reasons and causes in action theory intending and trying and folk psychological explanation are some of the topics discussed by these leading participants A particular emphasis is laid on trust commitments and social institutions on the possibility of grounding social notions in individual social attitudes on the nature of social groups institutions and collective intentionality and on common belief and common knowledge Applications to the social sciences include e g a look at the Erkl ren Verstehen controversy in economics and at constructivist and realist views on archeological reconstructions of the past *Trusting in Reason* Preston

King,2004-08-02 This volume for the first time brings together important essays on the work of Martin Hollis from many different perspectives *Philosophy of Social Science* Mark Risjord,2014-05-16 The Philosophy of Social Science A Contemporary Introduction examines the perennial questions of philosophy by engaging with the empirical study of society The book offers a comprehensive overview of debates in the field with special attention to questions arising from new research programs in the social sciences The text uses detailed examples of social scientific research to motivate and illustrate the philosophical discussion Topics include the relationship of social policy to social science interpretive research action explanation game theory social scientific accounts of norms joint intentionality reductionism causal modeling case study research and experimentation **Dictionary of Twentieth-Century British Philosophers** Stuart Brown,2005-06-01

This is a two volume work with entries on individuals who made some contribution to philosophy in the period 1900 to 1960 or soon after The entries deal with the whole philosophical work of an individual or in the case of philosophers still living their whole work to date Typically the individuals included have been born by 1935 and by now have made their main contributions Contributions to the subject typically take the form of books or journal articles but influential teachers and people otherwise important in the world of philosophy may also be included The dictionary includes amateurs as well as professional philosophers and where appropriate thinkers whose main discipline was outside philosophy There are special problems about the term British in the twentieth century partly because of human migration partly because of decolonialization and the changing denotation of the term The intention has been to include not only those who were British subjects at least for a significant part of their lives even if they mostly lived outside what is now the U K but also people who

spent a significant part of their lives in Britain itself irrespective of their nationality or country of origin In the first category are included for instance a number of people who were born and educated in Britain but who subsequently taught in universities abroad In the second category are included those who were born elsewhere but who came to Britain and contributed to its philosophical culture

A Question of Knowledge Richenda Power, 2014-06-11 This book uniquely illustrates the key concepts and issues involved with recent examples drawn from empirical research highlighting the practical relevance of difficult theoretical and philosophical concepts to the way in which we think and talk about knowledge both in an everyday and in an academic sociological context

Theories of Violent Conflict Jolle Demmers, 2012-07-26 This textbook introduces students of violent conflict to a variety of prominent theoretical approaches and examines the ontological stances and epistemological traditions underlying these approaches Theories of Violent Conflict takes the centrality of the group as an actor in contemporary conflict as a point of departure leaving us with three main questions What makes a group Why and how does a group resort to violence Why and how do or don't they stop The book examines and compares the ways by which these questions are addressed from a number of perspectives constructivism social identity theory structuralism political economy human needs theory relative deprivation theory collective action theory and rational choice theory The final chapter aims to synthesise structure and agency based theories by proposing a critical discourse analysis of violent conflict This book will be essential reading for students of war and conflict studies peace studies conflict analysis and conflict resolution and ethnic conflict as well as security studies and IR in general

Rousseau Timothy O'Hagan, 2003-09-02 Timothy O'Hagan investigates Jean Jacques Rousseau's writings concerning the formation of humanity of the individual and of the citizen in his three master works the Discourse on the Origin of Inequality among Men Emile and the Social Contract He explores Rousseau's reflections on the sexes language and religion O'Hagan gives Rousseau's arguments a close and sympathetic reading He writes as a philosopher not a historian yet he never loses sight of the cultural context of Rousseau's work

Decision Theory and Rationality José Luis Bermúdez, 2009-02-19 The concept of rationality is a common thread through the human and social sciences from political science to philosophy from economics to sociology and from management science to decision analysis But what counts as rational action and rational behavior Jos Luis Berm dez explores decision theory as a theory of rationality Decision theory is the mathematical theory of choice and for many social scientists it makes the concept of rationality mathematically tractable and scientifically legitimate Yet rationality is a concept with several dimensions and the theory of rationality has different roles to play It plays an action guiding role prescribing what counts as a rational solution of a given decision problem It plays a normative role giving us the tools to pass judgment not just on how a decision problem was solved but also on how it was set up in the first place And it plays a predictive explanatory role telling us how rational agents will behave or why they did what they did This controversial but accessible book shows that decision theory cannot play all of these roles simultaneously And yet it argues no theory of rationality can

play one role without playing the other two The conclusion is that there is no hope of taking decision theory as a theory of rationality

A Non-Instrumentalist Approach to Collective Intentionality, Practical Reason, and the Self Juliette Gloor, 2014-02-19 Taking into account the relevant and mostly contemporary Anglo American debates concerning collective intentionality the author examines what it means to share reasons and other intentional states such as thoughts and emotions The guiding question of the dissertation is in what way and to what extent morality and therefore self consciousness can be understood as conditions of possibility for the sharing of mental states especially reasons The dissertation is a contribution mainly to fields of research in practical philosophy normative ethics and moral psychology and in social philosophy collective intentionality analysis and rational choice theory

What Are the Humanities For? Willem B. Drees, 2021-04-29 What are the humanities for The question has perhaps never seemed more urgent While student numbers have grown in higher education universities and colleges increasingly have encouraged students to opt for courses in STEM science technology engineering and mathematics or take programs in applied subjects like business and management When tertiary learning has taken such a notably utilitarian turn the humanities are judged to have lost their centrality Willem B Drees has no wish nostalgically to prioritize the humanities so as to retrieve some lost high culture But he does urge us to adopt a clearer conception of the humanities as more than just practical vehicles for profit or education He argues that these disciplines while serving society are also intrinsic to our humanity His bold ideas about how to think with greater humanistic coherence mark this topical book out as unmissable reading for all those involved in academe especially those in higher educational policy or leadership positions

International Relations in a Constructed World Vendulka Kubalkova, Nicholas Onuf, Paul Kowert, 1998-05-05 This book develops an alternative way of understanding international relations as social relations Mainstream theorists and their post modern critics leave people out Constructivism puts people their activities and their social arrangements at the forefront It is now recognized as the most important recent breakthrough in international relations theory Written in a lucid style the book shows how this new approach can be applied to major issues of our times such as national identity gender and labor equality and Internet governance

The Undermining of Beliefs in the Autonomy and Rationality of Consumers John O'Shaughnessy, Nicholas O'Shaughnessy, 2007-11-08 This book examines modern consumption focusing on concepts of autonomy and rationality The authors adopt a moderating perspective reviewing and critiquing attacks on these concepts in order to work towards a more nuanced view of the consumer

Political Authority and Obligation in Aristotle Andres Rosler, 2005-03-03 to follow

Truth and Consequences Reed Way Dasenbrock, 2010-11-01 Contemporary literary theory takes truth and meaning to be dependent on shared conventions in a community of discourse and views authors intentions as irrelevant to interpretation This view argues Reed Way Dasenbrock owes much to Anglo American analytic philosophy as developed in the 1950s and 1960s by such thinkers as Austin and Kuhn but it ignores more recent work by philosophers like Davidson and Putnam who have mounted a

counterattack on this earlier conventionalism This book draws on current analytic philosophy to resuscitate the notion of objective truth and intentionalist models of meaning and interpretation thereby moving beyond the antifoundationalism of postmodern theory It addresses the work of Rorty and Fish as representative of literary conventionalism discusses the futility of Derrida's anti-intentionalism and shows how poststructuralist thinkers like Althusser and Foucault have contributed to the new thematics of race class gender and sexual orientation that dominates literary theory today Examining the counterarguments of conventionalists to have their theory judged by its consequences Dasenbrock shows how damaging this antiobjectivism and anti-intentionalism have been for literary studies

International Relations in a Constructed World V. Kubáľková, 1998 In nine essays originating from the running Miami International Relations Group seminar the editors and contributors introduce constructivism as an alternative to studying IR from a historical and systems analytical framework They advance constructivism in the context of the perennial agent structure debate discuss international relations under social construction as in national identity feminist struggle and global Internet governance and reconstructing the discipline
