## **Reasons We Speak Cognition And Discourse In The Second Language Classroom:**

*The Reasons We Speak* Miguel Mantero, 2002-10-30 The role of cognition in a literature based foreign language classroom is investigated and explained here By implementing a sociocultural approach cognition is understood as the basic building block for all human learning and language development This study incorporates various understandings and views from reader response theory literary theory and discourse analysis in order to support the conclusions reached through authentic classroom discourse analysis Along with clarifying current trends in second language acquisition theory this text also offers the classroom teacher practical suggestions on how to approach and evaluate classroom talk that is based on literature or authentic readings The book also contains new approaches and views on the roles of reader response theory in the language classroom that are also reflected in a contemporary literary theory that has been developed especially with second language readers and learners in mind The author challenges the current view of scaffolding as demonstrated in the data analysis and offers a more realistic interpretation of what may actually be taking place in the language classrooms under the guise of scaffolding The role of opportunities to enter into discourse becomes central to the main argument and is exemplified through actual classroom transcripts
