Royal Scots and Patriots of the LMS Oswald Stevens Nock, 1978      Great Central Railway John Evans, 2020-04-15

Wonderful previously unpublished images documenting the years before and after the Great Central Line was cut      British Steam Military Connections: London, Midland and Scottish Railway Steam Locomotives Keith Langston, 2019-08-30 This British Railways history explores the long held tradition of naming steam locomotives in honor of the military The naming of steam locomotives was a beloved British tradition since the first railway locomotives appeared in 1804 Many of the names were chosen in honor of military personnel regiments squadrons naval vessels aircraft battles and associated historic events This volume looks specifically at the steam locomotives with military inspired names that were built by the London North Eastern Railway which joined the British Railways stock in 1948 A large number of the company's Jubilee class locomotives were given names with a military connection as were a small number of Black Five class engines Famously the majority of the much admired Royal Scot class of engines carried names associated with the military in general and regimental names in particular Many of the nameplates were adorned with ornate crests and badges Long after the demise of mainline steam rescued nameplates have become prized collectors items This generously illustrated publication highlights the relevant steam locomotives and explains the origins and social history surrounding their military names      **A History of the Butlin's Railways** Peter Scott, 2001      *The Final Years of London Midland Region Steam* David Mather, 2020-07-30 Extensively illustrated with photos a history of the many locomotives that became part of this British Railways region This book investigates the vast number of locomotives that came to the London Midland Region in 1948 upon the nationalization of the four largest railway companies in the UK It is a class by class survey with over two hundred illustrations covering all the top link and freight classes and also looking at the smaller types of locomotive operating on branch lines and doing more humble tasks The author explores what happened to them and also looks at those that eventually made their way into preservation      The A4 Pacifics After Gresley Ronald Hillier, Tim Hillier-Graves, 2023-11-23 In their book *Gresley's Silver Link* the authors analyzed the evolution of the A4s Gresley's and their service up to Gresley's death in 1941 This book takes this compelling story from the early years of the war up to their demise in the 1960s After four years of service pulling the LNER's most prestigious trains the A4s took on a more utilitarian role and for six years worked hard to support Britain's war effort From this they emerged bowed but unbeaten although in an extremely jaded condition Once restored they took up where they had left off in 1939 and did exceptional service for the rest of their days With the help of previously unpublished material the authors analyze the second phase of the A4s careers first as LNER engines then from 1948 under British Railways management Without a diesel or electric fleet of engines to replace them they entered a second golden age of fast running in the 50s Then in the Swinging Sixties they faced as some thought a premature end as part of a much delayed

modernization program Until withdrawn from service they continued to astound their footplate crew and performed exceptionally well even when maintenance standards had slipped and their condition had deteriorated They were thoroughbreds and have become a fitting memorial to the master engineers who produced and sustained them for 30 years or more The Rebuilt 'Royal Scots' Fred James,David Hunt,Bob Eddery,R. J. Essery,1999 British Steam: Past & Present Keith Langston,2011-12-01 British Steam Past and Present contains an evocative mix of specially commissioned modern steam images and steam era archive pictures the majority of which have never been published before The work of accomplished steam photographer David Anderson is highlighted in three special Location in Focus features studies of 1950s and 1960s steam workings at Oxford and on the mighty Beattock Bank In addition there is the photographic record of a 1959 visit to Belfast with unique images of steam on the Belfast Dublin ex GNR route Original photographic studies from the preservation era by David Gibson who features the Churnet Valley Railway Paul Pettitt who features the Bluebell Railway and Southern Region locomotives and Fred Kerr who presents an eclectic mix of Main Line Steam images are all included Freight locomotive preservation is not forgotten and is featured using modern and archive images Together with many archive and new images from the authors own collection these images present an enthralling window on steam which is totally unrivaled

**Detailing and Modifying Ready-to-Run Locomotives in 00 Gauge** George Dent,2014-06-30 During the twenty years in which Britain s nationalized railway operated mainline steam locomotives a vast array of individual designs complemented the British Railways Standard machines built up to 1960 Such was the variety of motive power to be seen on the network that this early period of BR s existence has proved to be the most enduring amongst enthusiasts and modellers The ready to run market has reflected this popularity in terms of models and liveries available off the shelf Despite constantly rising levels of detail finish and performance r t r models can never cater for every variation in components equipment or livery that invariably arose within large and long lived fleets Nor can they offer particular running numbers and names to satisfy every customer while older products may also require work to bring them up to the standard of contemporary offerings Therefore being able to change factory applied decals add period or individual locomotive specific details modify a livery or create an authentic weathered finish can prove vital to achieving a heightened sense of realism and individuality within our traction fleets Aimed at modellers of all abilities and serious model railway enthusiasts this book gives details of a wide range of techniques materials and tools and is lavishly illustrated with 400 colour photographs *LMS Steam at Euston & Camden* Rod Steele,2013-11-15 Lone gone days are recaptured A time when spotters chased up and down the platforms at Euston and at Camden Yard to record the arrivals and departures of steam hauled express trains of the former London Midland Scottish Railway **The Locomotives of Robert Riddles** Colin Boocock,2023-11-09 The Locomotives of Robert Riddles guides the reader in the quest to understand how Robert Riddles career on the LMS and in war service shaped his knowledge and character and led to him becoming the obvious choice for leading the locomotive engineering function within the newly

formed Railway Executive The book outlines the substantial impact Riddles had on the design and supply of locomotives that were to support the Allied military campaigns in the second world war including useful analysis of the types of locomotives specifically designed for that work The bulk of the book outlines the decision making processes that led to the twelve designs of standard steam locomotives that were intended to be the future stop gap before electrification and the political and practical reasons for successive policy changes that led to their unexpectedly short lives Those events include the 1955 Modernization Plan with its emphasis on dieselization and the subsequent railway rationalizations that reduced the need not only for new steam locomotives but also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties

**Great Western Castle Class 4-6-0 Locomotives, 1923-1959** David Maidment, Bob Meanley, 2023-02-16 The Great Western Castles were one of the most successful locomotive designs of the twentieth century in terms of both performance and efficiency Designed by Charles Collett in 1923 based on the 1907 Churchward Star class 155 were constructed almost continuously apart from the war years between 1923 and 1950 in addition to fifteen rebuilt Stars and one rebuilt from the Great Bear pacific Many were modernised with increased superheat and double chimneys in the late 1950s and the class continued to be the mainstay of all Western Region express passenger services to the West Country South Wales Gloucestershire Herefordshire and the West Midlands until replaced by the WR diesel hydraulic fleet in the early 1960s This book covers their design in a chapter written by Bob Meanley who masterminded the restoration at Tyseley Works of the Castles Earl of Mount Edgcumbe and Clun Castle and their history operation and performance from the high speed of the 1930s through to their rejuvenation in the 1950s leaving experience of their last years and preservation to another volume David Maidment had close experience of the class when working at Old Oak Common between 1957 and 1962 and includes his personal experiences there and on the road from his first encounter with one as a six year old boy The book includes 350 photographs some 40 in color and 23 detailed Swindon technical drawings

**British Railways in the 1960s** Geoff Plumb, 2019-04-30 A profusely illustrated and impressively informative look at the end of the steam locomotive era on one of UK's Big Four railway lines Midwest Book Review After the Second War Britain's railways were rundown and worn out requiring massive investment and modernization The Big Four railway companies were nationalized from 1948 and the newly formed British Railways embarked on a program of building new Standard steam locomotives to replace older types These started to come on stream from 1951 This program was superseded by the 1955 scheme to dieselize and electrify many lines and so the last loco of the Standard types was built in 1960 and the steam locomotives had been swept entirely from the BR network by 1968 This series of books The Geoff Plumb Collection is a photographic account of those last few years of the steam locomotives their decline and replacement during the transition years Each book covers one of the former Big Four the Southern Railway London Midland Scottish

Railway Great Western Railway and London North Eastern Railway including some pictures of the Scottish lines of the LMS and LNER Though not a complete history of the railways the books bring a sense of occasion to the last run of a locomotive type or a stretch of line about to be closed down Pictures are of the highest quality that could be produced with the equipment then available but they do reflect real life and real times In simple terms a look at a period not so long ago but now gone forever An evocative collection of views of the twilight of BR steam Railway Modeller **British Steam Patriots** Keith Langston,2012-04-19 The Patriot class often referred to as Baby Scots were an immediate success displaying consistently good performance The class was withdrawn over a two year period between 1960 and 1962 having all covered around 1 3 million miles each unfortunately too early to be considered for preservation The last two withdrawn were in good condition on withdrawal but unfortunately all were scrapped Although no Patriot in either rebuilt or unrebuilt forms survived into preservation a new Patriot is under construction at the Llangollen Railway The LMS Patriot Project a registered charity is appealing for donations or regular contributions to build the new 3 cylinder Fowler designed parallel boiler 4 6 0 express passenger loco Although mostly new the group will use the leading wheel sets from two LMS 8F locomotives An unrestored surviving LMS Fowler tender from Woodham Brothers Barry scrap yard will also be used for the project The new build Patriot is being assembled at the Llangollen Railway Works and will carry the number of the last built LMS number 5551 or British Railways number 45551 After a public poll the new Patriot locomotive will be named The Unknown Warrior whose tomb is located in Westminster Abbey The new Royal British Legion backed engine will be launched in late 2011 or early 2012 and this is the only official book of the project Containing hundreds of new never before published photographs British Steam Patriot will tell the story of the engine from its original concept follow its production throughout the building period and also its launch The book will be endorsed by the Royal British Legion and promoted to all its members This will be a must for all railway enthusiasts *West Coast Main Lines, 1957-1963* John Palmer,2022-08-09 Throughout its length from London to Glasgow via Crewe and Carlisle with a loop through the West Midlands and spurs to Holyhead Liverpool and Manchester the West Coast Main Line has consistently provided interest for those many with more than a passing interest in trains and travel This book outlines the history of the route its physical characteristics and sets the scene for the various passenger and goods traffic flows that sustained it it then details the arrangements for motive power and train working through the era of change that was 1957 to 1963 The level of interest as evidenced daily by the presence at the lineside of hordes of young spotters and other observers was particularly high at that time as processions of trains hauled by fine express passenger locomotives and those more suited to other traffic passed by The book also goes behind the scenes to provide insights into the daily and seasonal challenges of managing that section of a wider railway network as directed by the varying terms of relevant legislation and a government increasingly concerned to shape the railways for the changing needs of the public industry and the economy The book will be of particular interest to those who simply recall those days by the

lineside those with an interest in detailed arrangements to provide and maintain suitable motive power those with an interest in how the railway served the needs of the nation and modellers who seek information The book is illustrated with color and monochrome images and supported by maps      *The LMS Princess Coronation Pacifics* David Maidment,2023-11-23 This book follows on from the author s book on the Princess Coronation pacific locomotives from their construction in 1937 to their operation in 1956 It picks up from the story in 1957 with their operation and performance on the Caledonian Royal Scot and Midday Scot accelerated services of the late 1950s their continuing heavy work as dieselization of the West Coast mainline is implemented and the sudden withdrawal of the remaining examples at the end of the 1964 summer timetable Included are the author s personal experiences and photographs and the descriptions by three Crewe men who fired these engines on the heavy overnight Crewe Perth sleeper services in the late 1950s two of whom Les Jackson and Bill Andrew drove 6229 and 6233 in the preservation era As well as their stories of their experiences in BR days they describe runs with the preserved locomotives and have included photographs from their personal collections Crewe Works fitter Keith Collier includes his experiences of their maintenance and the author in conclusion compares them with the finest steam locomotives of France Germany and the USA      **Cumbrian Steam** Gordon Edgar,2014-08-15 A close up look at Cumbria s steam railways      **British Railways Steam 1948-1970** L. A.
