Reshaping Communications Technology Information And Social Change:

Reshaping Communications Paschal Preston, 2001-03-22 Thirty years ago one writer complained that to admire technology is all out of fashion Today excited claims are made for the impact that these technologies are having on social political and economic life But how are we to assess these claims This book critically interrogates many of the prevailing ideas offers a fresh perspective on this new digital age Reshaping Communications Provides an alternative and more grounded account of the complex interplay between new technology and information structures and changes in society Illuminates the fundamental continuities as well as changes in socioeconomic and political processes Draws on an interdisciplinary perspective and Social Dimensions of Information and Communication Technology Policy Chrisanthi Avgerou, Matthew L. Smith, Peter van den Besselaar, 2008-08-27 This book constitutes the proceedings of the 8th International Conference on Human Choice and Computers held in Pretoria South Africa The IFIP series publishes state of the art results in the sciences and technologies of information and communication The scope of the series includes foundations of computer science software theory and practice education computer applications in technology communication systems systems modeling and optimization information systems computers and society computer systems technology security and protection in information processing systems artificial intelligence and human computer interaction Proceedings and post proceedings of refereed international conferences in computer science and interdisciplinary fields are featured These results often precede journal publication and represent the most current research The principal aim of the IFIP series is to encourage education and the dissemination and exchange of information about all aspects of computing Governing European Communications Maria Michalis, 2007-10-08 The liberalization of communications markets especially from the 1980s onward has witnessed increased regulatory activity within but also above the national state By examining the European case concentrating on the European Union the most advanced example of regionalism Governing European Communications enhances understanding of the trend toward above the national state regulation its drivers and its limitations Analyzing in detail the origins dynamics and evolution of European level communications governance in the postwar era Michalis offers a single comprehensive and up to date account of telecommunications and television policies and regulation and their technological convergence **European Media Policy for the Twenty-First Century** Seamus Simpson, Manuel Puppis, Hilde van den Bulck, 2016-01-29 Media policy issues sit at the heart of the structure and functioning of media systems in Europe and beyond This book brings together the work of a range of leading media policy scholars to provide inroads to a better understanding of how effective media policies can be developed to ensure a healthy communication sector that contributes to the wellbeing of individual citizens as well as a more democratic society Faced with a general atmosphere of disillusionment in the European project one of the core questions tackled by the volume s contributors is what scope is there for European media policy that can exist beyond the national level Uniquely the volume s

chapters are structured around four key policy themes media convergence the continued role and position of public regulatory intervention in media policy policy issues arising from the development of new electronic communication network environments and lessons for European media policy from cases beyond the EU In its chapters the volume provides enriched understandings of the role and significance of policy actors institutions structures instruments and processes in communication and media policy

The Arab Spring, Civil Society, and Innovative Activism Cenap Çakmak, 2016-12-09 This book investigates the role of society groups in the making of the Arab Spring and under which conditions they attained their goals Democracy and recognition of human rights and fundamental freedoms seem to be the main drives of the people organized in form of civil groups or grassroots movements in the Arab Spring countries but it is essential to identify when they find it suitable to take such extreme action as taking the streets in an attempt to take down the repressive regimes It is also important to investigate what methods they relied on in their action and how they challenged the state and the government A review of the cases in this volume shows that civil society has certain limitations in its action Analysis of the cases also challenges a commonly held assumption that the Arab world does not have strong and rich civil society tradition However for a lasting success and consolidation of democracy something more than civil society action is obviously needed A strong organized opposition and a democratic culture seems to be indispensable elements for the evolution of a democratic order and tradition

The European Public Sphere and the Media A. Triandafyllidou, R. Wodak, Michał Krzyżanowski, 2009-06-25 This book contributes to the theoretical and policy debate on the existence of a European public sphere It presents a critical discussion of the links between media history and politics in Europe today examining the reorganization of ideological and political dimensions and debates the existence of a European editorial culture

Raymond Williams's Sociology of Culture P. Jones, 2003-12-19 This detailed study of Williams unlocks his late sociology of culture It covers previously overlooked aspects such as his critique of Birmingham cultural studies his use of an Adorno like approach to cultural production his social formalist alternative to structuralism and post structuralism and his approach to the media

Economic and Political Contention in Comparative Perspective Maria Kousis, Charles Tilly, 2015-12-03 European and American specialists in economic and political processes move beyond earlier debates to look seriously systematically and innovatively at social change and protest with particular attention to the influence of economic change and variation on contentious politics The essays take up two widely recognized but much contested questions in contentious politics how threats and opportunities faced by potential participants in joint political action affect the likelihood character and consequences of that action and how economic change and variation either constitute significant political threats and opportunities or shape responses to political threats and opportunities Contributors Maria Kousis Charles Tilly Marc Giugni Julie Berclaz Marc Steinberg Jeffery Broadbent Klaus Eder John K Glenn Dieter Rucht Richard Hogan Maryjane Osa Cristina Corduneanu Husi

The Handbook of European Communication History Klaus Arnold, Paschal Preston, Susanne

Kinnebrock,2019-09-06 A groundbreaking handbook that takes a cross national approach to the media history of Europe of the past 100 years The Handbook of European Communication History is a definitive and authoritative handbook that fills a gap in the literature to provide a coherent and chronological history of mass media public communication and journalism in Europe from 1900 to the late 20th century With contributions from teams of scholars and members of the European Communication Research and Education Association the Handbook explores media innovations major changes and developments in the media systems that affected public communication as well as societies and culture The contributors also examine the general trends of communication history and review debates related to media development To ensure a transnational approach to the topic the majority of chapters are written not by a single author but by international teams formed around one or more lead authors The Handbook goes beyond national perspectives and provides a basis for more cross national treatments of historical developments in the field of mediated communication Indeed this important Handbook Offers fresh insights on the development of media alongside key differences between countries regions or media systems over the past century Takes a fresh cross national approach to European media history Contains contributions from leading international scholars in this rapidly evolving area of study Explores the major innovations key developments differing trends and the important debates concerning the media in the European setting Written for students and academics of communication and media studies as well as media professionals The Handbook of European Communication History covers European media from 1900 with the emergence of the popular press to the professionalization of journalists and the first wave of multimedia with the advent of film and radio broadcasting through the rapid growth of the Internet and digital media since the late 20th century

Coming to Terms with Chance Oscar H. Gandy,2016-05-23 The application of probability and statistics to an ever widening number of life decisions serves to reproduce reinforce and widen disparities in the quality of life that different groups of people can enjoy As a critical technology assessment the ways in which bad luck early in life increase the probability that hardship and loss will accumulate across the life course are illustrated Analysis shows the ways in which individual decisions informed by statistical models shape the opportunities people face in both market and non market environments Ultimately this book challenges the actuarial logic and instrumental rationalism that drives public policy and emphasizes the role that the mass media play in justifying its expanded use Although its arguments and examples take as their primary emphasis the ways in which these decision systems affect the life chances of African Americans the findings are also applicable to a broad range of groups burdened by discrimination
