Resistance and Reaction Shirin Rai,1991 *Shanghai in Transition* Jos Gamble,2005-07-27 In the decades following the introduction of Communist Party rule in Shanghai in 1949 the city's economy infrastructure and links with the world all atrophied However the past decade has seen far reaching economic reforms implemented to recreate Shanghai as a cosmopolitan world financial and trade centre This book focuses on the lives of local residents and their perceptions of their changing city and presents an evocative series of ethnographic perspectives of the city's shifting sociological landscape in this period of transition *China's Universities, 1895-1995* Ruth Hayhoe,2017-12-12 This reissue 1996 provides an in depth analysis of the development of the Chinese university during the twentieth century a period of momentous social economic cultural and political change It brings together reflections on the Chinese university and its role in the two great experiments of modern China Nationalist efforts to create a modern state as part of capitalist modernisation and the Communist project of socialist construction under Soviet tutelage In addition to these two frames of discourse other models and patterns are examined for instance the persistence of cultural patterns or Maoist revolutionary thought [Rebellions and Revolutions](#) Jack Gray,2002 This is a study of China from the 1800s to the present day It focuses on China's problems of development the decay and collapse of the Chinese Empire its failure to recover in the first half of the twentieth century and its rapid emergence in world affairs since the Communist Party Revolution of 1949 This new edition examines economic growth updates Chinese foreign policy provides a revised account of the Tiananmen Incident and brings the chronology completely up to date **Intellectuals and the State in Post-Mao China** K. opportunities in higher education for different social groups during China's transition from the socialist regime to a market economy. The first part of the book provides a historical and comparative analysis of the development of the idea of meritocracy since its early origins in China and in more recent western thought. The second part then explores higher education reforms in China, the part played by supposedly meritocratic forms of selection and the implications of these for social mobility. Based on original empirical data, Ye Liu sheds light on the socio-economic gender and geographical inequalities behind the meritocratic facade of the Gaokao. Liu argues that the Chinese philosophical belief in education-based meritocracy had a modern makeover in the Gaokao and that this ideology induces working class and rural students to believe in upward social mobility through higher education. When the Gaokao broke the promise of status improvement for rural students, they turned to the Chinese Communist Party and sought political connections by actively applying for its membership. This book reveals a bleak picture of visible and invisible inequality in terms of access to and participation in higher education in contemporary China. Written in an accessible style, it offers a valuable resource for researchers and non-specialist readers alike.

Women and Politics in the Third World Haleh Afshar, 2005-07-26. *Women and Politics in the Third World* is the first comprehensive textbook on women's political activities in the third world. It provides a feminist analytical perspective on the specific forms of resistance, organisation and negotiation by women in third world states. Using case studies, the book focuses on difference as a theoretical basis for investigating feminine political activism. Though Western analysts have attributed weakness to terms such as motherhood, marriage and domesticity as choices made by non-Western women, the contributors show that such strategies are used by women to pursue particular goals such as seeking resources, welfare or freedom from oppression for their children. These strategies, the book suggests, should not be classified as unimportant or temporary and can be highly effective even within such discourses as Islamic fundamentalism. The contributors highlight differing political approaches in regions as diverse as Latin America, South East Asia, China and the Middle East.

Obedient Autonomy Erika E.S. Evasdottir, 2007-10-01. In the west, the idea of autonomy is often associated with a sense of freedom, a self-interested state of being unfettered by rules or obligations to others. This original anthropological study explores a type of obedient autonomy that thrives on setbacks, blossoms as more rules are imposed and flourishes in adversity. *Obedient Autonomy* analyzes this model and explains its precepts through examining the specialized and highly organized discipline of archaeology in China. The book follows Chinese students on their journey to becoming full-fledged archaeologists in a bureaucracy-saturated environment. Often required to travel in teams to the countryside, archaeologists are uniquely obliged to overcome divisions among themselves, between themselves and their peasant workers, and between themselves and bureaucratic officials. This analysis reveals how these interactions provide teachers of archaeology with stories used to foster obedient autonomy in their students. Moreover, it demonstrates how this form of autonomy enables a person to order and control their future careers in what appears to be a disorderly and uncertain world.

A masterly contextualization of archaeology in China Obedient Autonomy shows how the discipline has accommodated itself to a Chinese social structure and uncovers the moral ethical political and economic underpinnings of that context It will be accessible to students of anthropology even as it will provoke Euro American archaeologists and interest social theorists of science philosophers gender theorists and students of Chinese society
