Therapeutic Failures in Psychotherapy

Nicola Gazzola, Shigeru Iwakabe, Sarah Knox, 2023-10-17 This book examines therapeutic failures in psychotherapy Despite the consistent positive outcome findings and psychotherapists best intentions in their efforts to help their clients psychotherapy simply does not work in all cases In fact 5 10% of adult clients deteriorate during psychotherapy Although not exclusively due to treatment failures per se almost a fifth of clients terminate their therapy prematurely and findings suggest that that between 20 and 30% of clients do not return after the first session with half terminating after just two sessions Therapeutic failures could include a range of negative therapy outcomes such as harm deterioration client non response premature termination or dropout as well as process factors such as negative therapy experiences impasses or alliance ruptures Investigating therapeutic failures holds the key to improving the effectiveness of psychotherapy as well as understanding some of the fundamental conditions that need to be in place for the change mechanisms of psychotherapy to take effect Although psychotherapy has made many strides over the last few decades to improve research rigour and to promote evidence based practices it is a profession that is still growing By embracing the opportunity to learn from therapeutic failures the profession will continue to refine its practices to better serve clients and to strive toward developing ethical and effective practices Both comprehensive and accessible this book will be of great interest to psychotherapists in practice therapists in training as well as students and professionals in psychology and mental health in general The chapters in this book were originally published in *Counselling Psychology Quarterly*
