Resource-Allocation Behavior Harvey J. Langholtz,Antoinette T. Marty,Christopher T. Ball,Eric C. Nolan,2012-12-06 Despite the increasing necessity for information on allocating dwindling resources resource allocation behavior is not nearly so well understood as choice behavior selection from two or more already defined alternatives events or lotteries Although there have been scores of books devoted to the optimal model for making resource allocation decisions there has never been a book discussing the cognitive aspects of this behavior This book answers the question of how people make such decisions while explaining how Linear Programming can be applied within the context of resource allocation It also takes the reader step by step into several types of problems under varying conditions including harsh and benign environments maximization and minimization multi dimensional and cyclical problems Resource-allocation Behavior when Gains and Losses are Possible Harvey J. Langholtz,1991 **Resource-allocation Behavior when Payoff is Not Equal** Eric C. Nolan,2000

Resource Allocation Behavior by Channel Members Erin Anderson,Leonard M. Lodish,Barton A. Weitz,Wharton School. Marketing Department,1985 *The Good, the Bad, and the Just* Riël Vermunt,2016-03-16 Drawing on multidisciplinary findings and ideas this book discusses fair allocation of social resources such as goods services and information in a novel and integrated way The role of the essential features of allocation behavior motivation cognition and emotion as well as morality and reactions to perceived unfairness are examined in the newly developed Justice Model The author offers explanations as to why how and to what extent people in an effort to attain justice allocate social resources between self and others and among others It is held that the allocation event featuring actor recipient and observer as well as the resources to be allocated by an actor can function as a guideline for the essentials of fair behavior The work explores the conditions under which an actor may deviate from a just division of social resources thus instigating a reaction from recipients and observers The study covers various levels of analysis ranging from the intra personal to the societal The book will be of interest to academics and researchers working in the areas of crime law justice public policy and governance **Chinese Economy in Disequilibrium** Yining Li,2013-11-25 Known internationally as Mr Shareholding economist Li Yining has had a transformative impact on China s economic transition most notably as an early advocate of ownership reform and in his promotion of shareholding theory By examining the interrelationship between the government enterprises and the market Chinese Economy in Disequilibrium presents an in depth discussion on the issues of resource allocation industrial structure institutional innovation and economic fluctuation in the current Chinese economy under the condition of disequilibrium Credited with developing the theory of economic disequilibrium Professor Li distinguishes two types of disequilibrium on the basis of whether or not the majority of firms in the economy are viable profit makers In Chinese Economy in Disequilibrium Professor Li points out that not only has China s economy been in a state of disequilibrium but it also has issues with enterprises not being under budget constraint Given the limitations of market regulation under economic disequilibrium

Professor Li advocates the reform of the enterprise system and upholds the government's leading role in the establishment of order in the socialist commodity economy. A number of measures are also proposed with the aim of facilitating the transition of China's economy from disequilibrium to equilibrium. The central theme is that the reform and transition are means to serve economic growth and social development which would eventually benefit the ordinary citizens in society. Yining Li is a Professor of Economics and Emeritus Dean of Peking University's Guanghua School of Management. He is one of China's foremost economists and the author of twenty books and numerous articles on a wide range of economic subjects including reform and development in China. He has received a number of prestigious awards and honours for his research. As the leading proponent of a market economy in China, Professor Li has had a tremendous influence on China's economic reform policy over the last three decades. He has served on the Standing Committee of the National People's Congress of China and is currently Vice Chairman of the Economic Committee of the Chinese People's Political Consultative Conference.
