Resource-Sensitivity, Binding and Anaphora Geert-Jan M. Kruijff, Richard T. Oehrle, 2012-12-06 Geert Jan Kruijff Richard T Oehrle A categorial grammar is both a grammar and a type inference system As a result of this duality the categorial framework offers a natural setting in which to study questions of grammatical composition both empirically and abstractly There are affinities in this perspective of course to basic questions in formal language theory But the fact that categorial grammars are type inference systems makes possible intrinsic connections among syntactic types syntactic type inference semantic types and semantic type inference a connection less apparent in the standard constructions of formal language theory Fixing a system of grammatical type inference T we may explore what grammatical phenomena are compatible with T and equally what grammatical phenomena are not Equally fixing a class of grammatical phenomena g we may seek to ascertain what systems of type inference characterize g This dual perspective is a strong current in the categorial literature going back to the classical papers of Ajdukiewicz Bar Hillel Curry and Lambek

Dynamic Semantics Paul J.E. Dekker, 2012-07-03 The integrated theory of dynamic interpretation set out here will be a surprise to advanced researchers in linguistics It combines classical formal semantics and modern dynamic semantics without altering the fundamental paradigm At the book's core lies a pragmatically motivated notion of a dynamic conjunction of meanings an idea that is worked out in full formal detail This is applied to linguistic phenomena that involve anaphora quantification and modality The author demonstrates that in each area of application existing data can be neatly combined with new dynamic insights but more importantly there is a genuine further pay off the work generates treatments of phenomena that were not initially intended with functional readings of pronouns and quantifiers Hob Nob sentences and insights into what we now call Pierce's Puzzle The outcome of a decade of work by the Amsterdam School of dynamic semantics this volume condenses and reflects upon a vital body of research

Quantification Anna Szabolcsi,2010-01-17 Quantification forms a significant aspect of cross linguistic research into both sentence structure and meaning This book surveys research in quantification starting with the foundational work in the 1970s It paints a vivid picture of generalized quantifiers and Boolean semantics It explains how the discovery of diverse scope behaviour in the 1990s transformed the view of quantification and how the study of the internal composition of quantifiers has become central in recent years It presents different approaches to the same problems and links modern logic and formal semantics to advances in generative syntax A unique feature of the book is that it systematically brings cross linguistic data to bear on the theoretical issues covering French German Dutch Hungarian Russian Japanese Telugu Dravidian and Shupamem Grassfield Bantu and points to formal semantic literature involving quantification in around thirty languages
