Responsible Technology A Christian Perspective:

Responsible Technology Stephen V. Monsma, Calvin Center for Christian Scholarship, 1986 This is a print on demand book and is therefore non returnable This book provides a multi disciplinary Christian analysis of the forces shaping the operation of modern technology and offers an alternative framework of biblically rooted normative principles It argues that technology is a value laden activity and presents principles for basing it on God s will **Christian Ethics in a Technological Age**

Brian Brock, 2010-06-28 Through close analysis of the historical and conceptual roots of modern science and technology Brian Brock here develops a theological ethic addressing a wide range of contemporary perplexities about the moral challenges raised by new technology *Technology and Christianity* Egbert Schuurman, 2024-08-27 The Enlightenment of the 18th century ushered in a new order of the ages one in which man displaced God as the central focus of both thought and practice This has had consequences For one thing man has taken up the supposedly vacated role of Providence How has he done it Not least by gaining an increasing mastery over nature a mastery enabled by technology The tools provided by technology have undeniably brought great blessing but they have also brought new and unprecedented problems Such powerful tools have given mankind opportunities for good but also for evil and he has taken advantage of both In this series of articles written and published over a period of 50 years Egbert Schuurman elucidates this complex and difficult relationship Technology has generated a material culture capable of providing undreamed of wealth and welfare but likewise has brought labor displacement environmental damage weaponry of devastating destructive capacity and possibilities of societal control only dreamed of by history s tyrants Schuurman expands on all of these consequences and he does so from a unique perspective that of the once dominant but since displaced perspective of Christianity In doing so he demonstrates not only that there are opportunities as well as difficulties involved in the ever expanding dominance of technology but also that Christianity can provide the framework for properly assessing and implementing the responsible application of technology But for this to happen the sorcerer s apprentice needs to recognize his utter dependence on his Creator and Redeemer

Technology and Responsibility P.T. Durbin, 2013-03-09 Since it may seem strange for a new series to begin with volume 3 a word of explanation is in order The series Philosophy and Technology inaugurated in this form with this volume is the official publication of the Society for Philosophy the one requirement is that the scholarship be sound and all contributions to the series are subject to rigorous blind refereeing Technology the other half of the philosophy and technology pairing is also construed broadly The Imaginationless Generation Nachshon Goltz, Tracey Dowdeswell, 2019-03-19 In the present day Tower of Babylon the all encompassing virtual world built of image layered upon image children are the most vulnerable users If we permit them unfettered access to media that promotes corporate and consumer values while suppressing their cognitive development and creative imagination then an imaginationless generation may be our grim and inevitable future This book takes the reader whether an academic a parent or an educator through a startling journey from the harms lurking

in the virtual worlds to children's health and well being to how they deal with representations of violence and sexuality as well as exposure to cyberbullying advertising Internet Addiction Disorder and even exploitation The most dangerous harm is unseen and affects the innermost realm of a child's psyche the imagination The authors discuss the current global regulatory framework that makes the protection of children ever more challenging They discuss lessons learned from the ways that courts have negotiated free speech issues as well as the research on parental mediation of children's Internet use in the home Finally they move towards a bold new attempt at understanding regulation by drawing lessons for new media from ancient culture In *The Imaginationless Generation* the authors pioneer an attempt to address the real harms that children face in virtual realities by presenting a new and paradigm shifting theory the Media Engagement They follow the theory's insights and predictions to offer a new perspective on a burning question of our time how to protect children online This multidisciplinary intellectual voyage and its insights are only possible by standing on the shoulders of scholars who have gone before such as Ellul Baudrillard McLuhan Postman and Piaget to name a few As academics parents and concerned human beings the authors present here the results of more than twenty years of research in a way that should appeal to a wide variety of readers as they stretch our understanding of the human machine interface beyond right and wrong This book shapes our understanding of media in the digital age in much the same way that McLuhan's *Understanding Media* did for a previous generation

The Outrageous Idea of Christian Scholarship George M. Marsden, 1997-03-13 At the end of his 1994 book *The Soul of the American University* George Marsden advanced a modest proposal for an enhanced role for religious faith in today's scholarship This unscientific postscript helped spark a heated debate that spilled out of the pages of academic journals and *The Chronicle of Higher Education* into mainstream media such as *The New York Times* and marked Marsden as one of the leading participants in the debates concerning religion and public life Marsden now gives his proposal a fuller treatment in *The Outrageous Idea of Christian Scholarship* a thoughtful and thought provoking book on the relationship of religious faith and intellectual scholarship More than a response to Marsden's critics *The Outrageous Idea of Christian Scholarship* takes the next step towards demonstrating what the ancient relationship of faith and learning might mean for the academy today Marsden argues forcefully that mainstream American higher education needs to be more open to explicit expressions of faith and to accept what faith means in an intellectual context While other defining elements of a scholar's identity such as race or gender are routinely taken into consideration and welcomed as providing new perspectives Marsden points out the perspective of the believing Christian is dismissed as irrelevant or worse antithetical to the scholarly enterprise Marsden begins by examining why Christian perspectives are not welcome in the academy He rebuts the various arguments commonly given for excluding religious viewpoints such as the argument that faith is insufficiently empirical for scholarly pursuits although the idea of complete scientific objectivity is considered naive in most fields today the fear that traditional Christianity will reassert its historical role as oppressor of divergent views and the received dogma of the

separation of church and state which stretches far beyond the actual law in the popular imagination Marsden insists that scholars have both a religious and an intellectual obligation not to leave their deeply held religious beliefs at the gate of the academy Such beliefs he contends can make a significant difference in scholarship in campus life and in countless other ways Perhaps most importantly Christian scholars have both the responsibility and the intellectual ammunition to argue against some of the prevailing ideologies held uncritically by many in the academy such as naturalistic reductionism or unthinking moral relativism Contemporary university culture is hollow at its core Marsden writes Not only does it lack a spiritual center but it is without any real alternative He argues that a religiously diverse culture will be an intellectually richer one and it is time that scholars and institutions who take the intellectual dimensions of their faith seriously become active participants in the highest level of academic discourse Whether the reader agrees or disagrees with this conclusion Marsden's thoughtful well argued book is necessary reading for all sides of the debate on religion's role in education and culture

Discipleship of the Mind James W. Sire, 1990-04-04 Discussing worldview thinking the foundations of knowledge and the relationship between knowing and doing James W Sire shows Christians how to honor God with their minds

Biotechnology and the Human Good C. Ben Mitchell, 2007-04-23 Some of humankind's greatest tools have been forged in the research laboratory Who could argue that medical advances like antibiotics blood transfusions and pacemakers have not improved the quality of people's lives But with each new technological breakthrough there comes an array of consequences at once predicted and unpredictable beneficial and hazardous Outcry over recent developments in the reproductive and genetic sciences has revealed deep fissures in society's perception of biotechnical progress Many are concerned that reckless technological development driven by consumerist impulses and greedy entrepreneurialism has the potential to radically shift the human condition and not for the greater good Biotechnology and the Human Good builds a case for a stewardship deeply rooted in Judeo Christian theism to responsibly interpret and assess new technologies in a way that answers this concern The authors jointly recognize humans not as autonomous beings but as ones accountable to each other to the world they live in and to God They argue that to question and critique how fields like cybernetics nanotechnology and genetics might affect our future is not anti science anti industry or anti progress but rather a way to promote human flourishing common sense and good stewardship A synthetic work drawing on the thought of a physician ethicists and a theologian Biotechnology and the Human Good reminds us that although technology is a powerful and often awe inspiring tool it is what lies in the heart and soul of who wields this tool that truly makes the difference in our world
