Responsive Evaluation Vol 92 New Directions For Evaluation:

Evaluation Roots Marvin C. Alkin, 2012-04-12 Evaluation Roots A Wider Perspective of Theorists Views and Influences Second Edition provides an updated examination of current evaluation theories and traces their evolution Marvin C Alkin shows how theories build upon theories and how the theories are related to each other The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory In addition to the editor s overview the book contains essays by leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree All royalties from sales of this book are donated to support the AEA Research on Evaluation Student Award

Responsive Evaluation Jennifer C. Greene, Tineke A. Abma, 2002-01-21 With his 1973 address titled Program Evaluation Particularly Responsive Evaluation Robert Stake offered a new vision and rationale for educational and social program evaluation In this vision evaluation was reframed from the application of sophisticated analytic techniques that address distant policymakers questions of program benefits and effectiveness on the average to an engagement with on site practitioners about the quality and meaning of their practice These innovative ideas helped accelerate a transformation of the evaluation enterprise into its current pluralistic character within which remain multiple and varied legacies of key responsive evaluation principles This volume offers some of those legacies representing central epistemological artistic and political dimensions of Stake s original commitment to responsiveness This is the 92nd issue of the Jossey Bass series New Directions for Evaluation

The SAGE Handbook of Evaluation Ian Shaw, Ian Graham Ronald Shaw, Jennifer C Greene, Melvin M Mark, 2006-07-27 In this comprehensive handbook an examination of the complexities of contemporary evaluation contributes to the ongoing dialogue that arises in professional efforts to evaluate people related programs policies and practices The SAGE Handbook of Evaluation is a unique and authoritative resource consisting of 25 chapters covering a range of evaluation theories and techniques in a single accessible volume With contributions from world leading figures in their fields overseen by an eminent international editorial board this handbook is an extensive and user friendly resource

Standards-Based and Responsive Evaluation Robert E. Stake, 2003-10-30 We can be grateful that Dr Stake decided to cap his distinguished career by sharing his ideas in writing This is a book that evaluators will want to have in their personal library It tells us a lot about our field highlights contrasting ways of evaluating without pitting one against the other and manages to remind us why many of us chose this line of work in the first place

EVALUATION AND PROGRAM PLANNING Authored by a master writer and evaluator Standards Based and Responsive Evaluation explores the many conceptual choices an evaluator needs to make when doing an evaluation devoting attention to stakeholders weighing ethical risks and writing a useful report The book begins with the main strategic choices an evaluator needs to make between approaches quantitatively by explicating criteria needs standards and performances or qualitatively by studying the activity aspirations problems and accomplishments of the participants and critical observers After reading the text students will have

a better appreciation of evaluation as a process that needs to be custom fit to the situation Throughout the book Stake presents evaluation as a series of choices for the reader To remain independent or to join with program staff or stakeholders To value personal experience as evidence or to shun it as biased To aid development formatively or to assess the existing program summatively To use issues goals gains efficiency or problem solving as the key conceptual structure To invest small or large in trying out and validating data gathering procedures To support the standards and ethical codes of professional associations Standards Based and Responsive Evaluation will prove an essential text for program evaluation courses in education nursing social work psychology sociology communication and anthropology Experienced researchers and professional evaluators will also find this an invaluable reference for a more experiential interpretive approach to evaluation work and policy setting Key Features Provides readers with the tools they need to make choices while practicing evaluation Employs quotations poetry and cartoons to help the reader experience the concepts of evaluation Includes boxed examples from a variety of cases giving readers the opportunity to compare an actual evaluation situation with one in which they may be engaged Allows readers to access extensive examples of evaluation reports coding excerpts and more through a complementary Web site appendix

Evaluation Practice Reconsidered Thomas A. Schwandt, 2002 Taken collectively the ideas explored here suggest a way of reasoning about and engaging in evaluation that is not bound either to the characterization of evaluation as applied social science or to efforts to foster the development of evaluation as a professional practice of experts Rather the book explores evaluation as practical hermeneutics

Critical Issues in Youth Work Management Jon Ord, 2013-06-17 This valuable textbook communicates the complexities and controversies at the heart of youth work management exploring key issues in a critical fashion Written by a team of experienced youth work lecturers the chapters cover topics such as planning evaluation and supervision whilst acknowledging the changing structures of integrated services and the impact of public service reform Divided into three sections it covers Historical and theoretical context Critical practice issues including leadership policy constraints planning and accountability Managing in different settings for instance integrated services and the voluntary sector Aimed at both youth work students studying for their professional qualification as well as practicing managers Critical Issues in Youth Work Management encourages critical thinking about what management in youth work is and what it can be It includes reflective questions and further reading and case studies are integrated throughout

Evaluation for a Caring Society Merel Visse, Tineke A. Abma, 2018-02-01 This book highlights views on responsive participatory and democratic approaches to evaluation from an ethos of care It critically scrutinizes and discusses the invisibility of care in our contemporary Western societies and evaluation practices that aim to measure practices by external standards Alternatively the book proposes several foci for evaluators who work from a care perspective or wish to encourage a caring society This is a society that sees evaluation and care as a continuously unfolding relational practice of moral political learning contributing to life sustaining webs At one level is the evaluator s immediately

responsive and interpersonal encounter with the personal troubles of social actors most visible as Mills originally pointed out in an individual's biography and in those social settings directly open to the individual's lived experience. At another level the sociological and political level the evaluator operates at what Mills called the arena of public issues where immediate personal troubles are seen not only as problems encountered by individuals but as the result of structural and political arrangements in society. Evaluation for a caring society is thought to operate at both levels. Thomas A. Schwandt, Professor Emeritus, University of Illinois at Urbana-Champaign. The intricate relationship between evaluation and care is hardly addressed by evaluators or caregivers. This book fills a gap as it focuses on the relationship between evaluation and care and provides a multitude of examples of evaluation as a caring practice. The book can serve as an antidote to the present-day haste in social practices and contribute in form and content to developing an evaluation practice which may foster a caring society. Guy Widdershoven, Professor of Philosophy and Ethics of Medicine and head of the Department of Medical Humanities at VU University Medical Center, VU University Amsterdam.

The SAGE Handbook of Qualitative Research Norman K. Denzin, Yvonna S. Lincoln, 2011-04-27. Now in its fourth edition, this handbook is an essential resource for those interested in all aspects of qualitative research and has been extensively revised and updated to cover new topics including applied ethnography, queer theory, and auto-ethnography.

Critical Essays in Music Education Marvelene C. Moore, 2017-07-05. This volume of essays references traditional and contemporary thought on theory and practice in music education for all age groups from the very young to the elderly. The material spans a broad range of subject areas from history and philosophy to art and music and addresses issues such as curriculum, pedagogy, assessment, and evaluation as well as current issues in technology and performance standards. Written by leading researchers and educators from diverse countries and cultures, this selection of previously published articles, research studies, and book chapters is representative of the most frequently discussed and debated topics in the profession. This volume, which documents the importance of lifelong learning, is an indispensable reference work for specialists in the field of music education.

Evaluating Program Effectiveness Marc T. Braverman, 2022-10-26. The book shows how to apply validity concepts when planning and conducting an evaluation, thereby making sure that the evaluation stays true to the purposes for which it was initiated. Marc T. Braverman demonstrates that evaluating with validity means being able to answer the evaluation questions in a way that is useful, accurate, and reflective of the information needed from the evaluation. His approach is practical with the goal of helping evaluators to conduct high-quality outcome evaluations, and he illustrates concepts with case study examples drawn from studies of intervention effectiveness over many years. The book begins by looking at the ways that validity is conceptualized and the uses to which it is put. Subsequent chapters analyze separate phases of the outcome evaluation process and the critical decisions about design and analysis that are typically required.
