Multicampus University Systems Ishmael I. Munene, 2014-08-27 In the face of increasing social demand and cutbacks in state budgetary support universities in African countries are now turning towards a multicampus system strategy As African governments have adopted neoliberal education policies that place premium on entrepreneurialism profit making privatization and markets as drivers of university development a reshaping of the academic work and organizational framework have taken place However little is known about the impact of this paradigm shift on access quality and governance in higher education This book fills the void in research and academic knowledge about the impact of the emerging university configurations in Africa It analyzes the paradox surrounding the performance of multicampus university systems as avenues of broadening university access but whose structural success may be qualitatively contested This book offers a refreshing examination of the African multicampus university system from both an African and global perspective It makes use of empirical data from Kenya collected during extensive fieldwork along with substantive library and documentary resources on the rest of the continents to fortify arguments and demonstrate important conclusions This allows for a comparative analysis of policies and strategies used in the establishment of campuses both within and beyond national boundaries in the continent and will be a welcome contribution to the existing repertoire on African universities

Higher Education Systems 3.0 Jason E. Lane, D. Bruce Johnstone, 2013-10-01 A comprehensive examination of higher education multi campus systems and their role in improving state economies and communities This thought provoking volume brings together scholars and system leaders to analyze some of the most pressing and complex issues now facing higher education systems and society Higher Education Systems 3.0 focuses on the remaking of higher education coordination in an era of increased accountability greater calls for productivity and intensifying fiscal austerity System heads have been identifying ways to harness the collective contributions of their various institutions to benefit the students communities and other stakeholders that they serve The contributors explore the recent dynamics of higher education systems focusing particularly on how systems are now working to improve their effectiveness in educating students and improving our communities while also identifying new means for operating more efficiently This enhanced collaboration or systemness is the key aspect of version 3.0

Maximizing Resources: Universities, Public Policy, and Revenue Production F. King Alexander, 2003-09-22 Today's financial and economic challenges require that higher education leaders become prudent fiscal managers and aggressive revenue generators Maximizing and forecasting revenue has become an important item on the agenda for every strategic planning and institutional research team Private institutions strive to maximize public resources through tuition based government programs while public institutions maneuver to exploit private revenues This volume presents edited versions of some of the best papers/articles from a forum on institutional revenue production sponsored by the Cornell Higher Education Research Institute (CHERI) The chapters provide different perspectives on revenue generation and how institutions are struggling to find an appropriate balance between meeting public expectations and maximizing private market forces The problems raised by the contributors do not have simple solutions but we hope that the insights provided about options and alternatives will enable campus leaders institutional researchers and policy makers to better understand evolving patterns in public and private revenue reliance
