Restructuring The Labour Market Cambridge Studies In Sociology:

Restructuring the Labour Market D. Ashton, M. Maguire, M. Spilsbury, 2016-07-27 This book represents an advance in our knowledge of the labour market For the first time it combines the analysis of both quantitative and qualitative data to produce an explanation of the main changes which have transformed the labour market during the recession For the first time it demonstrates the segmented character of the youth labour market and the significance of the local labour markets The result is a substantial contribution to labour market segmentation theory and to the analysis of social policy in this field

The Vocational Quest Helen Connell, Nicholas Lowe, Malcolm Skilbeck, Kirsten Tait, 2002-02-07 Government attempts in recent years to create a national system of vocational education and training have marked a profound shift both in educational policy and in underlying concepts of what education is for Relations between schools and the working world are changing all the time and the implementation of ideas of vocationalism has forced a blurring of the time honoured boundaries between educations concerned with concepts and training or with skills The challenge now is to define how the schools can give young people the foundations for life in a working world in which they are likely to have to change jobs and where work will fill a smaller proportion of their lives The Vocational Quest maps the evolution of vocationalism in Britain in historical terms and examines how the particular forms that have come into being in the last few years compare with developments in other parts of the world including Continental Europe Japan the United States Australia and New Zealand It argues for new forms of communication and partnership between formal education and training and the wider community in which values will be shared and no one partner will win at the expense of others

Youth and Policy Howard Williamson, 2019-06-04 First published in 1997 this volume is concerned primarily though not exclusively with one particular vulnerable group unqualified young men on the margins These young men whose cultures of machismo manualism and anti mentalism previously served to prepare them for the manual labour market are increasingly the careerless the jobless and the folk devils of the modern post industrial society In research they have received considerable attention though more for their capacity to be spectacular deviant and bizarre than through the deep anxieties and despondency about the future experienced by many Howard Williamson contends that the development of effective youth policy depends essentially upon a synthesis of political priorities professional agendas and young people s perspectives and responses While not quite an underclass many suffer from a tangle of pathologies which obstructs the possibility of them finding a way back into mainstream economic housing and relationship transitions

Work-place Jamie Peck, 1996-04-06 Challenging the prevailing idea that labor markets are governed by universal economic processes this significant work argues instead that labor markets develop in tandem with social and political institutions and thus function in locally specific ways Focusing on the complex social processes that lie at the heart of the labor market the author offers a provocative new perspective and proposes new ways of conducting research in the area

Hispanics in the Labor Force Edwin Melendez, Clara Rodriguez, Janis B. Figueroa, 2013-11-21 The bright side of the 1980s or the Hispanic decade as it was dubbed early on may ironically turn out to be the detail and sophistication with which the economic and social reversals affecting most Latinos in this period have been tracked with a fresh cohort of Latino scholars playing an increasingly prominent role in this endeavor As this volume conveys these analyses are steadily probing more deeply into the fine grain of the processes bearing on the social conditions of U S Latinos and particularly into the diversity of the experiences of the several Latino origin nationalities until recently generally treated in the aggregate as Hispanics Though still fragmented and tentative in perspective as are the disciplines on which they draw and the research apparatus on which they rest the quest among these new voices for a unifying perspective also comes across in this collection of essays There is manifestly more under way here than a simple demand for inclusion of neglected instances on the margin of supposedly well understood larger or mainstream dynamics The 1990s open with a more confident assertion of the centrality of the Latino presence and Latino actors in the overarching transformations reshaping U S society and especially in the playing out of these restructurings in the regions and cities of Latino concentration *Social Inequalities in Comparative Perspective* Fiona Devine, Mary C. The Contextual Challenges of Occupational Sex Segregation Stephanie Steinmetz, 2011-12-15 This study untangles the complex interplay of individual and contextual factors shaping cross national differences in horizontal and vertical occupational sex segregation It relates the individual factors affecting occupational decisions to the broader social and economic context within a given society Following this approach Stephanie Steinmetz provides a comprehensive overview of the development and causes of cross national differences in occupational sex segregation She offers insights into the positioning of 21 EU Members States particularly of former CCE countries Based on advanced multi level models the study shows that institutional factors such as the organization of educational systems post industrial developments social policies and the national gender culture play a crucial role in shaping sex segregation processes apart from individual factors The author clarifies that a distinct set of institutional factors is relevant to each of the two dimensions of occupational sex segregation and that these factors operate in different directions some reduce horizontal segregation while at the same time aggravating the vertical aspect Finally the study assesses the empirical findings from a political perspective by addressing the future contextual challenges of EU Member States seeking to attain higher gender equality on the labour market
