Antiracism John Solomos, 2024-11-18 While there has been a wealth of research and conversation about the role of racism in shaping our social political and economic structures antiracism its highly publicized counterpart has been very little studied discussed or debated Veteran race scholar John Solomos argues in this slim intervention that we urgently need to re focus research and activist agendas to address this gap in knowledge The core questions addressed in the book include what does antiracism mean in the contemporary environment How do states political institutions and civil society define and practise antiracism What is the role of alliances across race class and gender in shaping possible futures beyond racism Moving beyond the valuable work which has already uncovered the ways in which race and racism are made and re made these questions cut to how to develop meaningful political and policy initiatives framed by antiracist ideas and values If we hope to make sense of the evolution of contemporary racisms in the world around us in order to tackle them head on antiracism needs to be better understood

Re-configuring Anti-racism Yin Paradies, 2018-04-19 In our interconnected world of increasing racial ethnic and religious diversity racism is an enduring phenomenon with a range of pernicious consequences for individuals communities and societies Despite considerable scholarly attention to race and racism there has been relatively little focus on anti racism defined as the theory and practice of addressing racism counteracting its detrimental effects or envisaging its possible alternatives This edited collection explores the re configuration of anti racism in order to better combat racism in modern neo liberal societies Should anti racism focus on tolerance harmony inclusion equality participation recognition acknowledgement indifference and or justice What is the role of everyday race labour the potentials and pitfalls of post raciality and the potential of alter racism via

humour viscosity embodiment and affective atmospheres The eight chapters forming this collection bring together scholars from cultural studies geography philosophy political science race relations and sociology to debate key epistemologies practices and contradictions pertaining to anti racism as a global endeavour This book was originally published as a special issue of *Ethnic and Racial Studies* **Anti-Racism in European Football** Christos Kassimeris,2009-08-10 European societies have long been tarnished by racial discrimination and the game of football is no exception With immigrants arriving from former colonies European Union member states and third world countries integration in these two societies has been ascribed significance across the continent Considering that the conduct of football fans in stadiums reflects to a certain extent society as a whole this book examines the impact of racism upon the popular game *Anti Racism in European Football* provides a critical assessment of the campaigns and related policies of organizations that work to understand racism in football It explores what has been achieved by the organizations campaigns the problems they encountered and how these were overcome In its focus on the work that anti racism organizations carry out this book s original contributions should appeal to professionals in football related NGOs and students and scholars working in social science fields related to racism and sport

Absent the Archive Lia Brozgal,2020-11-04 *Absent the Archive* is the first cultural history devoted to literary and visual representations of the police massacre of peaceful Algerian protesters This corpus or archive includes a variety of cultural texts whose formal diegetic and discursive strategies represent the massacre and its erasure its becoming invisible and its afterlives as a trace a memory a sign

Knowing Otherwise Alexis Shotwell,2015-09-10 Prejudice is often not a conscious attitude because of ingrained habits in relating to the world one may act in prejudiced ways toward others without explicitly understanding the meaning of one s actions Similarly one may know how to do certain things like ride a bicycle without being able to articulate in words what that knowledge is These are examples of what Alexis Shotwell discusses in *Knowing Otherwise* as phenomena of implicit understanding Presenting a systematic analysis of this concept she highlights how this kind of understanding may be used to

ground positive political and social change such as combating racism in its less overt and more deep rooted forms Shotwell begins by distinguishing four basic types of implicit understanding nonpropositional skill based or practical knowledge embodied knowledge potentially propositional knowledge and affective knowledge She then develops the notion of a racialized and gendered common sense drawing on Gramsci and critical race theorists and clarifies the idea of embodied knowledge by showing how it operates in the realm of aesthetics She also examines the role that both negative affects like shame and positive affects like sympathy can play in moving us away from racism and toward political solidarity and social justice Finally Shotwell looks at the politicized experience of one's body in feminist and transgender theories of liberation in order to elucidate the role of situated sensuous knowledge in bringing about social change and political transformation

Critical Issues in Anti-racist Research Methodologies George Jerry Sefa Dei, Gurpreet Singh Johal, 2005 Anti racism studies have blossomed over the years with scholarship and political work reinforcing each other to cement anti racist change But how do we understand anti racist research How is anti racist research methodology different from other methods of research investigation What are the principles of anti racism research This edited collection attempts to provide some answers by bringing together works that examine the perils and desires of anti racist research with a particular focus on the notion of difference and a serious consideration of the race gender class and sexuality intersections implications of educational research
