Rethinking Labor History Lenard R. Berlanstein, 1993 The fundamentals guiding labor historians are under scrutiny today as never before The field has attempted to uncover the socioeconomic conditions that produced labor militancy and class consciousness with scholars focusing on proletarianization the loss of control over the production process as the key to class conflict Currently this entire approach is being questioned In *Rethinking Labor History* nine well known French labor historians join the debate Advocates of both revisionist Marxism and discourse analysis are represented and examples of empirical research emerging from the theoretical disputes are included *Handbook Global History of Work* Karin Hofmeester, Marcel van der Linden, 2017-11-20 Coffee from East Africa wine from California chocolate from the Ivory Coast all those every day products are based on labour often produced under appalling conditions but always involving the combination of various work processes we are often not aware of What is the day to day reality for workers in various parts of the world and how was it in the past How do they work today and how did they work in the past These and many other questions comprise the field of the global history of work a young discipline that is introduced with this handbook In 8 thematic chapters this book discusses these aspects of work in a global and long term perspective paying attention to several kinds of work Convict labour slave and wage labour labour migration and workers of the textile industry but also workers organisation strikes and motivations for work are part of this first handbook of global labour history written by the most renowned scholars of the profession *Ottoman and Republican Turkish Labour History: Volume 17* Touraj Atabaki, Gavin Brockett, 2009-12-17 Examines Ottoman and republican Turkish social and labour history from the end of the nineteenth century to the early 1950s *History and Identity* Stefan Berger, 2022-01-20 This introduction to contemporary historical theory and practice shows how issues of identity have shaped how we write history Stefan Berger charts how a new self reflexivity about what is involved in the process of writing history entered the historical profession and the part that historians have played in debates about the past and its meaningfulness for the present He introduces key trends in the theory of history such as postmodernism poststructuralism constructivism narrativism and the linguistic turn and reveals in turn the ways in which they have transformed how historians have written history over the last four decades The book ranges widely from more traditional forms of history writing such as political social economic labour and cultural history to the emergence of more recent fields including gender history historical anthropology the history of memory visual history the history of material culture and comparative transnational and global history **Social Democracy and the Working Class** Stefan Berger, 2014-06-11 This is a powerful and original survey of German social democracy breaks new ground in covering the movement s full span from its origins after the French Revolution to the present day Stefan Berger looks beyond narrow party political history to relate Social Democracy to other working class identities in the period and sets the German experience within its wider European context This timely book considers both the background and long term perspective on
