Rethinking Technologies:

Rethinking Technologies Verena Andermatt Conley, *Rethinking Technologies* Verena Andermatt Conley, 1993

Grounded on the assumption that the relationship between the arts and the sciences is dictated by technology the essays in *Rethinking Technologies* explore trends in contemporary thought that have been changing our awareness of science technology and the arts

Ecopolitics Verena Andermatt Conley, 2006-07-13 *Ecopolitics* is a study of environmental awareness or non awareness in contemporary French theory Arguing that it is now impossible not to think in an ecological way Verena Andermatt Conley traces the roots of today's concern for the environment back to the intellectual climate of the late 50s and 60s The author considers key texts by influential figures such as Michael Serres Paul Virilio Gilles Deleuze and Felix Guattari Michel de Certeau Henri Lefebvre and Luce Irigaray *Ecopolitics* rehabilitates some ecological components of French intellectual thought of the past thirty years and reassesses French poststructural thinkers who explicitly deal with ecology in their work

Virtual Geographies Mike Crang, Phil Crang, Jon May, 2013-04-15 This book examines the interrelationship between telecommunications and tourism in shaping the nature of space place and the urban at the end of the twentieth century They discuss how these agents are instrumental in the production of homogenous world spaces and how these in turn presuppose new kinds of political and cultural identity *Virtual Geographies* explores how new communication technologies are being used to produce new geographies and new types of space Leading contributors from a wide range of disciplines including geography sociology philosophy and literature investigate how visions of cyberspace have been constructed offer a critical assessment of the status of virtual environments and geographies explore how virtual environments reshape the way we think and write about the world This book sets recent technological developments in a historical and geographical perspective to offer a clearer view of the new vistas ahead

The End of Reading David Trend, 2010 Big changes have been taking place in reading in recent years While American society has become more visual and digital the general state of literacy in America is in crisis with educators and public officials worried about falling educational standards the rising influence of popular culture and growing numbers of non English speaking immigrants But how justified are these worries By focusing on reading this book takes a serious look at public literacy but chooses not to blame the familiar scapegoats Instead *The End of Reading* proposes that in a diverse and rapidly changing society we need to embrace multiple definitions of what it means to be a literate person

Women, Science, and Technology Mary Wyer, Mary Barbercheck, Donna Cookmeyer, Hatice Ozturk, Marta Wayne, 2013-09-11 *Women Science and Technology* is an ideal reader for courses in feminist science studies This third edition fully updates its predecessor with a new introduction and twenty eight new readings that explore social constructions mediated by technologies expand the scope of feminist technoscience studies and move beyond the nature culture paradigm

Internet Culture David Porter, 2013-09-13 The internet has recently grown from a fringe cultural phenomenon to a significant site of cultural production and transformation

Internet Culture maps this new domain of language politics and identity locating it within the histories of communication and the public sphere Internet Culture offers a critical interrogation of the sustaining myths of the virtual world and of the implications of the current mass migration onto the electronic frontier Among the topics discussed in Internet Culture are the virtual spaces and places created by the citizens of the Net and their claims to the hotly contested notion of virtual community the virtual bodies that occupy such spaces and the desires that animate these bodies The contributors also examine the communication medium behind the worlds of the Net analyzing the rhetorical conventions governing online discussion literary antecedents and potential pedagogical applications Business & Sustainability Gabriel Eweje, Martin Perry, 2011-12-06 This volume aims to assist readers to navigate the conceptual maze surrounding discussions of business and sustainability by offering critical reflection on the state of business action for environmental sustainability and providing evidence about what is actually taking place in real localities and businesses *Technics Improvised* Timothy Murray, 2022-02-22 Seeing new media art as an entry point for better understanding of technology and worldmaking futures In this challenging work a leading authority on new media art examines that curatorial and aesthetic landscape to explore how art resists and rewires the political and economic structures that govern technology How do inventive combinations of artistic and theoretical improvisation counter the extent to which media art remains at risk not just from the quarantines of a global pandemic but also from the very viral and material conditions of technology How does global media art speak back to the corporate closures of digital euphoria as clothed in strategies of digital surveillance ecological deprivation and planned obsolescence In *Technics Improvised* Timothy Murray asks these questions and more At the intersection of global media art curatorial practice tactical media and philosophy Murray reads a wide range of creative performances and critical texts that envelop artistic and digital materials in unstable political relations of touch body archive exhibition and technology From video to net art and interactive performance he considers both canonical and unheralded examples of activist technics that disturb the hegemony of biopolitical digital networks by staging the very touch of the unsettling discourse erupting from within In the process critical dialogues emerge between a wide range of artists and theorists from Hito Steyerl Ricardo Dominguez Joan Jonas Isaac Julien Ryoji Ikeda and Shadi Nazarian to Gilles Deleuze Jean Luc Nancy Elizabeth Povinelli Jean Fran ois Lyotard Erin Manning Achille Mbembe and Samuel Weber Brilliantly conceived and argued and eloquently written *Technics Improvised* points the way to how artistic and theoretical practice can seize on the improvisational accidents of technics to activate creativity thought and politics anew Creative Ecologies Hélène Frichot, 2018-12-13 Architect and philosopher Hélène Frichot examines how the discipline of architecture is theorized and practiced at the periphery Eschewing a conventionally direct approach to architectural objects to iconic buildings and big name architects she instead explores the background of architectural practice to introduce the creative ecologies in which architecture exists only in relation to other objects and ideas Consisting of a series of philosophical encounters with architectural practice that are neither neatly located

in one domain nor the other this book is concerned with other ways of doing architecture It examines architecture at the limits where it is muddled by alternative disciplinary influences whether art practice philosophy or literature Frichot meets a range of creative characters who work at the peripheries and who challenge the central assumptions of the discipline showing that there is no core of architecture there is rather architecture as a multiplicity of diverse concerns in engagement with local environments and worlds From an author well known in the disciplines of architecture and philosophy for her scholarship on Deleuze this is a radical accessible and highly original approach to design research deftly engaging with an array of current topics from the Anthropocene to affect theory new materialism to contemporary feminism
