conservation laws in several space dimensions and related numerical schemes The final contribution examines the existence and stability of non isothermal compressible fluids and their relation with incompressible models **Numerical Analysis**

1993 D.F. Griffiths,G.A. Watson,2020-10-07 This volume contains invited papers presented at the 15th Dundee Biennial Conference on Numerical Analysis held at the University of Dundee in June of 1993 The Dundee Conferences are important events in the numerical analysis calendar and the papers published here represent accounts of recent research work by leading numerical analysts covering a wide range of fields of interest The book is a valuable guide to the direction of current research in many areas of numerical analysis It will be of particular interest to graduate students and research workers concerned with the theory and application of numerical methods for solving ordinary and partial differential equations
