Euthanasia and the Right to Die Leonard J. Bahlman,Geraldine D. Nowak,1977 *The Right to Die* Howard Ball,2017-01-26 This book provides a comprehensive and contemporary examination of the right to die issues facing society now that vast improvements in public health care and medicine have resulted in people not only living longer but taking much longer to die often in great pain and suffering In 1900 the average age at which people died in America was 47 years of age the primary causes of death were tuberculosis and other respiratory illnesses In the 21st century as a result of better health care and working conditions as well as advances in medical technology we live much longer as of 2016 about 80 years A much larger proportion of Americans now die from chronic diseases that generally appear at an advanced age such as heart disease cancer or chronic obstructive pulmonary disease COPD Should this fundamental change in human lifespan alter how society and government view right to die legislation What are the pros and cons of giving a mentally competent person who is terminally ill and in great pain the right to end his or her life The Right to Die A Reference Handbook provides a complete examination of right to die issues in the United States that dissects the complex arguments for and against a person's liberty to receive a physician's assistance to hasten death It covers the legal aspects and the politics of the right to die controversy analyzes the battles over the right to die in state and federal courts and supplies primary source documents that illustrate the political medical legal religious and ethical landscape of the right to die Additionally the book examines how members of our society typically die has changed in the past 150 years and how the practice of medicine has evolved over that time explains why the right to die is strongly opposed by many religious groups as well as members of the medical profession considers the slippery slope argument against doctor assisted suicide and identifies the reasons that the disabled the poor the elderly and infirm and some members of ethnic racial and religious minority groups typically fear physician assisted death

Euthanasia, Ethics and the Law Richard Huxtable,2007-11-20 Euthanasia Ethics and the Law argues that the law governing the ending of life in England and Wales is unclear confused and often contradictory It shows that the rules are in competition because the ethical principles underlying them are so diverse and conflicting This book covers topics including the Diane Pretty litigation Lord Joffe's Assisted Dying for the Terminally Ill Bill the advent of death tourism and the real status of involuntary and passive euthanasia in English law
