Reading Leo Strauss Steven B. Smith, 2007-03-01 Interest in Leo Strauss is greater now than at any time since his death mostly because of the purported link between his thought and the political movement known as neoconservatism Steven B. Smith though surprisingly depicts Strauss not as the high priest of neoconservatism but as a friend of liberal democracy perhaps the best defender democracy has ever had Moreover in Reading Leo Strauss Smith shows that Strauss's defense of liberal democracy was closely connected to his skepticism of both the extreme Left and extreme Right Smith asserts that this philosophical skepticism defined Strauss's thought It was as a skeptic Smith argues that Strauss considered the seemingly irreconcilable conflict between reason and revelation a conflict Strauss dubbed the theologico political problem Calling this problem the theme of my investigations Strauss asked the same fundamental question throughout his life what is the relation of the political order to revelation in general and Judaism in particular Smith organizes his book with this question first addressing Strauss's views on religion and then examining his thought on philosophical and political issues In his investigation of these philosophical and political issues Smith assesses Strauss's attempt to direct the teaching of political science away from the examination of mass behavior and interest group politics and toward the study of the philosophical principles on which politics are based With his provocative lucid essays Smith goes a long way toward establishing a distinctive form of Straussian liberalism

New Critical Writings in Political Sociology Alan Scott,2017-03-02 In the third and final volume of this series we examine the implications of the accelerating globalization process for the nation state Are globalization the rise of regional and international institutions and the international agreements on human rights actually reducing and transforming state sovereignty Clearly ethnic racial and religious identities remain salient but how do they correspond to intersect with and overflow continuous nation state spaces that are demarcated by legally recognized borders In what conditions do democratic state building projects actually enhance political civil and social rights and when do they tend to contribute to the consolidation of elite power Should democratic forces put their faith in a cosmopolitan vision of global citizenship especially when they tackle quintessentially international and transnational problems like peace aboriginal rights and the protection of the environment In this volume s collection of contemporary political sociologists key articles we present work that explores the exposure of the nation state and the post World War II world system to global forces *Confronting Mass Democracy and Industrial Technology* John P. McCormick,2002 With a groundbreaking interdisciplinary approach to German political and social theory *Confronting Mass Democracy and Industrial Technology* provides fresh insight into the thought of many of the most influential intellectual figures of the twentieth century Its essays detail the manner in which a wide range of German intellectuals grappled with the ramifications and implications of democracy technology knowledge and control from the late Kaiserreich to the Weimar Republic from the Third Reich and the Federal Republic through recently unified Germany Scholars representing the fields of political science philosophy history law literature and cultural studies devote

essays to the work of Nietzsche Weber Heidegger Lukács Schmitt Marcuse Adorno and Habermas They also discuss the writings of such figures as Brecht and Freud who are not primarily thought of as political theorists and explore the thought of Helmut Plessner and reformist theorists from East Germany who have been little studied in the English language In the process of debating the nature and responsibilities of the modern state in an era of mass politics unparalleled military technology capacity for surveillance and global media presence the contributors question whether technology is best understood as an instrument of human design and collective control or as an autonomous entity that not only has a will and life of its own but one that forms the very fabric of modern humanity Contributors Seyla Benhabib Richard J Bernstein Peter C Caldwell Richard Dienst David Dyzenhaus Andrew Feenberg Nancy S Love John P McCormick Jan Werner Müller Gia Pascarelli William E Scheuerman Steven B Smith Tracy B Strong Richard Wolin
