Ilan Rachum

Rio De Janeiro Brasil:

Military Assistance Program Address Directory System ,1997 **The Dismantling of Brazil's Old Republic** Ilan Rachum,2015-11-17 In the years 1922 1930 Brazil s political and cultural arenas were bestirred by distinct movements of protest and demand for change forcing a great shift in the manner Brazilians perceived themselves and their country and shaping a national climate of opinion which led to a revolution and substantial reforms This book follows the progression of these events with special focus on the rebelling young military officers and the modernist artists highlighting their internal controversies and evolving ideologies Additional coverage is given to the growing demands for change among the urban population particularly as articulated by the daily press and to intellectuals who expressed their opinions on pressing national problems all of which attest to not only a change of ideas but an initial polarization into opposing and rival political currents Unlike other historians the comprehensive answers presented here by the author with regard to the underlying causes of the transition stress the impact of early twentieth century cultural change **Strategies and Tools for a Sustainable Rural Rio de Janeiro** Udo Nehren,Sabine Schlöter,Claudia Raedig,Dietmar Sattler,Helga Hissa,2018-08-16 This book is a compilation of recent developments in land ecosystem and water management in the Brazilian state of Rio de Janeiro The state is located in the biodiversity hotspot of the Atlantic Forest Mata Atl ntica a biome characterized by high biological diversity and endemism At the same time the state of Rio de Janeiro emerged to one of the economic hubs in Latin America This development process has been accompanied by population growth industrialization urbanization as well as consumption and degradation of land and water resources In the past years many efforts have been made to stop or at least slow down these degradation processes and restore degraded environments with the overall goal to bring together sustainable management of natural resources nature conservation and economic development An overview is provided of the different strategies and tools that have been developed in the fields of agriculture ecosystem management and biodiversity integrated water management land restoration disaster risk reduction and climate change adaptation as well as environmental governance and economic instruments This book covers a wide spectrum from applied research to science policy interfaces planning concepts and technical tools and has a model character for other rural areas in Latin America Target groups are scientists practitioners policy makers and graduate students in the field of environmental management The different chapters are written by researchers and practitioners of the German Brazilian project INTECRAL Integrated Eco Technologies and Services for a Sustainable Rural Rio de Janeiro the rural development program Rio Rural under the state secretary for agriculture and animal husbandry as well as invited scientists from Brazilian universities and research institutes It bridges existing gaps between science policies and practice in rural development **Policing Rio de Janeiro** ,1993-09 When in 1808 members of the Portuguese royal entourage arrived in Rio de Janeiro the capital of a colony most had previously known only through administrative reports and balance sheets they encountered a hostile and dangerous

population that included a large number of African slaves One of the institutions they brought from Lisbon was the General Intendancy of Police which was the foundation on which the city's police institutions were built The government met the challenge of bringing the inhabitants of Rio de Janeiro under control with a repressive apparatus that grew along with the problem it was created to solve Policing Rio de Janeiro is a history of one of the fundamental institutions of the modern world through which the power of the state intrudes on public space to control and direct behavior It is also a study of the way people resisted the repressive arm of the state including heretofore unreported cases of slave rebellion as well as forms of everyday resistance The author shows how the historical development of the police of Rio de Janeiro through a dialectic of repression and resistance was part of a more general transition from the traditional application of control through private hierarchies to the modern exercise of power through public institutions Using the rich records which include internal correspondence and official reports of the police system and its civilian counterparts the judicial and jail systems the author explores the point at which repression and resistance collided on the squares streets and back alleys of Brazil's capital city The resulting disturbances served as a catalyst for the formation of institutions and procedures that provided a veneer of modernity over traditional attitudes and relationships protecting and strengthening them In a conceptual context that includes the ideas of Foucault Weber and Gramsci the author goes beyond institutional history to examine the changing social conditions of Rio de Janeiro and the exercise of power by its elites

Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities Thomas Elmqvist, Michail Fragkias, Julie Goodness, Burak Güneralp, Peter J. Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C. Seto, Cathy Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services
