Rise And Fall Of Project Camelot:

The Rise and Fall of Project Camelot Irving Louis Horowitz, 1967 The Rise and Fall of Project Camelot Irving Louis Horowitz, 1985 **Cult of the Irrelevant** Michael C. Desch, 2021-09-28 How professionalization and scholarly rigor made social scientists increasingly irrelevant to US national security policy To mobilize America's intellectual resources to meet the security challenges of the post 9 11 world US Secretary of Defense Robert M Gates observed that we must again embrace eggheads and ideas But the gap between national security policymakers and international relations scholars has become a chasm In *Cult of the Irrelevant* Michael Desch traces the history of the relationship between the Beltway and the Ivory Tower from World War I to the present day Recounting key Golden Age academic strategists such as Thomas Schelling and Walt Rostow Desch's narrative shows that social science research became most oriented toward practical problem solving during times of war and that scholars returned to less relevant work during peacetime Social science disciplines like political science rewarded work that was methodologically sophisticated over scholarship that engaged with the messy realities of national security policy and academic culture increasingly turned away from the job of solving real world problems In the name of scientific objectivity academics today frequently engage only in basic research that they hope will somehow trickle down to policymakers Drawing on the lessons of this history as well as a unique survey of current and former national security policymakers Desch offers concrete recommendations for scholars who want to shape government work The result is a rich intellectual history and an essential wake up call to a field that has lost its way **The Rise and Fall of Project Camelot; Studies in the Relationship Between Social Science and Practical Politics. Edited by Irving L. Horowitz** Irving Louis Horowitz, 1967 **The Rise and the Fall of Project Camelot** Irving Louis Horowitz, 1974 *The rise and fall of Project Camelot. Studies in the relationship between social science and practical politics. Ed. by I.L. Horowitz ,1967*

The Tender Soldier Vanessa M. Gezari, 2014-08-12 Part of the Pentagon's most daring and controversial attempt since Vietnam to bring social science to the Afghanistan battlefield three tough minded American civilians find their humanity tested and their lives forever changed by this little known mission **De-Centering Cold War History** Jadwiga E. Pieper Mooney, Fabio Lanza, 2013-01-25 De Centering Cold War History challenges the Cold War master narratives that focus on super power politics by shifting our analytical perspective to include local level experiences and regional initiatives that were crucial to the making of a Cold War world Cold War histories are often told as stories of national leaders state policies and the global confrontation that pitted a Communist Eastern Bloc against a Capitalist West Taking a new analytical approach this book reveals unexpected complexities in the historical trajectory of the Cold War Contributions from an international group of scholars take a fresh look at historical agency in different places across the world including Africa Asia Europe and the Americas This collaborative effort shapes a street level history of the global Cold War era one that uses the analysis of the local to rethink and reframe the wider picture of the global connecting the political negotiations of individuals and

communities at the intersection of places and of meeting points between ordinary people and political elites to the Cold War at large Essential reading for all students of Cold War history **A Most Human Enterprise** Donald O. Granberg, John Galliher, 2012-07-10 A Most Human Enterprise looks at controversial social science research methods and their effects on subjects and researchers In detailing case studies in which plagiarism was alleged subjects were mislead or seriously abused and research denigrated certain demographics Donald O Granberg and John F Galliher demonstrate how social scientists have strayed from the ethical standards of scientific research Case studies include the infamous Tuskegee Syphilis Study the well known pseudo prison work of Philip Zimbardo the obedience research of Stanley Milgram and the study of sex in public places by sociologist Laud Humphreys Many of the studies that were most damaging to human subjects were funded by government making the current concerns of university Institutional Review Boards seem ironic A Most Human Enterprise also investigates consequences of plagiarism in the social sciences the role that whistle blowers can play and the consequences of their acts Humans are of course capable of lofty and amazing accomplishments Yet they are nevertheless also subject to bias prejudice ego involvement and poor judgment This book demonstrates the inadequacy of Institutional Review Boards in limiting ethical lapses in the social sciences and seeks to create a reader more sensitive to the problems and pitfalls that arise in the course of doing social research **Federal Drug Abuse and Drug Dependence Prevention, Treatment, and Rehabilitation Act of 1970** United States. Congress. Senate. Committee on Labor and Public Welfare. Subcommittee on Alcoholism and Narcotics, 1970
