Walsh, Charles S. Dudley, Emily D.

Copenhagen, 1983-12-22 Indoor Air Quality presents usable data and information on a range of subjects from legislation to emission and ventilation rates in tabular graphical or schematic forms Each chapter is thoroughly referenced so that readers can seek original documents as desired This single volume collects the expertise of researchers in a range of disciplines and presents it in a manner that is understandable to all professional working in the area Readers have the opportunity to learn how chemists biologists physicists engineers physicians epidemiologists environmentalists toxicologists and public health scientists are contributing to the study of indoor air quality **Management of Indoor Air Quality** Marzenna R.

Dudzinska, 2011-06-07 Due to changes in lifestyle people spend more time indoors This refers not only to the time spent at home and at office premises but also in shopping malls recreation centers and transport vehicles Concentrations of many pollutants are higher indoors than they are outdoors Consequently the indoor environment has a bigger impact on human health *Indoor Air Quality* M. Maroni, B. Seifert, T. Lindvall, 1995-08-16 People spend most of their time indoors and indoor air pollutants can cause both long and short term health effects Awareness of indoor air pollution as an environmental issue however is relatively new This book has been prepared to offer an up to date comprehensive reference manual on indoor air quality to scientists and professionals active in this area The intention of the book is to bring together a collection of contributions from specialists in the specific disciplines of indoor air quality covering all points of view from various angles from building design and building sciences to health effects and medical diagnosis toxicology of indoor air pollutants and air sampling and analysis One of the characteristics of this book is the multidisciplinary approach that integrates the expertise of medical doctors architects engineers chemists biologists physicists and toxicologists The resulting product is of great educational value and recommended for consultation as well as teaching purposes The panel of contributing authors includes top experts on indoor air worldwide who have participated in international workshops and led the development of indoor air sciences over the recent years Risk Assessment and Indoor Air Quality Harlee Knight, 2023-09-26 Indoor air quality IAQ

refers to the quality of air inside a school house office or any other building environment Poor IAQ has been associated with decreased productivity sick building syndrome and poor learning in schools Nausea sinus congestion shortness of breath headache and other symptoms are associated with poor IAQ Indoor air pollution can cause a variety of health problems including heart diseases cancer respiratory diseases and cognitive deficits Risk assessment with respect to the IAQ involves the application of the tools and methodologies of risk assessment to the study of indoor air quality The goal of an IAQ risk assessment is to detect problems with air quality in facility areas and develop long term solutions to improve the safety and

health of building occupants It involves collecting samples from air and from building surfaces studying the airflow and determining the human exposure to pollutants The main techniques for enhancing IAQ in the buildings include using air filters eliminating or controlling the source of pollution and using ventilation to dilute pollutants This book contains some path breaking studies on indoor air quality and its risk assessment It will help the readers in keeping pace with the rapid changes in this field of study
