

A dramatic landscape photograph featuring a narrow, sandy path that leads from the foreground into a dark, rocky gorge. The path is illuminated by a warm, golden light, likely from a low sun or moon, which creates a strong reflection on the wet sand. The gorge walls are steep and rugged, with some greenery visible on the left. At the end of the path, the path opens up to a view of the ocean under a cloudy sky. The overall mood is contemplative and inspiring.

Avoiding the bad means you risk
avoiding the good, too, and I'd rather
be hurt than never not feel this.

Risk Of Being What It Means To Be Good And Bad

Andrew Carl Sobel

Risk Of Being What It Means To Be Good And Bad:

Risk Classification by Means of Clustering Bernhard Christian Kübler, 2010 Determining risk adequate insurance premiums is a core issue in actuarial mathematics This study is specifically concerned with identifying convenient partitions of general insurance collectives such that the resulting tariff classes are homogeneous to a maximum extent and on the other hand yet large enough to allow for the occurrence of the group balance concept and to end up with reliable estimates of the moments of the claim size distributions Therefore the author develops an innovative classification algorithm utilizing a multidimensional cluster approach combined with credibility theoretical implications Its construction stems from involving the entire claim information of risks simultaneously and in a suitable manner and particularly from obtaining optimality regarding the cluster criteria Under certain conditions commonly used cross classification schemes are shown to be a particular case of the new approach Besides desirable theoretical benefits like its generalizing established cross classification systems an empirical investigation also suggests the practical superiority of the new algorithm
