Risky Business Canadas Changing Science Based Policy And Regulatory Regime:

Canadian Science, Technology, and Innovation Policy G. Bruce Doern, David Castle, Peter W.B. Phillips, 2016-06-01 Canadian Science Technology and Innovation Policy presents new critical analysis about related developments in the field such as significantly changed concepts of peer review merit review the emergence of big data in the digital age and the rise of an economy and society dominated by the internet and information The authors scrutinize the different ways in which federal and provincial policies have impacted both levels of government including how such policies impact on Canada's natural resources They also study key government departments and agencies involved with science technology and innovation to show how these organizations function increasingly in networks and partnerships as Canada seeks to keep up and lead in a highly competitive global system The book also looks at numerous realms of technology across Canada in universities business and government and various efforts to analyze biotechnology genomics and the Internet as well as earlier technologies such as nuclear reactors and satellite technology The authors assess whether a science and technology centred innovation economy and society has been established in Canada one that achieves a balance between commercial and social objectives including the delivery of public goods and supporting values related to redistribution fairness and community and citizen empowerment Probing the nature of science advice across prime ministerial eras including recent concerns over the Harper government's claimed muzzling of scientists in an age of attack politics Canadian Science Technology and Innovation Policy provides essential information for academics and practitioners in business and government in this crucial and complex field

Canadian Energy Policy and the Struggle for Sustainable Development G. Bruce Doern, 2005-01-01 In recent years energy policy has been increasingly linked to concepts of sustainable development In this timely collection editor G Bruce Doern presents an overview of Canadian energy policy gathering together the top Canadian scholars in the field in an examination of the twenty year period broadly benchmarked by energy liberalization and free trade in the mid 1980s and by Canada's ratification of the Kyoto Protocol in 2002 The contributors examine issues including electricity restructuring in the wake of the August 2003 blackout the implications of the Bush Administration's energy policies energy security northern pipelines and Aboriginal energy issues provincial changes in energy policy and overall federal provincial changes in regulatory governance They also demonstrate that since per capita energy usage has actually increased in the past several years sustainable development remains very much a struggle rather than an achievement When the Kyoto Protocol and its requirements for reductions in greenhouse gas emissions are factored in the Canadian record is especially dubious in basic energy terms Canadian Energy Policy and the Struggle for Sustainable Development is key to understanding many of the issues in Canada's endeavour to live up to its energy related environmental responsibilities

Strategic Science in the Public Interest G. Bruce Doern, Jeffrey S. Kinder, Jeff Kinder, 2007-01-01 The past twenty years have seen considerable shifts and struggles in government science that is in the way the state funds supports regulates

conducts and uses scientific and technological activity Focusing on federal labs and agencies Strategic Science in the Public Interest explores how these labs have been located within and often buried by the larger commercially focussed federal innovation agenda G Bruce Doern and Jeffrey S Kinder examine four labs whose mandates deal with the Alberta oil sands environmental technologies wildlife research and mining and metals respectively The authors use these cases to explain why a better middle level approach to analysis is needed for strategic public interest centred government science They illustrate the importance of understanding the variety as well as the similarity of federal science and technology labs and agencies and of instituting policies that reflect this diversity The growing importance of Related Science Activities RSA is also explored as well as the core trade offs between commercial and public goods science in their mandates and their internal capacities

Rules, Rules, Rules, Rules G. Bruce Doern, Robert Johnson, 2006-01-01 Rules Rules Rules Rules considers various sectors where rule making spans all or most of the four levels of jurisdiction international federal provincial and city or local in areas such as food safety investment and trade forestry drinking water oil and gas and emergency management *The Oxford Handbook of Canadian Politics* John Courtney, John Childs Courtney, David Smith, 2010-04-29 The Oxford Handbook of Canadian Politics provides a comprehensive overview of the transformation that has occurred in Canadian politics since it achieved autonomy nearly a century ago examining the institutions and processes of Canadian government and politics at the local provincial and federal levels It analyzes all aspects of the Canadian political system the courts elections political parties Parliament the constitution fiscal and political federalism the diffusion of policies between regions and various aspects of public policy *Canadian Nuclear Energy Policy* CRUISE Conference on the Future of Nuclear Energy in Canada (1999 : Ottawa, Ont.), 2001-01-01 Focusing on the federal government but with special attention given to key changes in Ontario the analytical core of this book identifies five key nuclear energy choices and challenges that face the federal government and other Canadian policy makers *Nature's Experts* Stephen Bocking, 2004 Annotation Explores the contributions and challenges presented when scientific authority enters the realm of environmental affairs Practical examples and case studies illustrate that science must be relevant credible and democratic **Educational Regimes and Anglo-American**

Democracy Ronald A. Manzer, 2003-01-01 Manzer's comparative political study of schools in Australia Canada New Zealand the United Kingdom and the United States focuses on five fundamental problems in the historical development of Anglo American educational regimes the original creation of systems of elementary education in the nineteenth century as publicly provided and publicly governed the transformation of secondary schools in the early twentieth century to match the emerging structure of occupational classes in capitalist industrial economies the planning for secondary schools in the development of the welfare state after the Second World War the accommodation of social diversity in public schools from the 1960s to the 1990s in response to increasingly strong assertions of ethnicity language race and religion not only as criteria for equal treatment but also as foundations of communal identity and more **New Institutionalism** André

Lecours,2005-01-01 Featuring discussions of comparative politics public policy and international relations this collection from editor Andr Lecours is a comprehensive examination of the subject making it a crucial addition to any political scientist's library

Climate Adaptation Policy and Evidence Peter Tangney,2017-07-28 Evidence based policymaking is often promoted within liberal democracies as the best means for government to balance political values with technical considerations Under the evidence based mandate both experts and non experts often assume that policy problems are sufficiently tractable and that experts can provide impartial and usable advice to government so that problems like climate change adaptation can be effectively addressed at least where there is political will to do so This book compares the politics and science informing climate adaptation policy in Australia and the UK to understand how realistic these expectations are in practice At a time when both academics and practitioners have repeatedly called for more and better science to anticipate climate change impacts and thereby to effectively adapt this book explains why a dearth of useful expert evidence about future climate is not the most pressing problem Even when it is sufficiently credible and relevant for decision making climate science is often ignored or politicised to ensure the evidence based mandate is coherent with prevailing political economic and epistemic ideals There are other types of policy knowledge too that are arguably much more important This comparative analysis reveals what the politics of climate change mean for both the development of useful evidence and for the practice of evidence based policymaking

Networks, Alliances and Partnerships in the Innovation Process John de la Mothe,Albert N. Link,2012-12-06 In an era of intense knowledge based globalization and technology based competition the central role of networks alliances and partnerships is now becoming recognized By looking at the dynamics of these strategic organizational activities leading authors in the field examine in this book how firms align themselves how they use networks and enter into partnerships in order to develop new or radically improved processes and how they introduce new or radically improved products to the market The topic excludes as the primary interest spatial effects such as those found in geographic clusters or in regional innovation systems The focus here is instead on the innovation process and therefore examines framework issues about how we can assess networks of innovators measurement issues for both researchers and official statisticians and impact issues for both industry strategists and policy makers Using an evolutionary perspective and drawing on a range of disciplines Networks Partnerships and Alliances explores important issues at the conceptual methodological and comparative levels concerning the construction of comparative advantage

Three Bio-realms G. Bruce Doern,Michael J. Prince,2012-01-01 Biotechnology has become one of the most important issues in public policy and governance altering the boundaries between the public and the private the economic and the social and further complicating the divide between what is scientifically possible and ethically preferred Given the importance of biotechnology in shaping relations between the state science the economy and the citizenry a book that explores the Canadian biotechnology regime and its place in our democracy is timelier than ever Three Bio Realms provides the first integrated examination of the thirty year story of the

democratic governance of biotechnology in Canada G Bruce Doern and Michael J Prince two recognized specialists in governance innovation and social policy look at particular network based factors that seek to promote and to regulate biotechnology inside the state as well as at broader levels Unmatched by any other book in its historical scope and range Three Bio Realms is sure to be read for years to come **Purchase for Profit** Heather Whiteside,2015-01-01 Purchase for Profit will be important for those studying public policy in any of the areas in which public private partnerships are now being adopted Migrant Work by Another Name Leah Faith Vosko,2025-06-26 Migrant Work by Another Name explores the complexities of Canada s evolving international migration and employment policy landscape It critically examines the shift towards mobility programs under the recently inaugurated International Mobility Program IMP This shift occurs alongside the contraction of certain streams within Canada s long standing Temporary Foreign Worker Program TFWP The book investigates the implications of policy changes influenced at once by public outcry over migrant worker exploitation and persistent demands for labour in the face of qualitative labour shortages in high income countries like Canada Grounded in a decolonial feminist political economy approach Leah F Vosko employs a mixed methods analysis to contrast the narrative of mobility with the persistent realities of precarity among transnational workers The book features in depth case studies of the three largest IMP subprograms Working Holiday Post Graduation and Spousal Work Permit programs revealing how these initiatives despite being touted as promoting mobility provide for temporary migrant work by another name and perpetuate distinct forms of precarity This critical perspective challenges the notion of progress in contemporary migration policies shedding light on the ongoing challenges faced by transnational workers in Canada *Globalization and Food Sovereignty* Peter Andr  e,Jeffrey Ayres,Michael J. Bosia,Marie-Jos  e Massicotte,2014-01-01 This collection examines expressions of food sovereignty ranging from the direct action tactics of La V a Campesina in Brazil to the consumer activism of the Slow Food movement and the negotiating stances of states from the global South at WTO negotiations With each case the contributors explore how claiming food sovereignty allows individuals to challenge the power of global agribusiness and reject neoliberal market economics *Deliberative Democracy for the Future* Genevieve Fuji Johnson,2008-06-13 In today s world public policies are increasingly associated with social and environmental risk and scientific uncertainty Given such potential impacts on the moral freedom and equality for existing and future generations policies should reflect decision making standards beyond those of economic efficiency and technical safety They should reflect the imperatives of social justice and democratic legitimacy now and into the future Deliberative Democracy for the Future identifies an approach to ethical policy analysis that promises to serve the ends of justice and legitimacy in areas of public policy such as hazardous waste management energy generation and regulation climate change control and genomics research and commercialization Based on a wide reading of ethical approaches to policy analysis found in contemporary political theory moral philosophy and public policy literatures it evaluates these three central approaches to ethical policy analysis in light of moral dilemmas arising in a

particularly timely case Canadian nuclear waste management policy The volume's central argument is that the most desirable approach to ethical policy analysis contains the philosophical tools necessary to address problems of understanding risk and safety identifying obligations to both existing and future generations and conceptualizing legitimacy conferring decision making processes Genevieve Fuji Johnson argues that neither welfare utilitarianism nor modern deontology is sufficiently equipped for these tasks She proposes that only deliberative democracy contains convincing conceptions of the good justice and legitimacy that provide for the justifiable resolution of debates about the moral foundations of public policy Responding to challenges in nuclear waste management in ways more comprehensive and more tenable than both utilitarianism and deontology deliberative policy analysis promises to be an effective approach to other cases associated with risk uncertainty and futurity

Transforming Provincial Politics Bryan M. Evans, Charles W. Smith, 2015-01-01 Transforming Provincial Politics is the first province by province analysis of politics and political economy in more than a decade and the first to directly examine the turn to neoliberal policies at the provincial and territorial level and examines how neoliberal policies have affected politics in each jurisdiction in Canada

Resistance Is Fertile Wilhelm Peekhaus, 2013-03-13 For decades government industry and the mainstream media have extolled the virtues of biotechnology downplaying its negative side effects and claiming that it can improve everything from our health and diet to our environment and economy Focusing on agricultural biotechnology Resistance Is Fertile challenges this dominant rhetoric by offering a critical analysis of the role of capital and the state in the development of this technoscience Wilhelm Peekhaus analyzes the major issues around which opponents of agricultural biotechnology in Canada are mobilizing resistance namely the enclosure of the biological commons and the knowledge commons which together form the BioCommons What emerges is an empirically and theoretically informed analysis of topics such as Canada's regulatory regime the corporate control of seeds the intellectual property system and attempts to construct and control public discussions about agricultural biotechnology

Fair Trade Coffee Gavin Fridell, 2007-01-01 Using case studies from Mexico and Canada this book examines the fair trade coffee movement at both the global and local level assessing its effectiveness and locating it within political and development theory It provides an analysis of fair trade coffee in the context of global trade

Small Nations, High Ambitions X. Hubert Rioux, 2020-02-24 Given the importance that entrepreneurship and start up businesses in technology intensive sectors like life sciences renewable energy artificial intelligence financial technologies software and others have come to assume in economic development the access of entrepreneurs to appropriate levels of finance has become a major focus of policymakers in recent decades Yet this prominence has led to a variety of policy models across countries and even within countries as different levels of government have adapted to new challenges by refining or transforming pre existing institutions and crafting new policy tools Small Nations High Ambitions investigates the roots of such policy diversity at the subnational level offering in depth accounts of the evolution of Quebec's and Scotland's policy strategies in the

entrepreneurial finance sector and venture capital more specifically As compared to other regions and provinces in the United Kingdom and Canada Quebec and Scottish venture capital ecosystems rely on a high degree of state intervention either direct through public investment funds or indirect through government backed hybrid or tax advantaged funds These two regions can thus be described as sponsor states heavily involved in the strategic backing of innovative businesses Whereas most of the literature on venture capital has focused on economic variables to explain variations in policy models this book seeks to explain policy divergence in Quebec and Scotland through political and ideological lenses Its main argument is that the development of venture capital ecosystems in these regions was underpinned by Quebecois and Scottish nationalisms which induced preferences for policy asymmetry and state intervention
