An unrivaled reference tool for advanced practice providers and students in clinical practice settings. This concise and easy-to-read drug therapy prescribing reference provides critical information for advanced practice nurses and physician assistants in clinical practice settings who are involved in the primary care management of patients with acute episodic and chronic health problems, life-altering and life-threatening diseases, and needs for health promotion and disease prevention. Interspersed with clinically useful information such as monitored laboratory values, patient teaching points, and safety information, this reference draws upon data taken directly from FDA-approved drug labels and patient medication guides and is organized by diagnosis rather than by drug classification to provide advanced practice practitioners with the comprehensive, concise, and up-to-date information on drug therapies that they need to help achieve positive outcomes in their daily practice. The first section of this book presents drug treatment regimens for over 700 clinical diagnoses listed alphabetically by generic name, followed by important information required for prescription decision-making. The second section provides additional information on treatment organized in a convenient table format. An alphabetical cross-reference index of drugs allows for easy identification of alternate drug names and their location within the text. New to this Edition: Information on over 100 new diagnoses and over 100 new generic drugs indicated for the treatment of quality-of-life-altering and life-threatening conditions such as chronic kidney disease, genetic diseases, mesothelioma, MS, metastatic cancers, and rare diseases. Updates on drugs used for site-specific cancers, mental health issues, and commonly diagnosed diseases such as diabetes and asthma. Details on new drug approvals including indications, treatment regimens, adverse reactions, drug-drug interactions, warnings, and precautions, and use in special populations. Key Features: Provides new drug treatment regimens for drugs that are first-in-class, novel drugs, orphan drugs, new drugs with breakthrough or fast-track designation, and drugs with new indications and expanded social populations. Includes drug prescribing information on diseases prevalent outside of North America, including endemic diseases with known transmission and treatment interventions. Serves advanced practice providers across the United States and internationally. Consistent with approvals and recommendations for use by the FDA.
