Mate And Stalemate Working With Marital Problems In A Social Services:

Mate and Stalemate: Working with Marital Problems in a Social Services Department Janet Mattinson,1981

Psychoanalytic Theory for Social Work Practice Marion Bower,2005 Written by practicing social workers and social work educators this text analyzes modern psychoanalytic and psychosocial approaches to social work and relates them to current practices and values Focusing on working with children and families the text covers salient issues in social work practice including risk assessment dealing with parents with drug and alcohol problems supervision and management of emotional stress Throughout the book there is an emphasis on the realities of frontline practice and looking at what can realistically be achieved It also addresses the research evidence for this approach With psychoanalytic and psychosocial approaches becoming increasingly popular this text will be a welcome addition for professionals students and social work educators

Problems, Tasks and Outcomes E. Matilda Goldberg,Jane Gibbons,Ian Sinclair,2021-11-07 In the 1980s although most social workers organised their time and described their work in terms of cases research studies had cast serious doubts on the efficacy of working in this way As a result there had been growing anxiety about what social workers do what they ought to do and the training they needed Task centred casework was an approach to social work which proposed a solution to some aspects of this dilemma Growing out of the surprising results of an American research study it broke free from the traditional psycho analytic approach to casework It aimed at clarity of purpose a concentration on the clients perceptions of the problems openness about clients and helpers intentions and agreement about what is to be done and achieved within a specified time Originally published in 1985 this book brings together three British studies that accompanied and in some respects pioneered the introduction of task centred casework into the United Kingdom The studies describe and evaluate task centred casework with social services department clients with young people on probation and with men and women referred to hospital after poisoning themselves The research suggests what task centred casework can and cannot achieve describes how clients experience it and seeks to define the skills it requires The studies also provide some reasons why many previous studies of social work have failed to find evidence for social work effectiveness The book uses much case material to illustrate methods of task centred casework and its outcomes as seen by clients social workers and an independent outsider It should still be of interest to social workers teachers of social work and social work students More generally it will be welcomed by all those who are interested in building social work on a surer basis than anecdote and fashion

Couples, Conflict and Change Adrian James,2002-09-11 The A3 process is a way to look with new eyes at a specific problem identified by direct observation or experience It offers a structure that begins by always defining the issue through the eyes of the customer In A3 Problem Solving for Healthcare Cindy Jimmerson explains an essential tool borrowed from the Toyota Production System which is an extension of work identified with the well known Value Stream Map She offers an easy to learn problem solving method that can be used in every aspect of healthcare to identify understand and

Rethinking Marriage Christopher Clulow, 2018-05-08 This book brings together a group of specialists who attempt to describe the process of interaction between the inner and personal and the outer and social They illustrate what is happening to current marriage particularly in its daily intimate experience They do not attempt to offer expert solutions They describe practice as they see it This book is a valuable study to help the clarification of the complex world of contemporary marriage particularly as it stresses the dynamic aspects of the marital relationship which are the key to its present aspirations It is a study which informs both the expert and the lay reader helping to make sense of the necessary diverse realities which make up marriage today from the Foreword by Jack Dominian

Social Work: The Social Organisation of an Invisible Trade Andrew Pithouse, 2019-05-23 First published in 1998 this book sets out to shed sociological light upon the much under researched realm of day to day child care practice The text broke new ground when first published in 1987 and there have been few if any similar books that adopt an ethnographic approach to statutory child care practice A second edition would still speak to this rarely analysed occupational world However it would enjoy greater resonance when updated with practitioner viewpoints on the extent to which the findings remain pertinent today which is likely to be the case The book offers no conclusions other than it demonstrates that the invisible world of practice cannot be readily understood or changed unless grasped through an interactionist sociology The book is aimed at a social work social welfare market as well as a sociology of profession organization readership

Ends and Means in Social Work E. Matilda Goldberg, R. William Warburton, 2021-11-07 Originally published in 1979 Ends and Means in Social Work was the first book to provide research based evidence on what social workers actually do what they were aiming to achieve and what sense their activities made both in terms of their own subjective perspectives and those of their clients The authors describe and analyse a series of surveys and action studies based on a year's referrals and the long term clientele of an area office They aimed first to find out what the clients thought of and expected from the newly reorganised social services and how social workers saw the changes and their new responsibilities The second aim was to discover how social work skills and other resources were being used to meet different client needs Third the research was designed to enable social workers by developing a new monitoring tool the Case Review System to become more explicit about both the ends and means of their activities Widespread interest had been aroused by the Case Review System It had raised intriguing questions about who gets what and why On an individual level the Case Review System can enable social workers to evaluate their practice by comparing plan with achievement as an

educational tool it can assist supervision as a management tool it can provide aggregated data on client characteristics the use of resources and outcomes as a research tool it can answer questions on the relationships between client characteristics problems and social work practice and provide longitudinal data on client careers It is in response to insistent demands for a rounded account of this research project and its results that this book has been written It endeavours to bring together all the aspects of the specific research studies and to discuss their wider implications for the organisation of the personal social services Particularly valuable for students and practitioners alike will be the concluding discussion in which the evidence which emerged about the use of social work resources is subjected to critical review Questions are raised about the current deployment of social work skills and suggestions are made about how these skills might be redeployed tasks defined more realistically and how statutory functions could mesh more easily with voluntary activities

Mental Health Social Work Observed Mike Fisher, Clive Newton, Eric Sainsbury, 2021-11-07 Despite extensive changes in the organisation of social and psychiatric services there had been no study of mental health social work in the UK since the early 1960s There was however no shortage of received wisdom about the perceived failure of social work to provide a service to the mentally disordered Originally published in 1984 it was to provide some basic information about the practice of social work in this field that the study was conducted on which *Mental Health Social Work Observed* is based The authors looked at both long term work and emergency work in which the use of compulsory powers was requested In addition to the views of social workers the opinions of psychiatrists family practitioners and of the clients themselves were sought in order to gain a full picture of social work in practice Through their thorough immersion in the field of study and through their experience of social work and of mental health issues the authors were able to provide a sympathetic and lucid account of the difficulties of mental health social work and of the thorny issue of interprofessional relationships which will ring true to the practitioner They produced recommendations relevant to social work practice at the time and this book would be found useful to social workers and their managers to psychiatrists family practitioners psychiatric nurses and clinical psychologists Of particular relevance to the then current changes in the role of the social worker under the new mental health legislation is the authors study of mental health emergency work culminating in a recommended code of practice

Marital Violence Margaret Borkowski, Mervyn Murch, Val Walker, 2023-07-05 In the early 1980s the subject of violence in marriage was in danger of being overlooked once again as new social problems dominated the political scene and the Government pursued policies of retrenchment that were likely to deprive refugees of the necessary central government support Yet improvements in the services for victims of marital violence were still urgently needed as this study shows Originally published in 1983 this book is based on research into the way practitioners in the medical legal and social services viewed marriage and violence at the time It examines marital violence from a number of perspectives Taking samples from groups of doctors solicitors social workers health visitors and women s aid refugees the authors have investigated the ways in which different agencies and practitioners respond to the

problem of marital violence They use a combination of statistical evidence and interviews with practitioners and the victims themselves to build up a picture of the extent of the problem how it is defined how much comes to the attention of the public services and of the ways in which the attitudes and professional status of the practitioners form a response that is in varying degrees adequate or otherwise to deal with the problems that exist The authors produce evidence to show that marital violence is still widespread though largely hidden because of the way privacy determines family relationships They show how present provisions are inadequate to deal with the problem and make recommendations about ways of improving the services available to help battered women

The Unconscious at Work Anton Obholzer, Dr Vega Zagier Roberts, and Members of the Tavistock Clinic 'Consulting to Institutions' Workshop, 2003-09-02 Working in the human services has always been stressful and the current massive changes in the organization of these services together with dwindling resources and ever greater demands for cost effectiveness add to the stresses inherent in the work Even in the best run and best resourced organizations there are pockets of irrationality where unconscious institutional processes undermine both effectiveness and morale The contributors to this book use ideas drawn from psychoanalysis open systems theory Bion's work with groups and group relations training to explore the difficulties experienced by managers and staff in a wide range of care settings Each concept is illustrated with examples from practice to make it recognizable and useful to the reader Each chapter develops a theme relating to work with a particular client group or setting including hospitals schools day centres residential units community services and many others or explores aspects of work organization for example the supervisory relationship facing cuts and closure or intergroup collaboration By describing both the difficulties and their own feelings and thoughts while consulting to these institutions the authors offer the reader new ways of looking at their own experiences at work which will be both enlightening and helpful

What Social Workers Need to Know Marion Bower, Robin Solomon, 2017-08-23 Social work deals with the heavy end of human difficulties such as cruelty self destructiveness and severe and enduring mental health problems How do social workers make sense of the emotional difficulties which come with the realities of practice Understanding our clients is the best way of dealing with complex situations and avoiding burnout and stress The contributors to this book argue that psychoanalysis provides a theory of development and behaviour capable of formulating a realistic model for understanding emotional difficulties and disturbances in both clients and ourselves The chapters demonstrate a way of thinking for the practitioner that can be used in all situations The book examines in detail some of the difficult and disturbing conversations that social workers have with clients of all ages It provides a psychoanalytic framework for understanding circumstances which may be puzzling stressful or frightening and a theory whose value for many social work problems is well underpinned by research evidence Written by senior practitioners who are all still working in the front line this book puts complex real life experiences into words to help the social worker become a more effective practitioner

Rethinking Domestic Violence Audrey Mullender, 2002-09-11 This book explodes the myths

concerning domestic violence and explores how the responses of social workers and probation officers to the people involved need to be far better coordinated and more effective

The Practitioner's Guide to Working with Families Margaret Bell, Kate Wilson, 2017-03-14 This book offers a clear and coherent guide to working with families for practitioners and students in social work health counselling and related professions It brings together recent thinking on the historical and contemporary constructions of the family in such a way as to provide a helpful framework for practitioners working in a variety of settings in the field It offers up to date information on political legislative and theoretical frameworks and it reviews and illustrates a wide range of approaches and practice skills for working with families with different problems in different contexts

Couple and Family Psychoanalysis Volume 7 Number 1 Molly Ludlam, 2017-03-31 Couple and Family Psychoanalysis is an international journal sponsored by Tavistock Relationships which aims to promote the theory and practice of working with couple and family relationships from a psychoanalytic perspective It seeks to provide a forum for disseminating current ideas and research and for developing clinical practice The annual subscription provides two issues a year

Psycho-Analytic Insight and Relationships Isca Salzberger-Wittenberg, 2013-05-13 Melanie Klein has been one of the most important contributors to our thinking about human development and human personality In this classic text Isca Salzberger Wittenberg demonstrates through theoretical exposition and the use of case material the ways in which Melanie Klein's main concepts and theories illuminate the practice of social casework These theories are often complex and controversial but this concise and lucid account continues to enable social workers and others in helping professions to judge the relevance of the Kleinian approach for themselves

Critical Practice in Social Work Robert Adams, Lena Dominelli, Malcolm Payne, 2009-04-16 What do social workers need to know in order to practise skilfully and effectively Edited by three Social Work's leading scholars the second edition of this highly respected textbook helps bridge the gap between social work theory and the challenges of day to day practice Versatile and thoughtful the book's simultaneous accessibility and depth make it essential reading suited for both social work students at undergraduate and post qualifying level Practitioners too will learn and benefit from the insights collected together in this valuable addition to their bookshelf

How Couple Relationships Shape our World Andrew Balfour, Mary Morgan, Christopher Vincent, 2018-05-08 This book is about the importance of the couple relationship in the broadest terms It draws on clinical researches into the inner lived world of adult couples empirical developmental research

into children and parenting as well as the legal setting when relationships break down. It aims to bridge the inner and outer worlds showing how our most intimate relationships have vital importance at all levels from the individual and the family to the social setting and explores the implications for practice and policy. Above all it is a book about applications of clinical thinking linked with research knowledge as tools for front line workers and policy makers alike. It draws on the tradition of applied clinical thinking and research of the Tavistock Centre for Couple Relationships linking current thinking with the history of ideas in each area it covers as well as considering implications for the future.

Adult Attachment and Couple Psychotherapy Christopher Clulow, 2012-12-06 Attachment theory has triggered an explosion of research into family relationships and has provided a conceptual basis for the work of practitioners. *Adult Attachment and Couple Psychotherapy* brings research and practice perspectives to bear on the adult couple relationship and provides a framework for assessing and working with secure and insecure partnerships. Divided into three parts the book looks at what is meant by secure and insecure attachment in the couple, describes how theory and research have been applied to practice and how practice has added to the understanding of the complex problems that couples bring to therapy, examines the significance of training and the organisation of work for effective practice with couples. Using vivid illustrations from clinical and community work *Adult Attachment and Couple Psychotherapy* offers stimulating reading for all those involved in this field who wish to reassess their models of practice.

Process Facilitation in Psychoanalysis, Psychotherapy and Social Work Sylvia

O'Neill, 2018-07-03 *Process Facilitation in Psychoanalysis, Psychotherapy and Social Work* elaborates a differential theory of therapeutic engagement with full reference not only to psychoanalysis and to psychotherapy but also surprisingly to social work. When contemporary social work with the marginalised achieves mutual constructive collaboration, social workers characteristically notice an unfolding process. Could this correspond to the analytic process of psychoanalysis? Sylvia O'Neill seeks to explain theoretically and to illustrate clearly in practice just how a quasi-autonomous therapeutic process becomes established. The theory underpinning the book is Jean-Luc Donnet's conceptualisation of the establishment of the analytic process in psychoanalysis through introjection of the analytic setting. Donnet designates the psychoanalytic setting as the analytic site. O'Neill proceeds to trace by means of detailed clinical discussion the analogous process by which a viable therapeutic process can become established through created found discovery and introjection of the relevant site or setting in psychoanalytic psychotherapy and in social work. Amongst the most important elements are the practitioner's internalised theoretical principles. The book demonstrates that unconscious introjection figures more importantly in effective therapeutic engagement than a conscious therapeutic alliance. An important corollary for social work is that contrary to popular myth, no prior psychological mindedness is required. The differential theory of *Process Facilitation in Psychoanalysis, Psychotherapy and Social Work* is equally relevant to psychodynamic counselling.
