Stelmach, 2014-06-28 Motor Control Issues and Trends discusses concepts ideas and experimental data on issues and trends in motor control The book contains the works of scientists who are doing research in the field of motor control The contributed articles focus on such topics as central and peripheral mechanisms in motor control theoretical approaches to the learning of motor skills how the concept of attention can be used and applied to problems in the perception and production of movement and motor task complexity Psychologists behaviorists and neurophysiologists will find the book invaluable Intersensory Perception and Sensory Integration Richard D. Walk, Herbert L. Pick, 2013-03-08 This volume on intersensory perception and sensory integration is the second volume of the series Perception and Perceptual Development A Critical Review Series The topic of the volume is timely for in recent years many investigators have noted that information about any natural event is obtained by a perceiver from a variety of sources Such an observation immediately leads to the question of how this information is synthesized and organized Of course the implication that there are several discrete input channels that must be processed has come under immediate attack by researchers such as the Gibsons They find it extremely artificial to regard natural information as being cut up and requiring cementing Nevertheless the possibility that during ontogenesis perception involves the integration of separate information has attracted the attention of scholars concerned with both normal and abnormal development In the case of normal development a lively controversy has arisen between those who believe perceptual development goes from integration toward differentiation and those who hold the opposite view In the case of abnormal psychological development such as learning disabilities many workers have suggested that perceptual integration is at fault In thinking about the issues raised in this volume we are particularly indebted to our former teachers and colleagues Eleanor and James Gibson T A Ryan Robert B MacLeod and Jerome Bruner We are pleased to acknowledge the secretarial help of Karen Weeks in the preparation of this volume **Inner Ear Biology, Selected Papers from the 22nd Workshop, Wuerzburg, September 1985** W.
