Gidwani, The central Gujarat region of western India is home to the entrepreneurial landowning Patel caste who have leveraged their rural dominance to become a powerful global diaspora of merchants industrialists and professionals Investigating the Patels intriguing ascent Vinay Gidwani analyzes its broad implications for the nature of labor and capital worldwide With the Patels as his central case Gidwani interrogates established concepts of value development and the relationship between capital and history Capitalism he argues is not a frame of economic organization based on the smooth consistent operation of a series of laws but rather an assemblage of contingent and interrupted logics stitched together into the appearance of a deus ex machina Following this line of thinking Gidwani points to ways in which political economy might be freed of its lingering Eurocentrism raises questions about the adequacy of postcolonial studies critique of Marx and capitalism and opens the possibility of situating capitalism as a geographically uneven social formation in which different normative or value creating practices are imperfectly sutured together in ways that can equally impair and enable profit and accumulation Both theoretically astute and empirically informed **Capital Interrupted** unsettles encrusted understandings of staple concepts within the human sciences such as hegemony governmentality caste and agency and ultimately does nothing less than rethink the very constitution of capitalism Vinay Gidwani is associate professor of geography and global studies at the University of Minnesota

Forging Democracy Geoff Eley, 2002-04-11 Democracy in Europe has been a recent phenomenon Only in the wake of World War II were democratic frameworks secured and even then it was decades before democracy truly blanketed the continent Neither given nor granted democracy requires conflict often violent confrontations and challenges to the established political order In Europe Geoff Eley convincingly shows democracy did not evolve organically out of a natural consensus the achievement of prosperity or the negative cement of the Cold War Rather it was painstakingly crafted continually expanded and doggedly defended by varying constellations of socialist feminist Communist and other radical movements that originally blossomed in the later nineteenth century Parties of the Left championed democracy in the revolutionary crisis after World War I salvaged it against the threat of fascism and renewed its growth after 1945 They organized civil societies rooted in egalitarian ideals which

came to form the very fiber of Europe's current democratic traditions. The trajectories of European democracy and the history of the European Left are thus inextricably bound together. Geoff Eley has given us the first truly comprehensive history of the European Left: its successes and failures, its high watermarks and its low tides, its accomplishments, insufficiencies and excesses, and most importantly, its formative, lasting influence on the European political landscape. At a time when the Left's influence and legitimacy are frequently called into question, *Forging Democracy* passionately upholds its vital contribution.

*Giroux Reader* Henry A. Giroux, Christopher G. Robbins, 2015-11-17 One of the world's leading social critics and educational theorists, Henry A. Giroux has contributed significantly to critical pedagogy, cultural studies, youth studies, social theory, and cultural politics. This new book offers a carefully selected cross-section of Giroux's many scholarly and popular writings, which bridge the theoretical and practical, integrate multiple academic disciplines, and fuse scholarly rigor with social relevance. The essays underscore the continuities and transformations in Giroux's thought, just as they offer invaluable approaches to understanding a range of social problems. Giroux's work suggests that a more humane and democratic world is possible and provides critical tools that can assist concerned citizens in bringing it into being.

*Understanding Theories and Concepts in Social Policy* Ruth Lister, Ruth Patrick, Kate Brown, 2024-02-27 Demonstrating the relevance of theory to political and policy debates and practice, this lively and accessible second edition helps students to grasp the real-life implications of social policy theory. The updated text includes consideration of contemporary shifts in welfare ideologies in the context of global austerity and the UK Coalition and Conservative governments since 2010. With a new chapter focusing on critical debates about disability, sexuality, and the environment, this textbook also includes fresh reflections on migration, conditionality, resilience, social justice, and human rights. Key features include real-life examples from UK and international politics and policy to explain and illuminate the significance of social policy theory, key questions for student reflection and engagement, and bulleted chapter summaries and annotated further readings at the end of every chapter. This new edition is a dynamic, engaging, and valuable introduction to the key theoretical perspectives and concepts deployed in social policy.

*Culture, Class, and Critical Theory* David Gartin, 2012-11-12 *Culture, Class, and Critical Theory* develops a theory of culture that explains how ideas create and legitimate class inequalities in modern society. This theory is developed through a critique and comparison of the powerful ideas on culture offered by Pierre Bourdieu and the Frankfurt School thinkers, especially Theodor Adorno. These ideas are illuminated and criticized through the development of two empirical cases on which Gartin has published extensively: automobile design and architecture. Bourdieu and the Frankfurt School postulate opposite theories of the cultural legitimation of class inequalities. Bourdieu argues that the culture of modern society is a class culture, a ranked diversity of beliefs and tastes corresponding to different classes. The cultural beliefs and practices of the dominant class are arbitrarily defined as superior, thus legitimating its greater share of social resources. By contrast, the thinkers of the Frankfurt School conceive of modern culture as a mass culture, a leveled

homogeneity in which the ideas and tastes shared by all classes disguises real class inequalities This creates the illusion of an egalitarian democracy that prevents inequalities from being contested Through an empirical assessment of the theories against the cases Gartman reveals that both are correct but for different parts of modern culture These parts combine to provide a strong legitimation of class inequalities *In the Culture Society* Angela McRobbie, Angela McRobbie, 2013-09-13

How do different artistic and cultural practices develop in the contemporary consumer culture Providing a new direction in cultural studies as well as a vigorous defence of the field Angela McRobbie's new collection of essays considers the social consequences of cultural proliferation and the social basis of aesthetic innovation In the wake of postmodernism McRobbie offers a more grounded and even localised account of key cultural practices from the new populism of young British artists including Damien Hirst and Tracy Emin to the underground London sounds of drum n bass discussing music by artists such as Tricky Talvin Singh and Goldie from the new sexualities in girls and women's magazines like *More* and *Sugar* to the dynamics of fashion production and consumption Throughout the essays the author returns to issues of livelihoods and earning a living in the cultural economy while at the same time pressing the issue of cultural value *What's Left of Blackness* T. Fisher, 2012-10-15 This book analyzes the political transformations in black women's socially engaged community based political work in England in the late twentieth century It situates these shifts alongside Britain's political economy and against the discourse and deployment of blackness as a political imaginary in which to engage in struggles for social justice State Regulation and the Politics of Public Service Graham John Taylor, 1999 This book explores how recent restructuring of the public services has impacted on public service employment using the water industry as an example It places such development in a theoretical and historical context and uses case studies Women and Technology Urs E. Gattiker, Rosemarie S. Stollenmaier, 2020-10-12 No detailed description available for Women and Technology **Class Struggles** Dennis L. Dworkin, 2014-05-22 In the 1960s and 1970s the study of history and sociology was heavily influenced by Marxism and theories of class But the collapse of Communism and significant changes in culture and society threw the study of class into crisis Its most basic premises were called into question More recently accelerating globalisation proliferating multinational corporations and unbridled free market capitalism have given the study of class a new significance and caused historians and sociologists to revisit the debate This book looks at the changes that caused the crisis in the study of class and shows how new vibrant theories have appeared that will drive forward our understanding of history and sociology Place and the Politics of Identity Michael Keith, Steve Pile, 2004-11-23 In the last two decades new political subjects have been created through the actions of the new social movements often by asserting the unfixed and overdetermined character of identity Further in attempting to avoid essentialism people have frequently looked to their territorial roots to establish their constituency A cultural politics of resistance as exemplified by Black politics feminism and gay liberation has developed struggles to turn sites of oppression and discrimination into spaces of resistance This book

collects together perspectives which challenge received notions of geography which are in danger of becoming anachronisms without a language to articulate the new space of resistance the new politics of identity      **Reconsidering Social**
